This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide "Clear and concise in its advice and expansive in its scope, Ask a Manager is the book I wish I'd had in my desk drawer when I was starting out (or even, let's be honest, fifteen years in)."—Sarah Knight, New York Times bestselling author of The Life-Changing Magic of Not Giving a F*ck

The chances of an academic landing a tenure-track job seem only to shrink as student loan and credit card debts grow. What's a frustrated would-be scholar to do? Can he really leave academia? Can a non-academic job really be rewarding—and will anyone want to hire a grad-school refugee? With "So What Are You Going to Do with That?" Susan Basalla and Maggie Debelius—Ph.D.'s themselves—answer all those questions with a resounding "Yes!" A witty, accessible guide full of concrete advice for anyone contemplating the jump from scholarship to the outside world, "So What Are You Going to Do with That?" covers topics ranging from career counseling to interview etiquette to translating skills learned in the academy into terms an employer can understand

101 Best Resumes to Sell Yourself

There is considerably more skill in the IT and security communities than is reflected in the jobs people are able to attain. Most people's limiting factor in their ability to get better jobs is not technical skills or even the soft skills necessary to do well in a new job. It is that getting a job is a completely different skill set and one that most people only practice every few years. *Job Reconnaissance: Using Hacking Skills to Win the Job Hunt Game* explains the job hunting process, why the most commonly followed models fail and how to better approach the search. It covers the entire job hunt process from when to decide to leave your current job, research new possible job opportunities, targeting your new boss, controlling the job interview process and negotiating your new compensation and the departure from your current job. This is not a complete all-in-one job-hunting book. This book assumes that the reader is reasonably competent and has already heard most of the "standard" advice, but is having difficulty putting the advice into practice. The goal is to fill in the gaps of the other books and to help the readers use their technical skills to their advantage in a different context. The emphasis in *Job Reconnaissance* is for

infosec and IT job seekers to leverage the same skills they use in penetration testing and recon toward job-hunting success. These skills include targeting, reconnaissance and profiling combined with a technical look at skills other career search books commonly miss. Covers the entire job hunt process from when to decide to leave your current job to the departure of your current job Suggests how to research new possible job opportunities Shows how to target your new boss, controlling the job interview process and negotiating your new compensation

In the world that is taking shape, Canada's unique success as a diverse society and its reputation as a sympathetic and respected international partner are invaluable assets—at least as valuable as the country's natural resource wealth. Despite the excitement around "data science," "big data," and "analytics," the ambiguity of these terms has led to poor communication between data scientists and organizations seeking their help. In this report, authors Harlan Harris, Sean Murphy, and Marck Vaisman examine their survey of several hundred data science practitioners in mid-2012, when they asked respondents how they viewed their skills, careers, and experiences with prospective employers. The results are striking. Based on the survey data, the authors found that data scientists today can be clustered into four subgroups, each with a different
