The Harbour Report

In 1900, Horace and John Dodge founded the Dodge Brothers Company in a machine shop in Detroit, Michigan. Dodge 100 Years tells the story of how the

Dodge brothers' commitment and vision turned an upstart company into a worldwide automotive leader. From e

From the Chrysler Six of 1924 to the front-wheel-drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in *Riding the Roller Coaster*, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler-its products, people, and performance over time-with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career

before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate. Throughout, the colorful personalities of its leaders—including Chrysler himself and Lee Iacocca—emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve.

In *Comeback*, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the

entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. Comeback is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.

The Game Maker's Apprentice

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*.

Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you,

whether your interest is in changing the world or changing your waistline.

DIVIn American Motors Corporation: The Rise and Fall of America's Last Independent Automaker, author Patrick Foster provides the ultimate inside look into an American corporation that rose from the death throes of a once-thriving independent auto industry, putting up a valiant fight for nearly half a century before succumbing to the inexorable will of the corporate machine. Born from the ashes of Hudson and Nash, AMC represented a last, desperate attempt at survival for an independent automobile company. Thanks to the steady, capable leadership of George Romney, the company not only survived, but thrived, riding on the success of the firm's small, economical cars like the Rambler. But when competition arose from Ford, Plymouth, and Chevrolet and the market began to shift toward performance and luxury cars, AMC found itself poorly prepared to compete with its

bigger rivals. With the fuel crisis of the 1970s, the small cars from AMC once again refilled corporate coffers, and the firm's purchase of the Jeep brand also generated profits—but ultimately, it was too little, too late. Even a partnership with French automaker Renault and the introduction of all-wheel-drive cars couldn't save AMC. In 1987, Chrysler Corporation purchased AMC and the story of the last independent automaker came to an end. This engaging book, from one of America's best-known automotive writers, tells the entire AMC story from its inception to its ultimate demise. /div
