Want to build a Radiant Energy battery charger? Then this is the book for you as Free Energy Generation contains the 100 plus page Provisional Patent Application that was originally filed in 2004 by John Bedini and Tom Bearden, which they have now generously placed in the public domain. This treatise holds nothing back, and includes virtually all they collectively know about negative energy. Included are circuit diagrams, oscilloscope traces, the works! And as a bonus, Free Energy Generation also contains the re-issue of John Bedini's classic 1984 book Bedini's Free Energy Generator, a how-to book about building a proven free energy generator, complete with circuit and parts list. This marked one of Tom Bearden and John Bedini's first co-operative ventures, over 20 years ago. The whole book is generously illustrated with color photographs of John and Tom taken in the Bedini lab over the 20 years, and the classic 1984 Bedini monograph is printed on commemorative antiqued paper. Free Energy Generation is the perfect practical companion to Tom Bearden's more theoretical Energy from the Vacuum. Order online at <http://cheniere.org/> Contact us for wholesale pricing

This title includes a number of Open Access chapters. The twenty-first century world faces several enormous challenges: how to mitigate climate change, meet a growing energy demand without relying on fossil fuels, and manage the escalating quantities of solid waste generated by cities around the world. This compendium volume offers a viable solution to all three: using solid waste as a renewable resource. Intended for a wide audience ranging from engineers and academics to decision-makers in both the public and private sectors, this volume has gathered together research into a range of technologies and methodologies. The editors, two well-published researchers at the top of their field, have selected articles that lay the foundation for this discussion. They have then included chapters for the following waste management scenarios: anaerobic digestion, composting, pyrolysis and chemical upgrading, incineration and carbonization, and gasification. Research has been included from around the world, representing potential international

solutions to what are global challenges, as well as crucial implications for ongoing research in this important field of study.

Just a Spoon Full of Laughter is a great read for anyone that's been to a doctor's office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. At speeds of over 230 miles per hour, the Indy open-wheel race cars set the bar for American Championship car racing. For over 100 years, the Indy cars and their drivers have drawn hundreds of thousands of spectators to Speedway, Indiana, with another 6 million people watching the race on

television or by live stream. In *The Winning Cars of the Indianapolis 500*, James Craig Reinhardt, author and official tour guide for the Indianapolis Motor Speedway, details the history of the famous race and how the open-wheel race cars have evolved over the last century. Starting in 1911 with the first running of the Indy 500, Reinhardt profiles each race and car, including the starting position, engine, tires, race speed, margin of victory, and much more. Featuring nearly 200 images of the automobiles and individuals who make the race renowned, this book showcases the top drivers and how racing has changed through two world wars, the Great Depression, and unforgettable accidents. This beautifully illustrated book is a must-have for veteran and rookie race fans alike.

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most

outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys,

Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of “Sexual Healing”—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

Forget what you've seen in movies and on television--a knife attack is usually fast, furious, and often fatal. When it comes to increasing your chances of surviving, even the best martial arts schools are no

match for the hard lessons learned in brutal institutions like Folsom Prison. Folsom alum Don Pentecost's no-nonsense guide cuts through the Hollywood myths and covers valuable information like: *Defending yourself against an attack* Going on the offensive *Training methods to maximize your chances of survival If it's true that, as a poet once said, "prison is like high school with knives," then facilities like Folsom are the Ivy League of violence. Serving a sentence at Folsom is like earning a PhD in staying alive. Don Pentecost has done the time so you don't have to. d

Assessments, understood as tools for tracking what and how well students have learned, play a critical role in the classroom. Developing Assessments for the Next Generation Science Standards develops an approach to science assessment to meet the vision of science education for the future as it has been elaborated in A Framework for K-12 Science Education (Framework) and Next Generation Science Standards (NGSS). These documents are brand new and the changes they call for are barely under way, but the

new assessments will be needed as soon as states and districts begin the process of implementing the NGSS and changing their approach to science education. The new Framework and the NGSS are designed to guide educators in significantly altering the way K-12 science is taught. The Framework is aimed at making science education more closely resemble the way scientists actually work and think, and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time. It structures science education around three dimensions - the practices through which scientists and engineers do their work, the key crosscutting concepts that cut across disciplines, and the core ideas of the disciplines - and argues that they should be interwoven in every aspect of science education, building in sophistication as students progress through grades K-12. Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework. This report reviews recent and current work in science assessment to determine which aspects of the Framework's vision can be assessed with available techniques and what additional research and development will be needed to support an assessment system that fully meets that vision. The report offers a systems approach to science assessment, in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another. Developing Assessments for the Next Generation

Science Standards makes the case that a science assessment system that meets the Framework's vision should consist of assessments designed to support classroom instruction, assessments designed to monitor science learning on a broader scale, and indicators designed to track opportunity to learn. New standards for science education make clear that new modes of assessment designed to measure the integrated learning they promote are essential. The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students.

It is the ancient days of the Persian Empire. Hadassah was content in her quiet life in the Jewish quarter of the city of Babylon with her uncle Mordecai, who had raised her from childhood. But she was old enough to be married, and yet her uncle hadn't arranged a marriage for her. Meanwhile in Shushan, King Ahasuerus' marriage to the vain and selfish Vashti has ended, and a new wife must be found. Why not bring to him the most beautiful women of the kingdom, and let him choose? And so the loveliest young women of the empire are selected in local contests, and Hadassah is among those chosen to go

to Shushan to meet the King. But as a Jewess in a foreign land with powerful enemies to her faith, she must conceal her true identity and take the Babylonian name of Esther. Will she find love with a man she has never met? And can she survive in a strict royal court controlled by the evil prime minister Haman, who wants to destroy her people?-Print ed.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he

writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Proactive Citizenry, the company which created Cam from the parts of unwound teens, has a plan: to mass produce Rewound teens like Cam for military purposes. But below the surface is of that horror lies another shocking level of intrigue: Proactive Citizenry has been suppressing technology that could make unwinding completely unnecessary. As Conner, Risa and Lev uncover these shocking secrets, enraged teens begin to march on Washington to demand justice and a better future. But more trouble is brewing. Starkey's group of storked teens are growing more powerful and militant with each new recruit. And if they have their way, they'll burn the harvest camps to the group, and put every adult in them before a firing squad-which could destroy any chance America has for a peaceful future. Praise for UNWIND: "This is the kind of rare book that makes the hairs on your neck rise up. It is written with a sense of drama that should get it instantly snapped up for film." The Times "Gripping, brilliantly imagined futuristic thriller... The issues raised could not be more provocative - the sanctity of life, the meaning of being human - while the delivery could hardly be more engrossing or better aimed to teens." Publishers Weekly, starred review "a powerful, shocking, and intelligent novel It's wonderful, wonderful stuff." thebookbag.co.uk "This book challenges ones ideas about life, about morality, about religion, about fanatics. It is not a comfortable read but it is thought-provoking." Carousel

The Day Freedom Died

The untold story of the slaying of a Southern town's ex-slaves and a white lawyer's historic battle to bring the perpetrators to justice Following the Civil War, Colfax, Louisiana, was a town, like many, where African Americans and whites mingled uneasily. But on April 13, 1873, a small army of white ex-Confederate soldiers, enraged after attempts by

freedmen to assert their new rights, killed more than sixty African Americans who had occupied a courthouse. With skill and tenacity, The Washington Post's Charles Lane transforms this nearly forgotten incident into a riveting historical saga. Seeking justice for the slain, one brave U.S. attorney, James Beckwith, risked his life and career to investigate and punish the perpetrators—but they all went free. What followed was a series of courtroom dramas that culminated at the Supreme Court, where the justices' verdict compromised the victories of the Civil War and left Southern blacks at the mercy of violent whites for generations. *The Day Freedom Died* is an electrifying piece of historical detective work that captures a gallery of characters from presidents to townspeople, and re-creates the bloody days of Reconstruction, when the often brutal struggle for equality moved from the battlefield into communities across the nation.
