A Guide to the Project Management Body of Knowledge (PMBOK(R) Guide-Sixth Edition / Agile Practice Guide Bundle (HINDI)

Ear, Nose and Throat (ENT) surgery has traditionally been a difficult and specialised topic in undergraduate medicine and for junior doctors. Many textbooks are too detailed for undergraduate use, or lack self assessment questions to help those wishing to underpin their learning. This concise and easy-to-read self-assessment guide aims to clarify the topic, and find and fill gaps in understanding. The multiple choice questions (MCQs) contained cover all levels of knowledge and the learning objectives of most of the UK medical school curricula, aiding preparation for end of unit, module and final exams for ENT. This book will be a valuable companion for clinics and teaching sessions and an indispensable revision primer for graduate entry medical curricula. 'An excellent means of preparation for medical undergraduate examinations as gaps in core knowledge are quickly revealed. Further, this text is a good guide for students to identify those subject areas requiring more focused study, especially when time is short.' - From the Foreword by Samir Soma

Triple Your Reading Speed

The second edition of the Handbook of Test Development provides graduate students and professionals with an up-to-date, research-oriented guide to the latest developments in the field. Including thirty-two chapters by well-known scholars and

practitioners, it is divided into five sections, covering the foundations of test development, content definition, item development, test design and form assembly, and the processes of test administration, documentation, and evaluation. Keenly aware of developments in the field since the publication of the first edition, including changes in technology, the evolution of psychometric theory, and the increased demands for effective tests via educational policy, the editors of this edition include new chapters on assessing noncognitive skills, measuring growth and learning progressions, automated item generation and test assembly, and computerized scoring of constructed responses. The volume also includes expanded coverage of performance testing, validity, fairness, and numerous other topics. Edited by Suzanne Lane, Mark R. Raymond, and Thomas M. Haladyna, *The Handbook of Test Development*, 2nd edition, is based on the revised Standards for Educational and Psychological Testing, and is appropriate for graduate courses and seminars that deal with test development and usage, professional testing services and credentialing agencies, state and local boards of education, and academic libraries serving these groups.

'Listen, Leaf,' Pritchard said, 'the hash is neither here nor there. You're in a lot more trouble than possession of a bit of dope. You've got big problems, man big problems.' He looked at me with something akin to sympathy. 'How did you get into such a fix?' I'd been asking myself the same question. Operation Julie in 1977 remains Britain's biggest ever drugs bust. The work of eleven police forces, it resulted in the break-up of one of the largest LSD co-operatives in the world, the arrest of 120 people and, according to reports, the seizure of six million trips' worth of LSD crystal, valued at 100 million. Overnight, the price of a tab went from 1 to 5. This is the first insider account of how it felt to be caught up in - and by - Operation Julie.

ENT MCQs for Medical Students

Balochistan is cliched as the largest province of Pakistan, with the smallest population, and with vast natural resources. This is indeed true. It is also true that with just 1.5 million families, Balochistan-at one job per family-needs just 1.5 million jobs. Yet the province is abjectly under-developed, with virtually absent physical infrastructure and abysmally low social development indicators. Unemployment and poverty even hunger is rampant. Local discontent and anger over the state of affairs has repeatedly boiled over into insurgencies, with one under way currently. A Cry for Justice empirically documents five different aspects of under-development and deprivation in Balochistan: gas pricing, federal development expenditure, federal social protection, federal civil service, and structure of electoral representation. It is the first attempt to detail the facts of systematic economic exploitation, discrimination, and neglect that Balochistan has shouldered and continues to face-minus the fiction of imagined wrongs.
