Originally entitled the "PostScript and Acrobat Bible" in German, this handbook achieves the seemingly impossible: it covers this tricky and technical field in an entertaining manner without getting bogged down in PostScript programming. It explains how several components work together and how to deal with real-world application and operating-system problems. The author genuinely wants to assist in overcoming cross-platform barriers using MS-DOS, Windows, Macintosh or UNIX and, accordingly, neither the book nor the tools are limited to one particular platform or operating system. The 9 chapters and 3 appendixes run the entire gamut, from the very basics right up to Ghostscript and the whole is creatively designed, making use of comical illustrations. In short, essential reading for all technically minded users of PostScript and Acrobat/PDF - from PC owners wanting to get the most out of their laser printers to graphic artists with Macs to system administrators and online publishers.

Contemporary Strategy Analysis and Cases

NEW! Combined Text & Cases Version Considered by many to be the best textbook on Strategy, Contemporary Strategy Analysis 7th edition builds on the strengths of previous editions by introducing students to the core concepts and principles of

strategy. In this most accessible strategy text, Robert M. Grant combines clarity of exposition with concentration on the fundamentals of value creation and an emphasis on practicality. In this seventh edition, a greater focus on strategy implementation reflects the needs of firms to reconcile scale economies with entrepreneurial flexibility, innovation with cost efficiency, and globalization with local responsiveness. Rob Grant eloquently combines theory with current real world examples and practice using a clearly written, logical and comprehensive style. Contemporary Strategy Analysis 7th edition is suitable for both MBA and advanced undergraduate students. Full teachings notes to the cases will be available upon publication at the companion website www.contemporarystrategyanalysis.com Contemporary Strategy Analysis 7th Edition is also available in a text only version - ISBN: 9780470747100

This book explores ways in which libraries can reach new levels of service, quality, and efficiency while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director, awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each. By supporting each other's acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.

Business Model Generation is a handbook for visionaries, game changers, and challengers striving to defy outmoded business models and design tomorrow's enterprises. If your organization needs to adapt to harsh new realities, but you don't yet have a strategy that will get you out in front of your competitors, you need Business Model Generation. Co-created by 470 "Business Model Canvas" practitioners from 45 countries, the book features a beautiful, highly visual, 4-color design that takes powerful strategic ideas and tools, and makes them easy to implement in your organization. It explains the most common Business Model patterns, based on concepts from leading business thinkers, and helps you reinterpret them for your own context. You will learn how to systematically understand, design, and implement a game-changing business model--or analyze and renovate an old one. Along the way, you'll understand at a much deeper level your customers, distribution channels, partners, revenue streams, costs, and your core value proposition. Business Model Generation features practical innovation

techniques used today by leading consultants and companies worldwide, including 3M, Ericsson, Capgemini, Deloitte, and others. Designed for doers, it is for those ready to abandon outmoded thinking and embrace new models of value creation: for executives, consultants, entrepreneurs, and leaders of all organizations. If you're ready to change the rules, you belong to "the business model generation!"

Excerpts from the book: ..".It may be well for us to take a general view of the subject of Yoga. What is the end and aim of the teachings and the practices? What does it all mean? What is Man seeking for in all these endeavors? What does life, and growth, and development, and evolution mean? These are questions that thinking people are constantly asking, and which but few are able to answer even partially. The Yogi Philosophy teaches that the end of all human endeavor and life is to allow the soul to unfold until it reach with Spirit. And as Spirit is the divine part of man- the bit of God-material in him - this union eventually will result in what is known as Union with God - that is the bringing of the individual soul into conscious touch and union with the centre of all life."

Lenin's Last Struggle

DescriptionThree years ago a handful of people with mental health problems took part in a creative writing course facilitated by poet Elspeth Murray. They, and other people supported by the national mental health provider Advance Support, have since produced an outpouring of creative writing to express their hopes, moods, fears and fantasies about recovering from their condition - which we have gathered together for the first time in this anthology. Feeling good, feeling down, feeling contempt for professionals - all user and survivor states are captured here. About the AuthorAdvance is a national charitable organisation. We provide places for people with learning disabilities or mental health problems to live. We also provide support for them to live their lives the way they want, and advice for people seeking work or returning to work. Advance began as a not-for-profit organisation in 1974, working with a local Health Authority in Leicestershire to identify accommodation for patients as part of a large-scale discharge from a local hospital. Today Advance supports, houses and advises more than 3000 people in 33 counties across Central and Southern England.

Counterfeit Deterrent Features for the Next-Generation Currency Design

The first plain-paper office copier -- which was introduced in 1960 and has been called the most successful product ever marketed in America -- is unusual among major high-technology inventions in that its central process was conceived by a single person. David Owen's fascinating narrative tells the story of the machine nobody thought we needed but now we can't live without. Chester Carlson grew up in unspeakable poverty, worked his way through junior college and the California Institute of Technology, and made his discovery in solitude in the depths of the Great Depression. He offered his big idea to two dozen major corporations -- among them IBM, RCA, and General Electric -- all of which turned him down. So persistent was this failure of capitalist vision that by the time the Xerox 914 was

manufactured by an obscure photographic-supply company in Rochester, New York, Carlson's original patent had expired. Xerography was so unusual and nonintuitive that it conceivably could have been overlooked entirely. Scientists who visited the drafty warehouses where the first machines were built sometimes doubted that Carlson's invention was even theoretically feasible. Drawing on interviews, Xerox company archives, and the private papers of the Carlson family, David Owen has woven together a fascinating and instructive story about persistence, courage, and technological innovation -- a story that has never before been fully told.

One of the great political strategists of his era, V. I. Lenin continues to attract historical interest, yet his complex personality eludes full understanding. This new edition of Moshe Lewin's classic political biography, including an afterword by the author, suggests new approaches for studying the Marxist visionary and founder of the Soviet state. Lenin's Last Struggle offers invaluable insights into the rise of the Bolshevik party and the Soviet Union, a saga complicated by complex strategic battles among the leaders of Lenin's generation: leaders whose names are universally known, but whose personalities and motivations are even now not sufficiently understood. Moshe Lewin was a collective farm worker in the USSR and a soldier in the Soviet army. He later became director of studies at the Ecole Pratique des Hautes Etudes in Paris, a fellow of the Kennan Institute, a senior fellow of Columbia University's Russian Institute, and is now emeritus professor of history at The University of Pennsylvania.

Traditionally, counterfeit deterrent features restricted counterfeiting to only the dedicated craftsman. With the advent of highly sophisticated reprographic systems, this is no longer true. Redesign of U.S. banknotes is necessary in order to incorporate additional features aimed at discouraging counterfeiting using advanced copiers-scanners-printers. This volume evaluates a large number of such features while recommending a comprehensive national strategy for anticipating and responding to counterfeiting threats.
