Class in Soweto

The book presents findings and analyses from six years of research on class structure and class identity in Soweto, South Africa's most populous and politically-important township. This is placed within the context of: heightened socio-economic inequalities in nearly all countries around the world; renewed academic interest in class alongside a paucity of literature on the character of class in the global south; and the specific value of a study on South Africa, with its extremes of unemployment, strike action, and ongoing insurrectionary unrest among the urban poor. The book draws on a large, wide-ranging representative survey and extensive qualitative fieldwork. It makes an original contribution to the sociology of class and to the politics of contemporary South Africa. *** "An exemplary study of social class and its ramifications for the lives of people, this book is an all-too-rare example of sociological research that systematically weaves together quantitative and qualitative data with both macro- and micro-analysis. The result is a complex, multidimensional understanding of how class works. It should be read not only by people specifically interested in the dynamics and dilemmas of contemporary South Africa, but by anyone interested in the problem of class in the contemporary world." - Erik Olin Wright, Vilas Distinguished Professor of Sociology, U. of Wisconsin-Madison; President of the American Sociological Assn. *** "Class in Soweto is a pioneering research project which has already resulted in important journal articles and an outstanding documentary film. The team has now gathered

their research together into a wonderful book that will transform how we understand social change in contemporary South Africa. Drawing on solid qualitative and quantitative research, the authors challenge prevailing conceptions of stratification. It is especially innovative and important in its analysis of perceptions and languages of class. There is no other book like it on any South African urban area." - Jeremy Seekings, Director: Center for Social Science Research, U. of Cape Town *** "This landmark in urban sociology addresses essential questions about the precise delineation of the huge inequalities marring postapartheid South African life. No one will be able to write about contemporary urban South Africa without addressing its findings and methods. Highly recommended." - Choice, January 2014, Vol. 51, No. 5 [Subject: Sociology, African Studies, Urban Studies, Politics]

Braxton Bragg

"Picture South Africa ten years from now: are the angry poor rising up and seizing land and businesses? Or has economic reform created jobs and growth? Is an increasingly desperate government clamping down on freedoms? Or do the middle class still braai in suburban bliss? South Africa is at a tipping point, and small shifts in political and economic conditions can bring about dramatic changes. Unemployment, slow growth, threats to freedom of speech, and poor education can send the country in any direction. Leading scenario planner Frans Cronje

identifies the key trends that will shape our future. Will South Africa follow the Narrow Road, the Wide Road, the Rocky Road or the Toll Road?" -- Back cover.

The Business of Becoming Employed

Change Management in TVET Colleges

Leaders are not just born to the role. They are born, then made - and sometimes unmade by their own actions. A leader who is not attuned to his or her followers soon becomes a leader in limbo and invariably then fails. Connectedness, compassion, empathy, integrity, humility, reasonableness and a determination to be effective are the keys to attuned leadership. An attuned leader can step boldly into an uncertain future with the certainty that followers will lend their support. In this richly reflective discussion of leadership and transformation the author provides a guide to what constitutes ethical leadership in local and global contexts, for business, politics and government. In a world where tyrants abound in corporations and in states, Attuned Leadership provides a compass for the direction of ethical leadership. Central to this perspective is that the philosophical traditions of Africa offer an important contribution to the theory and practice of leadership in the world today. African humanism or Ubuntu, evokes both reason and empathy as the basis for ethical leadership. Ubuntu - articulated in the Zulu proverb Umuntu Ngumuntu Ngabantu - means that a person is a person because of other people. The author contends that the reciprocal relationship between the individual and the social collective stimulates caring and progressive thought and action. Nowhere is this more apt than in the relationship between leader and

followers.

Policies aimed at helping workers adjust to the impact of trade or technological changes can provide a helping hand to the workforce and increase the benefits of open trade and new technologies. This publication contributes to the discussion on how governments can help make international trade more inclusive and ensure that the benefits of open trade are spread more widely. The publication responds

to the growing demand from policy-makers for further research on adjustment policies, building on previous WTO work on the labour market effects of trade. It includes an extensive review of the literature on this topic and provides case studies on adjustment policies written by experts from seven countries across four continents. The contributions cover a broad range of policy measures taken by governments to help labour markets adjust to the impact of globalization, including trade openness, using a variety of approaches. They provide valuable insights into those policies and useful information for all those interested in the social dimensions of globalization and technological change.

A Time Traveller's Guide to Our Next Ten Years

South Africa's high rate of unemployment (26.4%) makes it a complete outlier compared with other middle-income countries. Indeed, the unemployment rate rises to 36% if discouraged workers are taken into account. It underpins extreme

poverty and inequality and is a major contributor to social dislocation. If it were not for increased social payments, poverty would have continued to increase since the advent of democracy in 1994. Unemployment also represents a huge cost to growth. This book focuses on the growth path of the economy. The starting point is that while more rapid economic expansion is an important objective, at any given level of growth, the economy as a whole needs to become more labour-absorbing. The central question posed is how to bring about changes in the economic structure and pattern of development, which would lead to the attainment of this objective. The authors argue that employment needs to be much more centrally positioned within the economic and social policy arena. They emphasise innovative approaches within a broader focus on the growth path, and employment-intensive growth. And they posit that the negative impact of previous 'distortions' requires much more than a levelling of the playing field via market-based reforms. Apart from presenting an alternative growth path which could start to shift the economy in new directions, the book tackles themes which have received only limited attention, such as wage subsidies, youth unemployment and employment growth in rural areas.

PPC's Guide to PCAOB Audits-Implementing an Integrated Audit Approach

As a leading Confederate general, Braxton Bragg (1817–1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

Foresight

The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions. The 'triple challenge' of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges. Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET) band qualifications from young people not in education, employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers. This collection offers a set of research papers

that provide new analytic and empirical material on:

- The political economy of TVET types in different countries which, by comparison, illuminate the South African case;
- A periodisation of government interventions in the TVET sector over the last three decades;
- The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service;
- The halting evolution of collegial relationships between college lecturers towards higher collegiality;
- Employer expectations of college graduates and how colleges are responding; and
- An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape.

This book will offer valuable information and insights for decision-makers as well as analysts of institutional change concerning links between education and economic growth, with particular regard to TVET graduates' employment rates.

The Rise of Global Corporate Social Responsibility

Organic agriculture world-wide allows farmers to produce healthy food with low levels of external inputs, and often shortens the value chains, giving farmers a higher share of the consumer dollar. This book reports on long-term comparative organic farming systems research trials carried out over the last four years in South Africa's Southern Cape, as well as research on the organic sector and the technical tools it requires in South Africa, Zambia, Uganda and Tanzania. The trials show how the yield gap between organic and conventional crops was closed over 3 years. Water use efficiency was also greater in the organic farming system, and pests and diseases were effectively controlled using biological products. Farmer training approaches, soil carbon analysis, participatory guarantee systems, the Zambian organic farming sector (agronomy) and Ugandan organic farmer training support, and a sector plan for southern African organic farming are examined.

Chinese Lyrics

"In this book, we carry special messages from prominent and important people who talk about the impact that he made on their lives and their careers. But we also look more generally at what made this man so special: from this special relationship with the people who were supposed to guard him at prison, to his unbridled love for children. We also look at the meaningful contribution he made to sport and arts and culture and, of course, the fashion industry with his trendsetting Madiba shirts"--summary from back cover.
