When Julie Miller began writing her successful developmental math series, one of her primary goals was to bridge the gap between preparatory courses and college algebra. For thousands of students, the Miller/O'Neill/Hyde (or M/O/H) series has provided a solid foundation in developmental mathematics. With the Miller College Algebra series, Julie has carried forward her clear, concise writing style; highly effective pedagogical features; and complete author-created technological package to students in this course area. The main objectives of the college algebra series are three-fold: Ë Provide students with a clear and logical presentation of the basic concepts that will prepare them for continued study in mathematics. Ë Help students develop logical thinking and problem-solving skills that will benefit them in all aspects of life. Ë Motivate students by demonstrating the significance of mathematics in their lives through practical applications.

"The meaning of life is the most urgent of questions," said the existentialist thinker Albert Camus. And no less a philosopher than Woody Allen has wondered: "How is it possible to find meaning in a finite world, given my waist and shirt size?" "Movies and the Meaning of Life" looks at popular and cult movies, examining their assumptions and insights on meaning-of-life questions: What is reality and how can I know it? (The Truman Show, Contact, Waking Life); How do I find myself and my true identity? (Fight Club, Being John Malkovich, Boys Don't Cry, Memento); How do I find meaning from my interactions with others? (Pulp Fiction, Shadowlands, Chasing Amy); What is the chief purpose in life? (American Beauty, Life is Beautiful, The Shawshank Redemption); and How ought I live my life? (Pleasantville, Spiderman, Minority Report, Groundhog Day).
