Beginning SharePoint 2010 Administration

The seventh edition of Research Methods and Statistics in Psychology provides students with the most readable and comprehensive survey of research methods, statistical concepts and procedures in psychology today. Assuming no prior knowledge, this bestselling text takes you through every stage of your research project giving advice on planning and conducting studies, analysing data and writing up reports. The book provides clear coverage of experimental, interviewing and observational methods, psychological testing, qualitative methods and analysis and statistical procedures which include nominal level tests, multi-factorial ANOVA designs, multiple regression, log linear analysis, and factor analysis. It

features detailed and illustrated SPSS instructions for all these and other procedures, eliminating the need for an extra SPSS textbook. New features to this edition include: Additional coverage of factor analysis and online and modern research methods Expanded coverage of report writing guidelines References updated throughout Presentation updated throughout, to include more figures, tables and full colour to help break up the text Companion website signposted throughout the book to improve student usability Improved and extended web links and further reading associated with every chapter. Each chapter contains a glossary, key terms and newly integrated exercises, ensuring that key concepts are understood. A fully updated companion website (www.routledge.com/cw/coolican) provides additional exercises, testbanks for each chapter, revision flash cards, links to further reading and data for use with SPSS.

McGraw-Hill Mathematics

As in previous editions, the focus in PREALGEBRA & INTRODUCTORY ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Third Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections http://gocengage.com/infotrac. Sentence Skills: A Workbook for Writers, Form B

Complete coverage on the latest advances in SharePoint 2010 administration SharePoint 2010 comprises an abundance of new features, and this book shows you how to take advantage of all SharePoint 2010's many improvements. Written by a four-time SharePoint MVP, Beginning SharePoint 2010 Administration begins with a comparison of SharePoint 2010 compared to the previous version and then examines the differences between SharePoint Foundation (SPF) and SharePoint Server (SPS). This book is written for several audiences. One audience is consultants and IT professionals who need to understand how to plan, implement, and configure SharePoint. Another audience is administrators and the support team that must know how to manage SharePoint, both the more advanced administration of service applications and site collections, as well as managing sites and workspaces. A third audience is the reader who wants to understand how SharePoint works and what to expect from it; this is typically IT managers and project leaders. This book assumes no previous knowledge of SharePoint, but if you do have experience with SharePoint you will learn how SharePoint 2010 differs from previous releases. If you intend to read and try all the exercises in this book, you will need some basic understanding of network applications such as Windows Servers, Microsoft SQL Server, Active Directory, DNS and IIS, as well as experience with Microsoft Office. If you don't intend to install SharePoint yourself, then it is not necessary to have that network understanding. What This Book Covers This book consists of 10 chapters and 4 appendixes. If you want to learn how to install and configure SharePoint Foundation, you should start reading Appendixes A and B. If you will install SharePoint Server 2010, you should still quickly read Appendixes A and B, since they cover the basic functionality also valid for SharePoint Server; then you should continue reading carefully Appendixes C and D. All these

appendixes are very technical and detailed, but you need to understand all this in order to install a SharePoint 2010 environment that follows Microsoft's Best Practice to match the requirements of your organization. If you don't plan to install SharePoint yourself, then you can start reading Chapter 1 and all the other chapters. If some of them are less interesting to you, you should still read them quickly to get an understanding of what they cover. Later you might need that information, and then it will be valuable to know where to find it. The main part of this book is divided into 10 chapters. Some of these chapters focus more on SharePoint Foundation (SPF), some on SharePoint Server (SPS): Chapter 1, "Introduction to Microsoft SharePoint 2010": This chapter gives you an overview of SharePoint and most of its important features. If you want to understand what SharePoint 2010 can do for you, then read this chapter. Chapter 2, "Building SPF Sites": This chapter focuses on the fundamental features of SharePoint 2010; if you plan to build an SPF-based solution, read this. If you plan to build an SPS solution, this chapter covers the basic functionality you also need to know. Chapter 3, "Office Integration": This chapter describes how SharePoint 2010 integrates with MS Office. If you are interested in document management features in SharePoint, then you should read this chapter. Chapter 4, "Content Management in SharePoint 2010": This chapter focus on managing content, especially web content management using wiki pages, but also social computing features, integration with offline solutions like MS Outlook and SharePoint Workspace, and managing multilanguage sites. Chapter 5, "Managing My Sites": This chapter focus on features only available in SPS, not SPF. It describes how to manage and and take advantage of the user's personal My Site, both for personal use and for collaboration and information sharing. Chapter 6, "SharePoint Administration": This chapter is a deep dive into many important features in SharePoint, such as permissions, templates, search and indexing, and how to manage SharePoint 2010 with PowerShell and STSADM. Readers only interested in SPF should read the parts that covers SPF features, while the SPS administrator and IT pro should read the complete chapter. Chapter 7, "Building Intranets and Internet Portals": This chapter focuses on features related to intranets and public-facing Internet sites. It explains what features will be of interest and how to use them. You will get a number of tips in this chapter, such as how to display Twitter content on a SharePoint site. Chapter 8, "Customizing SharePoint 2010": This chapter explains how to customize both SPF and SPS sites. You will learn how to use SharePoint Designer 2010 as well as how to customize web parts, including Silverlight-based media web parts. Chapter 9, "Using SharePoint Designer 2010": This chapter focus on what you can do with the free tool SharePoint Designer 2010. If you need to know how to configure and design web pages in SharePoint, this chapter is for you. Chapter 10, "Backup and Restore": This chapter describes how to backup and then restore documents, lists, sites, site collections, and complete SharePoint farms, using SharePoint Central Administration, PowerShell, and STSADM. If you are a SharePoint administrator, you should read this chapter. Appendix A, "Installing SharePoint Foundation 2010": This appendix describes how to plan and implement SharePoint Foundation 2010. It also covers how to upgrade from WSS 3.0. Appendix B, "Configuring SharePoint Foundation 2010": This appendix describes how to configure and manage a newly installed SPF environment. It covers many important and general concepts in SharePoint that are also valid for SPS, so both SPF and SPS administrators and IT professionals should read this appendix. Appendix C, "Installing SharePoint Server 2010": This appendix describes how to

plan and implement SharePoint Server 2010, including how to upgrade and migrate from MOSS 2007. Appendix D, "Configuring SharePoint Server 2010": This appendix describes how to configure and manage a newly created SPS 2010 environment. Before you read this appendix you should read Appendix B.

Showcasing a discussion of the experimental process and a review of basic statistics, this volume provides methodologies to identify general data distribution, skewness, and outliers. It features a unique classification of the nonparametric analogs of their parametric counterparts according to the strength of the collected data. Applied Statistical Designs for the Researcher discusses three varieties of the Student t test, including a comparison of two different groups with different variances; two groups with the same variance; and a matched, paired group. It introduces the analysis of variance and Latin Square designs and presents screening approaches to comparing two factors and their interactions.

An Investigation to Determine the Extent to which the Effect of the Study of Latin Upon a Knowledge of English Derivatives Can be Increased by Conscious Adaptation of Content and Method to the Attainment of this Objective

Written to support and enhance assessment alongside the pupil texts, these resources offer a range of material for the AQA specification. They provide test questions for each chapter together with detailed mark schemes to make assessment easy. Two versions of each question are provided, one allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organised by unit/chapter is also included in this resource.
