Xexun Kuon was from childhood aflame with fascinated curiosity about the concealed, unseen opposite side of the satellite body revolving around his planet Farmer. As a university student, he is encouraged to fly there to explore and study these unknown countries. After contact with tribes on the near side, he travels to three lands on the far side, where he discovers stubborn resistance to science innovation and invention. In Siopia, Xexun unites with a researcher who creates two-dimensional wool cloth. He escapes with him and the ruler's daughter into Tikvia, aided by the leader of a movement of shepherds. In Tikvia, the making of nano-cotton is opposed by an underworld syndicate that controls cloth production. A second flight takes Xexun and the two lovers into Durium, a land of silk. Here the development of genetically changed silkworms to produce super-strong spider silk is opposed by the fashion and clothing industry. Xexun finds himself the friendly ally of invention and innovation in all three countries.

Finding one’s way with a map is a relatively recent phenomenon. In premodern times, maps were used, if at all, mainly for planning journeys in advance, not for guiding travelers on the road. With the exception of navigational sea charts, the use of maps by travelers only became common in the modern era; indeed, in the last two hundred years, maps have become the most ubiquitous and familiar genre of modern cartography. Examining the historical relationship between travelers, navigation, and maps, *Cartographies of Travel and Navigation* considers the cartographic response to the new modalities of modern travel brought about by technological and institutional developments in the twentieth century. Highlighting the ways in which the travelers, operators, and planners of modern transportation systems value maps as both navigation tools and as representatives of a radical new mobility, this collection brings the cartography of travel—by road, sea, rail, and air—to the forefront, placing maps at the center of the history of travel and movement. Richly and colorfully illustrated, *Cartographies of Travel and Navigation* ably fills the void in historical literature on transportation mapping.

Hi and Lois

Popular Mechanics

Hi and Lois was created in 1954 by Mort Walker and Dik Browne. This classic American comic strip has been entertaining newspaper readers for over five decades. The stars of the feature -- Hi, Lois, Chip, Dot, Trixie, and Dawg Flagston -- provide a warm, loving portrait of a wholesome family with traditional values and modern-day sensibilities. In today's often dysfunctional world, the Flagstons put the "fun" into functional family. Whether it's busy parents juggling jobs and raising a family, a teen coping with self-image, sibling rivalry among the youngsters, or a toddler learning about her place in the world, Hi and Lois has kept pace with mainstream life. The first Hi and Lois Sunday page was released on October 14, 1956. Mort and Dik always looked on these weekly instalments as an opportunity to showcase their best work. To them, a Sunday page was more than just an expanded daily strip. Mort would challenge Dik with ideas that inspired him to create a graphic masterpiece. Childhood fantasies, nostalgia trips, seasonal strolls, summer vacations, and holiday celebrations were among the many recurrent themes explored in these episodes.
