Corporate e-learning has become increasingly important in the contemporary universal-access business world, and can provide strategic and competitive advantages to corporations as a way to accelerate training and reduce the high costs of face-to-face learning programs. However, most of the books that are written about e-learning do not describe in detail how corporate e-learning is actually implemented within a specific company. Corporate E-Learning fills that gap by describing in depth how e-learning programs are developed and instituted, and how their effectiveness is measured, from the perspective of practicing e-learning professionals at IBM, an early and liberal user of e-learning technologies to train their global workforce. Drawing on a wealth of in-person interviews of numerous e-learning professionals at IBM, as well as recent e-learning literature, Tai discusses how IBM has significantly contributed to the evolution of corporate e-learning. In the course of doing so, he makes useful comparisons with other companies and industries, and draws conclusions that are applicable to any company considering utilizing e-learning. Companies should be careful, concludes Tai, to use e-learning only when it makes strategic and economic sense, not simply because the technology is available. In addition, e-learning should always be used along with other more traditional means of learning, and carefully monitored by feedback mechanisms to measure whether its objectives have been accomplished, and how e-learning programs might improve in the future. Corporate E-Learning is designed for classroom use in technology management courses, and will also appeal to corporate professionals who are involved in training, human resources development, and performance improvement.

Freight Forwarding and Multimodal Transport Contracts, 2nd Edition, is a comprehensive guide to the law in relation to contract forms and terms created by operators, trade associations or international bodies such as the UN and used as a basis for trading conditions by freight forwarders, logistics suppliers, combined or multimodal transport operators and container operators. This second edition examines the latest editions of contract forms and terms, both where their object is the supply or procurement of multimodal carriage, as well as where they are directed to the use of combined transport equipment (ie containers, swap bodies). Of particular prominence will be a detailed examination of the latest versions of conditions used by the principal UK forwarding, logistics, intermodal and container operators such as the British International Freight Association (BIFA) conditions 2005A and the current Freightliner Conditions as well as updates on many of the conditions in use and legal developments relevant to them, eg Road Haulage Association Conditions 2009, Maersk Conditions of Carriage, TT Club Conditions.

Corporate E-Learning

Piasecki's book reminds me that the difference between a forgettable and a memorable business book is one thing: a hidden and enduring idea suddenly made tangible. In Thomas Friedman's World is Flat, we saw globalization come alive. In Freakonomics, we saw the perverse hidden results of out-of-whack incentives. In Tipping Point, we saw market hysteria laid bare. In World Inc., we see that demonstrating measurable impact of responsible corporate practices is the secret to moving corporate responsibility from mere "defensive" activities such as compliance and governance to "offensive" strategies that help companies raise capital, sell product and recruit talent. Because we can now see corporate responsibility's positive impact in the results of HP, GE, Toyota and others, and we can make money if we follow the guidance of corporate responsibility-aware ratings services such Innovest, IRRC/ISS, Calvert and S&P, corporate

responsibility is suddenly tangible.

The lending industry is comprised of a wide variety of sectors, such as banking, credit cards, mortgages, leasing and consumer finance. Many of these sectors have interconnections and synergies. In addition, a large number of related services and technologies have a major influence on the lending and credit business. These services include e-commerce, credit risk analysis, call centers and information technologies. Rapid changes have taken place in lending in recent years. For example, large amounts of business and consumer debt are now syndicated or securitized. Meanwhile, non-bank firms, such as GE, have become immense competitors in the lending arena, and international acquisitions are shaping up the globalized banking industry of the near future. This carefully-researched book (which includes a database of leading companies on CD-ROM) is a banking, credit and mortgages market research and business intelligence tool-- everything you need to know about the business of banking, credit cards, mortgages and lending, including: Money center banks; Regional banks; Savings associations; Globalization of the banking and lending industries, including our profiles of 331 of the world's leading international banking firms; Mortgage banking and brokerage; Home equity loans; Credit cards; Lending and other services provided by non-bank enterprises; Significant trends in banking and lending technologies; Risk analysis, payment processing, call centers and other support services; Online banking trends; ATM trends and technologies; Banking industry software.

Who Owns Whom

Corporate Yellow Book

Freight Forwarding and Multi Modal Transport Contracts

This book deals with the process of taking a company public, from forming the initial public offering to beginning operations. Entrepreneurs who are pressed for time often find this process difficult due to its many steps. Most books on this subject fail to offer first-hand, practical advice on taking a company public, whereas this book is intended to provide definitive guidance. Taking a company public is every entrepreneur's dream, and it also offers major financial rewards, prestige and glamour. It is also a complex process that often intimidates entrepreneurs, and requires specialists in many disciplines such as accountants, attorneys, consultants and public relations executives. These professionals may possess a thorough knowledge of their area of expertise, but they rarely have a total grasp of the entire process of taking a company public. This book fulfills the need of the Chief Executive Officer and the IPO team to obtain a more complete understanding of this complex subject.
