"A playful picture book guide that shows how an ordinary kid can become a superhero. As readers learn the steps to becoming a hero, they'll chuckle to see the book's protagonist bungle the process. But eventually he redeems himself--with the help of his younger-but-wiser little sister. Kristy Dempsey and Mark Fearing make a great team in this wisecracking guidebook. Both are known and respected in the picture book community, with Dempsey's A DANCE LIKE STARLIGHT racking up starred reviews and Caldecott buzz, and Fearing's books (THE THREE LITTLE ALIENS AND THE BIG BAD ROBOT, THE BOOK THAT EATS PEOPLE) selling strong numbers. We're excited to have them on our list."

Fixing Your Computer Absolute Beginner's Guide

Briefly, a boot loader is the first software program that runs when a computer starts. It is responsible for loading and transferring control to an operating system kernel software (such as Linux or GNU Mach). The kernel, in turn, initializes the rest of the operating system (e.g. a GNU system). GNU GRUB is a very powerful boot loader, which can load a wide variety of free operating systems, as well as proprietary operating systems with chain-loading. GRUB is designed to address the complexity of booting a personal computer; both the program and this manual are tightly bound to that computer platform, although porting to other platforms may be addressed in the future. One of the important features in GRUB is flexibility; GRUB understands filesystems and kernel executable formats, so you can load an arbitrary operating system the way you like, without recording the physical position of your kernel on the disk. Thus you can load the kernel just by specifying its

file name and the drive and partition where the kernel resides. This manual is available online for free at gnu.org. This manual is printed in grayscale.

Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.
