Straight Talk on Parenting

The Good News About Bad Behavior

A witty, straight-shooting parenting book to help parents build a solid relationship with their kids, improve children's behavior and decision-making, and prepare kids to steer their own futures while laughing a little along the way."

Address Book

There's a new set of 3Rs for our kids-respect, responsibility, and resilience-to better prepare them for life in the real world. Once developed, these skills let kids take charge, and let parents step back, to the benefit of all. Casting hover mothers and helicopter parents aside, Vicki Hoefle encourages a different, counter-intuitive-yet much more effective-approach: for parents to sit on their hands, stay on the sidelines, even if duct tape is required, so that the kids step up. Duct Tape Parenting gives parents a new perspective on what it means to be effective, engaged parents and to enable kids to develop confidence through solving their own problems. This is not a book about the parenting strategy of the day-what the author calls "Post-It Note Parenting"-but rather a relationship-based guide to span all ages and stages of development. Witty, straight-shooting Hoefle addresses frustrated parents everywhere who are ready to raise confident, capable children to go out in the world.

Love at First Hike

"The best submarine novel since Tom Clancy's *The Hunt for Red October*." —Booklist (starred review) The USS Kentucky—a Trident ballistic missile submarine carrying a full complement of 192 nuclear warheads—is about to go on a routine patrol. Not long after it reaches the open sea, however, the Kentucky receives a launch order. After receiving that launch order, it is cut off from all counter-orders and disappears into the Pacific while it makes the eight-day transit to the launch site. What the Kentucky's crew doesn't know is that those launch orders haven't actually come from the U.S. government. Rogue elements within the Mossad have learned that Iran has developed its first nuclear weapon and, in ten days, will detonate it—and the target is Israel. The suspected weapon complex is too far underground for conventional weapons to harm it, and the only choice is a pre-emptive nuclear strike. With limited time, this rogue group initiates a long-planned operation called the Trident Deception. They'll transmit false orders and use a U.S. nuclear submarine to launch the attack. In this thriller from Rick Campbell, with only 8 days before the Kentucky is in launch range and with the submarine cut off from any outside communication, one senior officer, the father of one of the officers aboard the submarine, must assemble and lead a team of attack submarines to find, intercept and neutralize the Kentucky before it can unknowingly unleash a devastating nuclear attack.

Bridging the Gap Between You and Your Folks

We've all been there. To do lists. Appointments. Family schedules. The dog's schedule. In our fast-track culture, we often find ourselves reaching for spiritual duct tape to hold us together and wonder why we feel so distant from God and struggling, not just to find a matching pair of socks, but to find direction and meaning in our fractured lives. Part devotion, part Bible study and part personal story/reflection, *Divine Duct Tape* is about imperfect Christians connecting with our perfect Abba, hearing His voice to personally direct our lives each day, and transforming us in the process. Through relevant insights into 2-3 verses of Luke's gospel each day, your response to a daily question, and those chronicled by a middle-aged wife and mother of three, you will find that whether we laugh at ourselves or cry over our struggles, we are not alone. The Cloud Diary

The bombshell is dropped, the news incredible. It could mean so much for so many. People think their prayers have been answered. Scientists promise this advancement will only be used for good. Can they really guarantee that? The time period is what is referred to as 'end times' when fearful news is the rule of the day. Good news is scarce and so people hold onto this promise of 'help' like a life preserver since that may be what it will be to them. Meanwhile a certain element of criminals is exploding and no one knows what to do with them. Every day the newspaper reveals new horrors. Victims rise along with the perpetrators. It is obvious the battle between good and evil is heating up. It is no longer popular to believe, to have faith or profess your Christianity. It is a time when all that matters to most is what they want for themselves. Selfishness is running rampant and cold hearts and lack of love and conscience are evident. One solution found is going to pull most down to the level of those doing this evil. As has been said all evil needs to succeed is for good men to do nothing.

Parents who know how to be "sports agents" for their children give you the inside scoop on the DIY approach to attracting college volleyball recruiters. Sports recruiting agencies do a great job but can be expensive. A recruiting agency can charge \$3,000 or more and many families do not have this extra income. Women's College Volleyball Recruiting: A How-to Guide for Parents by Rich Lancellot and Kim Wheeler is an easy-to-use guide that Wheeler's and Lancellot's daughters used to earn a combined \$190,000 in academic and athletic scholarships. Based on their experiences, they coach you on how to attract the attention of prospective coaches and decide which college is the best fit for your child. Their recruiting guide gives you tips on how student athletes can promote themselves, what camera equipment is needed to obtain quality videos to send to prospective coaches, and more. There are also dos and don'ts, such as watching what your children post on social media and what they can and cannot say at a tournament, and easy to use checklists and other forms to aid parents and players in the recruiting process. Volleyball parents and coaches will both benefit from Women's College Volleyball Recruiting. It's your guide to getting your children noticed.

With the razor-sharp satire that earned him rave reviews for *Big Egos* and *Lucky Bastard*, among others, S.G. Browne delivers another irresistible read, about an unlikely band of heroes who use their medical complications to gain fame, confront villains, and bring their own unique brand of justice to New York City. Faster than a spreading rash! More powerful than dry heaves! Able to put villains to sleep with a single yawn! Convulsions. Nausea. Headaches. Sudden weight gain. For the pharmaceutical soldiers on the front lines of medical science—volunteers who test experimental drugs for cash—these common side effects are a small price to pay to defend your right to life, liberty, and the pursuit of antidepressants. Lloyd Prescott, thirty-year-old professional guinea pig and victim of his own inertia, is the first to notice the bizarre, seemingly implausible consequences of years of testing not-quite-legal drugs: his lips go numb, he becomes overwhelmed with exhaustion, and instantly a stranger crumples into a slumbering heap before him. Under cover of night, Lloyd and his guinea pig friends band together to project their debilitating side effects onto petty criminals who prey upon the innocent. When a horrible menace with powers eerily similar to their own threatens the city, only one force can stop this evil: the handful of brave men who routinely undergo clinical trials. “One of America’s best satiric novelists” (Kirkus Reviews), S. G. Browne fills the prescription for a hilarious and biting commentary on our overmedicated society. Citizens, rest assured that tonight, no matter your ailment—*anxiety, depression, super villains*—there’s a pill to save the day.

Our Baby Fernanda, the Story of Fernanda's First Year and Fabulous Firsts, a Keepsake Baby Journal

The current model of parental discipline is as outdated as a rotary phone. Why don't our kids do what we want them to do? Parents often take the blame for misbehavior, but this obscures a broader trend: in our modern, highly connected age, children have less self-control than ever. About half of the current generation of children will develop a mood or behavioral disorder or a substance addiction by age eighteen. Contemporary kids need to learn independence and responsibility, yet our old ideas of punishments and rewards are preventing this from happening. To stem this growing crisis of self-regulation, journalist and parenting expert Katherine Reynolds Lewis articulates what she calls The Apprenticeship Model, a new theory of discipline that centers on learning the art of self-control. Blending new scientific research and powerful individual stories of change, Lewis shows that, if we trust our children to face consequences, they will learn to adapt and moderate their own behavior. She watches as chaotic homes become peaceful, bewildered teachers see progress, and her own family grows and evolves in light of these new ideas. You'll recognize your own family in Lewis's sensitive, realistic stories, and you'll find a path to making everyone in your home more capable, kinder, and happier--including yourself.

Nothing ever affects the formation of an individual's personality and habits more than the teachings of being with one's family. Successful parenting is the greatest gift one can give to one's child, see www.killianphd.com

A+ Parents

Parents these days are under a great deal of pressure to be "perfect." From psychologists to social scientists, journalists to weekend bloggers, everyone has an opinion about the do's and don'ts for raising healthy, well-adjusted--and let's not forget, polite--children in today's fast-paced world. Where does this leave parents? Too often, lacking in confidence, ill equipped, and overwhelmed. Parenting expert Vicki Hoefle makes the bold claim that it's time for parents to get off the perfection path and get back to the real job of parenting: to grow a grown-up. In this no-nonsense parenting guide, Hoefle draws upon twenty-five years of experience with helping parents see the big picture and sidestep what she calls the "detail drama" that too often trumps everyday life with our kids. Parents learn more than just strategies; they learn a methodology that allows them to help their toddlers build a strong foundation for success in adulthood. In her trademark, tell-it-like-it-is style, Hoefle tells parents to trust their intuition and develop an intentional strategy for meeting each child's unique needs. Above all, *The Straight Talk on Parenting* offers the confidence-boosting reminder that parenting is about practice (and a healthy dose of humor), not perfection.

David H. Brantley's first serious challenge came when his doctor told him it would be a miracle if he survived another six months. Crohn's disease was simply taking too heavy a toll on his system. Thirty years later, another doctor told him that

File Type PDF Duct Tape Parenting A Less Is More Approach To Raising Respectful Responsible And Resilient Kids Vicki Hoefle

he'd have to open him up for surgery to determine the severity of his colorectal cancer. Even though it was worse than the doctor imagined, Brantley persevered. In this inspiring account about fighting Crohn's and cancer, Brantley looks back at the big dreams he had growing up, including becoming a successful actor and writer—and celebrates what he actually became best at—beating the odds. Through the Crohn's and cancer, he's kept fighting and learned that living out one's dreams is not nearly as important as dreaming to live. Of course, he's made the journey easier by playing some Broadway tunes in the background. If you're struggling to overcome an obstacle that seems impossible, you'll be inspired to keep fighting by joining Brantley as he looks back at a lifelong struggle and the lessons he's learned in *Duct Tape Won't Stick to a Leaky Ostomy Bag*.
