Deadline to Damnation

Be spontaneous, they say. That's how I ended up on the back of a stranger's bike. A sexy, tall, tattooed stranger, but a stranger nonetheless. How was I to know that a chance meeting with this man, Xander Kane, was going to change my life?

Rough Justice

New York Times bestselling author Chantal Fernando returns to her latest, steamy Conflict of Interest series with this electrifying tale of murder, justice, and intense attraction. Jaxon Bentley is a hardnosed criminal lawyer whose entire life revolves around his

work. He's been asked to represent Scarlett Reyes, a woman accused of murdering her police officer husband in cold blood. All the evidence points to Scarlett being guilty and Jaxon is sure it's an open and shut case. But when he meets his client, he can't help but feel that she's innocent and that there's more to the story than meets the eye. With a bit of digging, he uncovers a connection to the notorious Wind Dragons Motorcycle Club and realizes that Scarlett's case is a complicated and difficult one. It certainly doesn't help that the two share an immediate and passionate attraction. Will Jaxon be able to prove Scarlett's innocence or are the two doomed to fail both in court and as a couple?

Crossroads

This book analyses a selection of challenges in the implementation and application of the 1982 UN Convention on the Law of the Sea (UNCLOS), focusing on several areas: international organizations, fisheries, security, preserving marine biodiversity, dispute settlement, and interaction with other areas of international law. UNCLOS has been described as the Constitution for the Oceans. It sets out the fundamental rights, obligations and jurisdictions of States regarding the access to, uses and management of the oceans and seas and their resources. It balances States' diverse and sometimes conflicting interests, such as conflicting uses of space, against navigational interests and the protection of the marine environment. UNCLOS is the first global treaty to include comprehensive obligations on the

protection and preservation of the marine environment, including the conservation of living marine resources. These are often common or cross-border challenges, which can only be addressed through international cooperation. The book is divided into three thematic parts. The first concerns the role of international organizations in ocean governance. It includes twelve chapters covering a very diverse set of issues, both materially and geographically, that demonstrate the importance of coordinated actions on the part of multiple States for obtaining harmonized solutions regarding the pursuit of activities in maritime spaces (in connection with e.g. navigation, fisheries or maritime security). The second part concerns the relevance of dispute settlement mechanisms for understanding the international law of the sea and the international legal framework within which the actions of the great maritime powers take place. It is composed of three chapters, examining stakeholders' role in dispute settlement, the position taken by China and the Russian Federation regarding international litigation in maritime spaces, and how the South China Sea Award may be relevant to the debate on the international legal concepts of rock and island. In turn, the third part addresses current discussions on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction. Its seven chapters report on the status quo of the ongoing negotiations for a new international legal regime of the high seas, and the establishment and operationalization of environmental regimes for international maritime spaces.

Wolf's Mate

Certain symbols abound in modern Western culture that are instantly recognizable: the cross signifies Christianity, the six-pointed Star of David is revered by Jews, the golden arches frequently means it's time for lunch. Other symbols, however, require a bit of decoding-particularly those found in cemeteries. Cemeteries are virtual encyclopedias of symbolism. Engravings on tombstones, mausoleums and memorials tell us just about everything there is to know about a person- date of birth and death as well as religion, ethnicity, occupation, community interests, and much more. In the fascinating new book *Stories in Stone: The Complete Guide to Cemetery Symbolism* by noted author Douglas Keister, the secrets of cemetery symbolism are finally revealed. For instance, did you know that it is quite rare to see a sunflower on a tombstone? Did you know that the human foot symbolizes humility and service since it consistently touches the earth? Or the humble sheaf of wheat-while it is often used to denote someone who has lived a long and fruitful life, do you know other meanings it might carry? *Stories in Stone* provides history along with images of a wide variety of common and not-so-common cemetery symbols, and offers an in-depth examination of stone relics and the personal and intimate details they display-flora and fauna, religious icons, society symbols, and final impressions of how the deceased wished to be remembered. Douglas Keister has created a practical field guide that is compact and portable, perfect for those interested in family histories and genealogical research, and is the only book of its kind that unlocks the language of symbols in a comprehensive and easy-to-understand manner. Douglas Keister has

photographed fourteen award-winning, critically acclaimed books (including *Red Tile Style: America's Spanish Revival Architecture*, *The Bungalow: America's Arts & Crafts Home*, and *Storybook Style: America's Whimsical Homes of the Twenties*) earning him the title "America's most noted photographer of historic architecture." He also writes and illustrates magazine articles and contributes photographs and essays to other books, calendars, posters, and greeting cards. Doug lives in Chico, California, and travels frequently to photograph and lecture on historic architecture and photography.
