Just a Spoon Full of Laughter is a great read for anyone that's been to a doctor's office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. "The funniest book I ever read." Says Dr. Zhivago "Yes! Yes! Yes!" Says Dr. No

In the 1960s, model kit building was a huge hobby. Kids built plastic kits of planes, tanks, race cars, space ships, creatures from scary movies, you name it. Before baseball card collecting, Pokémon, and video games, model kit building was one of the most popular hobby activities. Car and airplane kits were the most popular, and among the car kits, muscle cars, as we know them today, were one of the most popular categories. Many owners of real muscle cars today were not old enough to buy them when the cars were new, of course. Yet kids of the 1960s and 1970s worshiped these cars to an extent completely foreign to kids today. If you couldn't afford or were too young to buy a muscle car back then, what could you do? For many, the next best thing was to buy, collect, and build muscle car kits from a variety of kit companies. Hundreds were made. Many of these kits have become collectible today, especially in original, unassembled form. Although people still build kits today, there is a broad market for collectors of nostalgic model kits. People love the kits for the great box art, to rekindle fond memories of building them 40 years ago, or even as a companion to the full-scale cars they own today. Here, world-leading authority Tim Boyd takes you through the entire era of muscle car kits, covering the options, collectability, variety availability, and value of these wonderful kits today. Boyd also takes you through the differences between the original kits, the older reproduction kits, and the new reproduction kits that many people find at swap meets today. If you are looking to build a collection of muscle car kits, interested in getting the kits of your favorite manufacturer or even just of the cars you have owned, this book will be a valuable resource in your model kit search.

Intercultural competence and collaboration with individuals from diverse national

origins are today important skills. This handbook comprehends an overall strategic concept for interculturality in corporations. The ability to communicate with people from diverse cultural backgrounds is becoming increasingly important. Many employers consider intercultural competence to be a key criterion for selecting qualified candidates. The authors discuss practical approaches for intercultural trainings, methodology, and evaluation procedures based on current research. They explore the intercultural factor within corporations particularly as it relates to human resource development, negotiating, dealing with conflict, and project management. Thoughts on developing an overall strategy for interculturality round off this handbook.

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

Principles of Economics in Context lays out the principles of micro- and macroeconomics in a manner that is thorough, up to date, and relevant to students, attuned to the economic realities of the world around them. It offers engaging treatment of important current topics such as new thinking in behavioral economics, financial instability and market bubbles, debt and deficits, and policy responses to the problems of unemployment, inequality, and environmental sustainability. This new, affordable edition combines the just-released new editions of *Microeconomics in Context* and *Macroeconomics in Context* to provide an integrated full-year text covering all aspects of both micro and macro analysis and application, with many up-to-date examples and extensive supporting web resources for instructors and students. Key features include: An eye-opening statistical portrait of the United States; Clear explanation of basic concepts and analytical tools, with advanced models presented in optional chapter appendices; Presentation of policy issues in historical, institutional, social, political, and ethical context--an approach that fosters critical evaluation of the standard microeconomic models, such as welfare analysis, labor markets, and market competition; Issues of human well-being, both domestic and global, are given central importance, enriching the topics and analytical tools to which students are introduced; The theme of sustainability--financial, social, and ecological--is thoroughly integrated in the book, with chapters on alternatives to standard GDP measurement, the environment, common property, public goods, and growth and

sustainability in the twenty-first century; Full complement of instructor and student support materials online, including test banks and grading through Canvas.
