Lifespan Development

An introduction to psychology that focuses on applications to students' own lives Revel(TM) Mastering the World of Psychology provides students a solid introduction to the diverse field of psychology -- and how it applies to their lives. Authors Samuel Wood, Ellen Green Wood, and Denise Boyd present theory and research in an engaging and accessible fashion, with plenty of opportunities for students to test their understanding and hone their critical-thinking skills. The Sixth Edition has been thoroughly updated and now incorporates several contemporary themes in order to give students an up-to-date view of the discipline. Revel is Pearson's newest way of delivering our respected content. Fully digital and highly engaging, Revel replaces the textbook and gives students everything they need for the course. Informed by extensive

research on how people read, think, and learn, Revel is an interactive learning environment that enables students to read, practice, and study in one continuous experience -- for less than the cost of a traditional textbook. NOTE: Revel is a fully digital delivery of Pearson content. This ISBN is for the standalone Revel access card. In addition to this access card, you will need a course invite link, provided by your instructor, to register for and use Revel.

Grade Aid with Practice Tests for Lifespan Development

Designed to give students the extra support they need to succeed in the classroom, this study edition offers perforated chapter practice tests at the end of the textbook, an optional Practice Test Solutions Manual with access to professional tutoring, and an Instructor's Answer Key with solutions and ready-made midterm and final exams.

Human Growth and Development

What comes to mind when you think about lesson planning? If you're like most teachers, you focus on the material you need to present, what you will do and say, what you will ask students to do, and the assessments you will create and administer. And if you're like most teachers, you also know what it's like to be disappointed when this careful planning doesn't always lead to the deep understanding and mastery you'd intended. There's a better way to approach instructional design says author and teacher-educator Ann R. Reeves, and it's within every teacher's grasp. It begins with a simple mental shift from "planning for activities" to "planning for learning outcomes" and a critical concentration on learning objectives. Remarkable for its clarity and filled with vivid examples, *Where Great Teaching Begins* is a step-by-step walk through the crucial, behind-the-scenes intellectual work necessary to make instruction truly effective and help students learn deeply and meaningfully. Here, you'll discover how to

- * Translate even the most inscrutable standards into strong, learning-focused objectives.
- * Use effective objectives as the basis for excellent assessment.
- * Craft engaging learning activities that incorporate both targeted content and necessary thinking skills.
- * Pull objectives, assessments, and learning activities together into powerful plans for learning.

Whether you're a novice instructional designer or a veteran seeking a new, streamlined process, this book is a must-read take on how to plan and achieve the excellent learning all teachers aim for and all students deserve.

Outlines & Highlights for Lifespan Development

Balanced coverage of the entire life span is just one thing that distinguishes *HUMAN DEVELOPMENT: A LIFE-SPAN VIEW*, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in

childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life. Human Development: A Life-Span View

For undergraduate courses in Child Development taught Chronologically. Boyd/Bee provides students the most support for learning and success. The Growing Child emphasizes how the three domains of development - physical, cognitive, and socio-emotional - interact with each other and with the environment to affect developmental outcomes. Featuring an innovative student-focused format, it provides the self-assessment tools necessary to keep students engaged in active learning from start to finish, as well as the most support to help students organize, understand, and apply the material. Personality Development across the Lifespan examines the development of personality characteristics from childhood, adolescence, emerging adulthood, adulthood, and old age. It provides a comprehensive overview of theoretical perspectives, methods, and empirical findings of personality and developmental psychology, also detailing insights on how individuals differ from each other, how they change during life, and how these changes relate to biological and environmental factors, including major life events, social relationships, and health. The book begins with chapters on personality development in different life phases before moving on to theoretical perspectives, the development of specific personality characteristics, and personality development in relation to different contexts, like close others, health, and culture. Final sections cover methods in research on the topic and the future directions of research in personality development. Introduces and reviews the most important personality characteristics Examines personality in relation to different contexts and how it is related to important life outcomes Discusses patterns and sources of personality development

Exploring Lifespan Development

Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, *Lifespan Development: Lives in Context* offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.

NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, and registrations are not transferable. To register for and use Pearson's MyLab & Mastering products, you may also need a Course ID, which your instructor will provide. Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for Pearson's MyLab & Mastering products may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. *Discovering the Lifespan* provides a broad overview of the field of human development and features a strong balance of research and application. In a unique departure from traditional lifespan development texts, each chapter is divided into three modules, and in turn, each module is divided into several smaller sections. Consequently, students encounter material in smaller, more manageable chunks that optimize learning.

Britain's Spiders

Written for students training for careers in the helping professions, this Fourth Edition covers all the essential topics central to understanding people whether they are clients, service users, patients or pupils. Following the shape of a human life, beginning with birth and ending with death, it combines theoretical concepts and reflective learning to help your students develop an understanding of what makes us grow and change over our lives. The NEW Online Case Study Resource - *Tangled Webs* Now you and your students can explore key issues and themes raised in the book and develop the skill of linking theory to practice with free access to a new online case study resource. By following the lives of people living in the fictional London Borough of Bexford, this series of interlinked and extended case studies will allow your students to explore complex situations, much as they might do as practitioners in their working lives, and consider what ideas about Human Growth and Development might inform their thinking and practice.

Lifespan Development

Provides the most Support for Student Learning and Success Lifespan Development, 7/e by Denise G. Boyd and Helen L. Bee thoroughly and accessibly addresses the most critical concepts of development. Lifespan Development, Third Canadian Edition [by] Boyd, Bee, Johnson

This reader, organized chronologically, is composed of articles from scientific journals that introduce the reader to contemporary research in the field of lifespan development. Readings are arranged by chronological age periods to correspond with most lifespan development reference books, and will provide readers with a deeper understanding of developmental psychology and familiarize them with contemporary research in the field. MARKET: students of psychology, education, human development or family studies with an interest in development, or anyone else with an interest in the subject.

Where Great Teaching Begins

This thorough revision of the highly successful first edition of Life-Span Development offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in

the fields of health management, education and social work.

The World of Psychology

This edition of 'Lifespan Development' continues to offer an up-to-date research base, a strong pedagogical programme & attention to successful ageing & cultural & gender issues. Each chapter has been thoroughly reviewed by expert consultants.
