Tallinn Manual 2.0 expands on the highly influential first edition by extending its coverage of the international law governing cyber operations to peacetime legal regimes. The product of a three-year follow-on project by a new group of twenty renowned international law experts, it addresses such topics as sovereignty, state responsibility, human rights, and the law of air, space, and the sea. Tallinn Manual 2.0 identifies 154 'black letter' rules governing cyber operations and provides extensive commentary on each rule. Although Tallinn Manual 2.0 represents the views of the experts in their personal capacity, the project benefitted from the unofficial input of many states and over fifty peer reviewers.

This manual is based on current neuroscience and treatment outcome studies that demonstrate the importance of focusing on the full range and depth of emotional and social functioning. Beginning with a classification of the spectrum of personality patterns and disorders found in individuals and then describing a profile of mental functioning that permits a clinician to look in detail at each of the patient's capacities, the entries include a description of the patient's

symptoms with a focus on the patient's internal experiences as well as surface behaviors. Intended to expand on the DSM (Diagnostic and Statistical Manual of Mental Disorders) and ICD (International Statistical Classification of Diseases and Related Health Problems) efforts in cataloging the symptoms and behaviors of mental health patients, this manual opens the door to a fuller understanding of the functioning of the mind, brain, and their development.

This manual is written as a guide through the most important legal procedures that control imports. It is likely to be of most use to practitioners who are not yet experts in the field, corporate counsel in both domestic and foreign companies whose products are sold across national borders, and students learning about these complicated regulatory laws. Each chapter is written by experienced counsel in Washington, D.C.--some of whom have inside experience from working in the government agencies that administer the laws they are writing about. The authors have incorporated practical advice--"Practice Comments"--in their description of how these laws work.
