Conservative Americans are now having a difficult time defining what their ideology is. The Republican Party is in the midst of an inner struggle to understand itself and communicate their message to the American electorate. Republicans ask themselves questions about how to get elected, what policies and programs to adopt in order to appeal to segments of the electorate lost to them. They seem willing to advocate any movement or plans that might bolster "electability." American conservatives are engaged in both a psychological as well as a practical struggle to redefine themselves. In response to these crises, conservatism has increasingly become movement oriented and less authentically conservative. Republicans now are either more progressive or more reactionary than they are conservative, as they

Despite the vigorous study of modern American fiction, today's readers are only familiar with a partial shelf of a vast library. Gordon Hutner describes the distorted, canonized history of the twentieth-century American novel as a record of modern classics insufficiently appreciated in their day but recuperated by scholars in order to shape the grand tradition of Hemingway, Fitzgerald, and Faulkner. literary history this way, Hutner argues, scholars have forgotten a rich treasury of realist novels that recount the story of the American middle-class's confrontation with modernity. Reading these novels now offers an extraordinary opportunity to witness debates about what kind of nation America would become and what place its newly dominant middle class would have--and, Hutner suggests, should also lead us to wonder how our own contemporary novels will be remembered.

This book traces the role of the New Ethnicity in the politics and culture of 1970s United States, and in particular the rise of the New Right. This upsurge in white ethnic consciousness began as a way to express discontent with American society and improve the lives of the working poor, but its alienating rhetoric advanced a conservative agenda.

What America Read

Amid the battle for American independence and the struggle to invent a federal government, American Revolutionary leaders and intellectuals sought also to create an American culture that would unify a territory of immense regional, ethnic, and religious diversity. In a sophisticated, yet accessible, interpretive narrative, Eve Kornfeld examines the efforts of Noah Webster, Benjamin Rush, George Washington, Judith Sargent Murray, David Ramsay, Mercy Otis Warren, and others to invent a national literature, narrate a story of nationhood, and educate a diverse people for virtuous republican citizenship. Among the 31 documents following the narrative are early attempts at American epic poetry, excerpts from the first narrative histories of the United States, and commentaries on the place of women and Indians in national life. Headnotes to the documents, reproductions of early paintings and portraits, a chronology, questions for consideration, a bibliography, and an index are also included.
