The text material has been restructured to provide a more balanced and exhaustive coverage of the subject. The text discusses the core concepts of technical communication and explains them with the help of numerous examples and practice exercises. The book also provides support for soft skills laboratory sessions through a companion CD. With its in-depth coverage and practical orientation, the book is useful not only for students, but also as a reference material for corporate training programmes.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

Western Australian Year Book

To make informed choices, you need information. This book will open up the world of early childhood education and give you that knowledge. Everything is under the microscope for you to ponder. Join me as I try to inform, challenge, question and make suggestions based on thirty years' experience. Let me take you through the options, and learn about the importance of physical space in creating healthy, happy children. Learn as I have done about the logistics of providing Quality care. Ask as I have asked 'where to from here'. David Smith Dip.ECENZ
