Cut-up Apologetic

What can parents, and others interested in adolescents, do to facilitate their healthy development? In many decades of work, researchers have continually identified three central dimensions of parenting: support, behavioral control, and psychological control, all of which have been associated consistently with either

positive or negative indicators of adolescent functioning. Notwithstanding its volume, the research has been non specific as to the effects of these dimensions and has otherwise been limited by a predominant concentration on western families. This monograph reported on research that addressed these limitations by testing specific effects of the parenting dimensions and by doing with multiple analytic techniques on data from adolescents in 11 cultures across the world. In al sites, it was found that support was associated with higher adolescent social competence and lower depression; psychological control with higher depression and antisocial behavior; and behavioral control with lower antisocial behavior. Recommendations included considering that these dimensions are the parental contribution to relationship types or socialization conditions that, when achieved, (with parents or other significant person) are responsible for the effects.

This book is the first to systematically describe the key components necessary to ensure successful implementation of Collaborative Problem Solving (CPS) across mental health settings and non-mental health settings that require behavioral management. This resource is designed by the leading experts in CPS and is focused on the clinical and implementation strategies that have proved most successful within various private and institutional agencies. The book begins by defining the approach before delving into the neurobiological components that are key to understanding this concept. Next, the book covers the best practices for implementation and evaluating outcomes, both in the long and short term. The book concludes with a summary of the concept and recommendations for additional resources, making it an excellent concise guide to this cutting edge approach. Collaborative Problem Solving is an excellent resource for psychiatrists, psychologists, social workers, and all medical professionals working to manage troubling behaviors. The text is also valuable for readers interested in public health, education, improved law enforcement strategies, and all stakeholders seeking to implement this approach within their program, organization, and/or system of care.

Trends and Applications in Knowledge Discovery and Data Mining

This book broadens the scope and impact of digital storytelling in higher education. It outlines how to teach, research and build communities in tertiary institutions through the particular form of audio-visual communication known as digital storytelling by developing relationships across professions, workplaces and civil society. The book is framed within the context of 'The Four Scholarships' developed by the Carnegie Foundation for the advancement and redefining of teaching, including the scholarships of discovery, integration, application, and teaching and learning. Across four sections, this volume considers the potential of digital storytelling to improve, enhance and expand teaching, learning, research, and interactions with society. Unclean Jobs for Women and Girls

This is a compelling, eye-opening portrait of two communities in Philadelphia with drastically different economic resources. Over the course of their10-year investigation, the authors of this important new work came to understand that this disparity between affluence and poverty has created a knowledge gap--far more important than mere achievement scores--with serious implications for students' economic prosperity and social mobility. At the heart of this knowledge gap is the limited ability of students from poor communities to develop information capital. This moving book takes you into the communities in question to meet the students and their families, and by doing so provides powerful insights into the role that literacy can play in giving low-income students a fighting chance. Important reading for a wide audience of educators, policymakers, school reformers, and community activists, Giving Our Children a Fighting Chance: Documents how inequalities begin early and are reinforced by geographic concentration. Compares community libraries to see how print is used in each neighborhood and how children develop as young readers. Looks at patterns that create radical differences in experiences and attitudes toward learning prior to entering school. Explores the function of technology as a tool that exacerbates the divide between affluent students and those with limited access to information. Provides a comprehensive analysis of community literacy, documenting the transformation of media habits from books to computers. Concludes with a look inside schools to answer questions about what schools can do to overcome this complex, unequal playing field. Susan B. Neuman is a professor of Educational Studies at the University of Michigan, and has served as the U.S. Assistant Secretary for

Elementary and Secondary Education.Her books include Changing the Odds for Children at Risk. Donna C. Celano is assistant professor of Communication at La Salle University in Philadelphia. "Giving Our Children a Fighting Chance depicts a stark reality: the enormous and growing divide in literacy and reading skill development between children growing up in poverty and children from the middle and upper classes—and the social and economic ramifications. This book should be required reading, not just for those in the education and policy fields, but for anyone who cares about the lives of children and the health of our society." —Kyle Zimmer, President and CEO, First Book "'By walking the streets, riding the buses, and taking the subways,' Celano and Neuman give us a groundbreaking and sobering look at print and education technology resources in two neighborhoods, one wealthy and one poor. The result is a must-read eye-opener for anyone who cares about equal opportunity. The stuff of learning is essential but insufficient. Only with close teacher, parent, and student-to-student coaching can better print and technology resources make a difference." —Eugenia Kemble, Executive Director, Albert Shanker Institute "The authors of this text make you CARE about these communities and children. They provide insights about how we must focus on literacy in order to make a real difference in the lives of students. This is one of the most comprehensive analyses to date of community literacy, documenting the transformation of media habits from books to computers." —Linda B. Gambrell, Distinguished Professor of Education, Clemson University

Laddie: A True Blue Story

Up-and-coming poet Jamie Sharpe presents a finely tuned second collection Cut-up Apologetic, Sharpe's second collection, explores aging in a world where youth is terrible and something we desperately want back. These are poems about failing to leave our mark while marks are left on us - about the collective insatiability of emptying surroundings in an attempt to fill ourselves. At the same time, Cut-up Apologetic is naïve and playful even when examining fear expressed as discrimination or the ways restlessness transitions into an inertia spelling cultural death. Sharpe finds strange new horizons "extend(ing)/only backward, into memory."

Drama and beauty abound on the plains of Africa and in this superb collection of images, Australian photographers Kym and Tonya Illman present an intimate insight into Earth's greatest wilderness. This lavish book is the result of thousands of hours spent on safari in Kenya, Tanzania, Rwanda, Botswana, Zimbabwe and South Africa. The Illmans innovative, and sometimes controversial, approach includes cameras buried at the edges of waterholes, mounted on aerial drones and on remote controlled buggies, with many lost to lions and elephants in the process. They have spent days concealed in photographic hides to capture low level shots and have chartered helicopters to photograph wildlife and vistas not accessible by land. Each photograph is accompanied by the fascinating story behind its capture. In a final section the Illmans discuss the various elements that ensure a successful safari, from both a sightseeing and photographic viewpoint. This splendid collection of photographs is an unforgettable record of Africa in all its untamed beauty and raw emotion. From the brutality of the food chain to playful shots of animals at their most uninhibited, from majestic sunsets to brooding landscapes, there is no greater theater than nature itself. This is Africa On Safari. Contents: Foreword by Anton Crone; 1. Eye to Eye with Nature; 2. Behind the Lens; Acknowledgments.

Nietzsche Briefwechsel

This book provides a set of fresh and compelling interdisciplinary approaches to the enduring phenomenon of the guru in South Asia. Moving across different gurus and kinds of gurus, and between past and present, the chapters call attention to the extraordinary scope and richness of the social lives and roles of South Asian gurus. Prevailing scholarship has rightly considered the guru to be a source of religious and philosophical knowledge and mystical bodily practices. This book goes further and considers the social engagements and entanglements of these spiritual leaders, not just on their own (narrowly denominational) terms, but in terms of their diverse, complex, rapidly evolving engagements with 'society' broadly conceived. The book explores and illuminates the significance of female gurus, gurus from the perspective of Islam, imbrications of guru-ship and slavery in pre-modern India, connections between gurus and power, governance and economic liberalization in modern and contemporary India, vexed questions of sexuality and guru-ship, gurus' charitable endeavours, the cosmopolitanism of gurus in contexts of spiritual tourism, and the mediation of gurus via technologies of electronic communication. Bringing together internationally renowned scholars from religious studies, political science, history, sociology and anthropology, The Guru in South Asia provides exciting and original new insights into South Asian guru-ship.

Caution: Book contains adult content and themes. Reader discretion advised. In the summer of 1909, in the small town of Varner Creek, Texas, twelve year old Solomon Mayfield awoke one morning to find his mother and sister had disappeared. Through a series of cover-ups and denials, some aimed at protecting Sol, others at hiding the worst of secrets, Sol lived the rest of his life in a fog of half-truths and shadowed lies, haunted by ghosts of the dead with whom he suddenly found himself sharing an inexplicable bond with that he could never fully understand. But when Sol passes away as an old man so many years later, the truth is waiting for him, as are the ghosts of his past. Sol finally discovers what

really happened that summer and it is a truth that will change everything he thought he knew about the life he lived and the people he thought he knew. For as Sol is about to find out, even the dead have secrets. Author's Note: 18+ only, please, as some of the subject matter is not suitable at all for younger readers. Also, a few comments noted book starts slow before reving up. The beginning becomes something different by the ending which is how it was written, but fair disclaimer to readers who hate slow starts . . . this one does lay a foundation before it gets going that some may find slower than to their liking. Also, The Ghosts of Varner Creek is more than a ghost story. It could fit into a number of genres . . . historical fiction, southern fiction, mystery, paranormal, and family drama. So for readers seeking a straightforward horror novel, I wouldn't want to disappoint as this isn't really in that category. Otherwise, if you do read, I thank you in advance and hope you enjoy the book.

'The title of journalist is probably very noble, but I lay no real claim to it. I am, I think, a novelist and a musical composer manqué: I make no other pretensions ' Anthony Burgess Despite his modest claims, Anthony Burgess was an enormously prolific journalist. During his life he published two substantial collections of journalism, Urgent Copy (1968) and Homage to Qwert Yuiop (1986); a posthumous collection of occasional essays, One Man's Chorus, was published in 1998. These collections are now out of print, and Burgess's journalism, a key part of his prodigious output, has fallen into neglect. The Ink Trade is a brilliant new selection of his reviews and articles, some savage, some crucial in establishing new writers, new tastes and trends. Between 1959 and his death in 1993 Burgess contributed to newspapers and periodicals around the world: he was provocative, informative, entertaining, extravagant, and always readable. Editor Will Carr presents a wealth of unpublished and uncollected material.

Who This Book Is For This book is for intermediate iOS developers who already know the basics of iOS and Swift development but are interested in learning declarative/reactive programming and take their app and state management to the next level. You'll also find this book interesting if you're interested in SwiftUI - as many of the reactive capabilities keeping your SwiftUI views up-to-date are built on top of Combine. Topics Covered in Combine: Asynchronous Programming with Swift What & Why: Learn what is Combine and reactive programming and the problems they solve, and how you can unify all of your asynchronous piece of work. Operators: Learn how to compose, transform, filter and otherwise manipulate different pieces of asynchronous work using operators. In Practice: You'll gain knowledge on various topics and techniques you'll leverage when writing your own real-life apps, as well as practice these techniques with actual hands-on apps and projects. SwiftUI: You'll learn about how Combine is deeply rooted within SwiftUI and provides it with the ability to reactively update its views based on the state of your app. Advanced Combine: Once you've got a handle on the basics, you'll dive into advanced Combine topics such as Error Handling, Schedulers, and Custom Publishers. By the end of this book, you'll be a pro in building full-fledged applications using Combine's various abilities.

NEW YORK TIMES BESTSELLER It's the dubious distinction of thirty-year-old Willa Jackson to hail from a fine old Southern family of means that met with financial ruin generations ago. The Blue Ridge Madam—built by Willa's great-great-grandfather and once the finest home in Walls of Water, North Carolina—has stood for years as a monument to misfortune and scandal. Willa has lately learned that an old classmate—socialite Paxton Osgood—has restored the house to its former glory, with plans to turn it into a top-flight inn. But when a skeleton is found buried beneath the property's lone peach tree, long-kept secrets come to light, accompanied by a spate of strange occurrences throughout the town. Thrust together in an unlikely friendship, united by a full-blooded mystery, Willa and Paxton must confront the passions and betrayals that once bound their families—and uncover the truths that have transcended time to touch the hearts of the living.
