A Study of the Association of Capital Budgeting Techniques with Firm Performance and Firm Characteristics

THE CAPITAL BUDGETING DECISION: Economic Analysis and Financing of Investment Projects; SECOND EDITION

Capital Budgeting and Company Finance

An essential guide to valuation techniques and financial analysis With the collapse of the economy and financial systems, many institutions are reevaluating what they are willing to spend money on. Project valuation is key to both cost effectiveness and shareholder value. The purpose of this book is to provide a comprehensive examination of

critical capital budgeting topics. Coverage extends from discussing basic concepts, principles, and techniques to their application to increasingly complex, real-world situations. Throughout, the book emphasizes how financially sound capital budgeting facilitates the process of value creation and discusses why various theories make sense and how firms can use them to solve problems and create wealth. Offers a strategic focus on the application of various techniques and approaches related to a firm's overall strategy. Provides coverage of international topics based on the premise that managers should view business from a global perspective. Emphasizes the importance of using real options. Comprised of contributed chapters from both experienced professionals and academics, Capital Budgeting Valuation offers a variety of perspectives and a rich interplay of ideas related to this important financial discipline.

Health Care Budgeting and Financial Management for Non-financial Managers

Completely revised to meet the latest Board of Nurse Examiners criteria for the NCLEX-RN®, this review book contains over 3,500 questions and answers with rationales covering all areas included on the exam. Two substantially updated introductory chapters discuss studying and test-taking strategies and describe the exam format in detail. Subsequent sections cover adult care, psychiatric care, maternal-neonatal care, and care of the child, plus chapters on leadership and management and law and ethics. Six 75-question comprehensive tests appear at the end of the book. This Third Edition also includes nearly 100 new alternate-format questions.

Capital Budgeting in the Forest Products Industry

Capital Budgeting: Current Practices and Their Efficiency

Capital Budgeting for the 1990's

The basic premise of this book is that health care non-financial managers need to understand enough about financial management to be successful in their day-to-day activities while not being smothered with details. Ward provides managers with a basic level of financial management principles, including understanding financial statements and ratios, preparing an operating budget, and using financial analysis to help with decision making. Written in plain English, the text is interspersed with illustrative cases and examples gleaned from more than twenty years of experience in both operational and financial areas and in both staff and management capacities. The text is sophisticated enough to be used by graduate students and practitioners as well as undergraduate programs in health services administration. It is also suited for independent study by

professionals seeking to enhance their professional development. Lastly, it is useful as a day-to-day reference for managers in all fields in health care.

How to Budget Training

This book explains the financial appraisal of capital budgeting projects. The coverage extends from the development of basic concepts, principles and techniques to the application of them in increasingly complex and real-world situations. Identification and estimation (including forecasting) of cash flows, project appraisal formulae, and the application of net present value (NPV), internal rate of return (IRR) and other project evaluation criteria are illustrated with a variety of calculation examples. Risk analysis is extensively covered by the use of risk adjusted discount rate, certainty equivalent, sensitivity, simulation and Monte Carlo analysis. The NPV and IRR models are further applied to forestry, property and international investments. Resource constraints are introduced to the capital budgeting decisions with a variety of worked examples using linear programming technique. All calculations are extensively supported by Excel workbooks on the Web, and each chapter is well reviewed by end of chapter questions.
