## The Artful Parent

From the Middle Ages to the present, master draftsmen have used the technique of metalpoint to create some of the most beautiful and technically accomplished drawings in the history of art. Drawing in Silver and Gold examines the history of this evocative medium, in which a metal stylus is used on a specially prepared surface to create lines of astonishing delicacy. This beautifully illustrated book examines the practice of metalpoint over six centuries, in the work of artists ranging from Leonardo, Dürer, and Rembrandt to Otto Dix and Jasper Johns. A team of authors—curators, conservators, scientists—address variations in technique across time and between different schools, incorporating new scientific analysis, revealing patterns of use, and providing a rare demonstration of the medium's range and versatility. They reappraise famous metalpoints of the Renaissance and shed new light on infrequently studied periods, such as the seventeenth century and the Victorian silverpoint revival. A new examination of an exquisite but not thoroughly understood medium, Drawing in Silver and Gold offers fresh interpretations of a practice central to the history of drawing and will serve as the most authoritative reference on metalpoints for years to come. Exhibition schedule: National Gallery of Art - <http://www.nga.gov/content/ngaweb/exhibitions/2015/leonardo-to-jasper-johns.html>, May 3–July 26, 2015 The British Museum,

Drawing on toned paper is a fun way to step outside the box and try something different. You can expand your drawing skills by drawing on grey paper because it will help you to discover opportunities and ideas that wouldn't otherwise be possible if you only drew on white paper. Drawing white objects or animals on white paper is especially tricky as they would look far less noticeable. To make

such a drawing more prominent, we would have to color the background, and this is quite difficult and tedious, which may discourage you from drawing. In this book, you will learn to draw from both reference photos and imagination so that you can learn to see things through the artist's eyes, enrich your creative mind, and get inspired. It will help you to see and understand art from a different point of view and to enjoy the endless opportunities that working on toned paper offers. Reasons to Draw on Toned Paper:

- You can start with white, which is pretty interesting.
- You only have to add black and white shades, and the paper does the rest of the job.
- Your work will seem more complete and won't look pale because lighter hues appear quite darker on a grey surface, and they won't “disappear” like on white paper.
- Your highlights will appear much more spectacular and three-dimensional.
- Drawings on toned paper look more realistic and lifelike.
- You can use the tone of the paper as your mid-tone, which is particularly helpful if you struggle with creating mid-tones on white paper.
- Working on grey paper will help you to see and evaluate tonal values more easily.
- The experience and skills gained by working with toned paper is something that you can apply to your white paper in the future. Working on grey paper will boost your creativity.
