Taming an Angel

The essential biography of one of music's most influential icons: Lou Reed As lead singer and songwriter for the Velvet Underground and a renowned solo artist, Lou Reed invented alternative rock. His music, at once a source of transcendent beauty and coruscating noise, violated all definitions of genre while speaking to millions of fans and inspiring generations of musicians. But while his iconic status may be fixed, the man himself was anything but. Lou Reed's life was a transformer's odyssey. Eternally restless and endlessly hungry for new experiences, Reed reinvented his persona, his sound, even his sexuality time and again. A man of contradictions and extremes, he was fiercely independent yet afraid of being alone, artistically fearless yet deeply paranoid, eager for commercial success yet disdainful of his own triumphs. Channeling his jagged energy and literary sensibility into classic songs - like "Walk on the Wild Side" and "Sweet Jane" - and radically experimental albums alike, Reed remained desperately true to his artistic vision, wherever it led him. Now, just a few years after Reed's death, Rolling Stone writer Anthony DeCurtis, who knew Reed and interviewed him extensively, tells the provocative story of his complex and chameleonic life. With unparalleled access to dozens of Reed's friends, family, and collaborators, DeCurtis tracks Reed's five-decade career through the accounts of those who knew him and through Reed's most revealing testimony, his music. We travel deep into his defiantly subterranean world, enter the studio as the Velvet Underground record their groundbreaking work, and revel in Reed's relationships with such legendary figures as Andy Warhol, David Bowie, and Laurie Anderson. Gritty, intimate, and unflinching, Lou Reed is an illuminating tribute to one of the most incendiary artists of our time.

This book provides a new look at the glories of Florence, the Tuscan city which has been a prime source for modern Western culture. Lewis reconsiders its principal focal points and casts new light on the city's civic legacy from the Middle Ages.

The Full Moon

Though his pitching career lasted only a few seasons, Howard Ellsworth "Smoky Joe" Wood was one of the most dominating figures in baseball history—a man many consider the best baseball player who is not in the Hall of Fame. About his fastball, Hall of Fame pitcher Walter Johnson once said: "Listen, mister, no man alive can throw harder than Smoky Joe Wood." Smoky Joe Wood chronicles the singular life befitting such a baseball legend. Wood got his start impersonating a female on the National Bloomer Girls team. A natural athlete, he pitched for the Boston Red Sox at eighteen, won twenty-one games and threw a no-hitter at twenty-one, and had a 34-5 record plus three wins in the 1912 World Series, for a 1.91 ERA, when he was just twenty-two. Then in 1913 Wood suffered devastating injuries to his right hand and shoulder that forced him to pitch in pain for two more years. After sitting out the 1916 season, he came back as a converted outfielder and played another five years for the Cleveland Indians before retiring to coach the Yale University baseball team. Joe's final reward for courageously enduring the eccentricities of his father, his sister's polio, the 1926–27 baseball scandal, and the loss of his beloved wife and a son was an honorary doctorate in 1985 from Yale and its president, Bart Giamatti. With details culled from interviews and family

archives, this biography, the first of this rugged player of the Deadball Era, brings to life one of the genuine characters of baseball history.

Between November 1950 and the end of fighting in June 1953, China launched six major offensives against UN forces in Korea. The most important of these began on April 22, 1951, and was the largest Communist military operation of the war. The UN forces put up a strong defense, prevented the capture of the South Korean capital of Seoul, and finally pushed the Chinese back above the 38th parallel. After China's defeat in this epic five-week battle, Mao Zedong and the Chinese leadership became willing to conclude the war short of total victory. China's Battle for Korea offers new perspectives on Chinese decision making, planning, and execution; the roles of command, political control, and technology; and the interaction between Beijing, Pyongyang, and Moscow, while providing valuable insight into Chinese military doctrine and the reasons for the UN's military success.
