## **Communities Dominate Brands**

Communities Dominate Brands: Business and marketing challenges for the 21st century is a book about how the new phenomenon of digitally connected communities are emerging as a force to counterbalance the power of the big brands and advertising. The book explores the problems faced by branding, marketing and advertising facing multiple radical changes in this decade. Communities Dominate Brands discusses how disruptive effects of digitalisation and connectedness introduce threats and opportunities. The authors compellingly illustrate how modern consumers are forming communities and peer-groups to pool their power resulting in a dramatic revolution of how businesses interact with their customers. The book provides practical guidance

of how to move from obsolete interruptive advertising to interactive engagement marketing and community based communications, with dozens of real business examples from around the world. Communities Dominate Brands addresses its topic from a marketing (including advertising and branding) perspective and maintains a rigorous focus on business and profit dimensions of the issues involved. The book discusses such recent phenomena as blogging, virtual environments, mobile phone based swarming and massively multiplayer games. The book introduces a new generation of consumers called Generation-C (for Community). The book also discusses such new concepts as the Connected Age, Reachability, the Four C's, Alpha Users, and introduces Communities as an unavoidable new element into the traditional communication model. Combining the digital trends, modern management theories, and emerging new customer behaviour, Communities Dominate Brands arrives to its conclusion, that traditional marketing methods are increasingly ineffective and even becoming counterproductive. The power of the brands and the abuses by marketing have created a vacuum for a counterbalance, and digitally connected communities, the blogosphere, gamers, and especially the always-on connectedness of those on mobile phone networks, are emerging as the counterforce to redress the balance. The power of smart mobs and digitally enlightened communities will react rapidly to marketing excesses as the natural force balancing the power of the brands. The way a business can and must interact with the powerful new communities is through engagement marketing, by enticing the

communities to interact with the brands. *Communities Dominate Brands* covers the major changes taking place in business and industry worldwide from leading digitally connected societies such as Finland, Korea, Japan, Hong Kong, UK and the USA. The authors discuss the business relevance of such community related technologies and phenomena such as blogging, CANs, iPod, MMOGs, MVNOs, PVRs, Ringing Tones, SMS text messaging, swarming, VOD. This is the definitive business book on the impact of new technologies, not explaining how technology works, but showing what businesses need to do to make money in the new digitally converging environment. *Communities Dominate Brands* analyses early successes of engaging communities by global brands such as Adidas, Apple, Audi, BBC, Boeing, Coca Cola, eBay, Ford, Google, Guinness, Hush Puppies, Lonely Planet, MTV, Nokia, Orange, Philips, Red Bull, Sony, Tesco, Tony & Guy, Vodafone, etc. The lessons are amplified with insights from rough punishment by communities suffered by Hutchison/Three networks, Kryptonite locks, Mazda, the Philippines Government, etc. Fully indexed, impeccably researched with documented sources, offering over 50 current business examples and over a dozen case studies, *Communities Dominate Brands* is a hands-on practical business handbook on how to adjust marketing to deal with communities. With tools such as the Four C's and Reachability, the authors provide a competitive head-start to all who want to achieve customer satisfaction and return business in the 21st century.

## **Effective Managerial Leadership**

Originally published to wide acclaim, this lively, cleverly illustrated essay on the use and abuse of

maps teaches us how to evaluate maps critically and promotes a healthy skepticism about these easy-to-manipulate models of reality. Monmonier shows that, despite their immense value, maps lie. In fact, they must. The second edition is updated with the addition of two new chapters, 10 color plates, and a new foreword by renowned geographer H. J. de Blij. One new chapter examines the role of national interest and cultural values in national mapping organizations, including the United States Geological Survey, while the other explores the new breed of multimedia, computer-based maps. To show how maps distort, Monmonier introduces basic principles of mapmaking, gives entertaining examples of the misuse of maps in situations from zoning disputes to census reports, and covers all the typical kinds of distortions from deliberate oversimplifications to the misleading use of color. "Professor Monmonier himself knows how to gain our attention; it is not in fact the lies in maps but their truth, if always approximate and incomplete, that he wants us to admire and use, even to draw for ourselves on the facile screen. His is an artful and funny book, which like any good map, packs plenty in little space."—Scientific American "A useful guide to a subject most people probably take too much for granted. It shows how map makers translate abstract data into eye-catching cartograms, as they are called. It combats cartographic illiteracy. It fights cartophobia. It may even teach you to find your way. For that alone, it seems worthwhile."—Christopher Lehmann-Haupt, *The New York Times* ". . . witty examination of how and why maps lie. [The book] conveys an important message about how statistics of any kind can be manipulated. But it also

communicates much of the challenge, aesthetic appeal, and sheer fun of maps. Even those who hated geography in grammar school might well find a new enthusiasm for the subject after reading Monmonier's lively and surprising book."—Wilson Library Bulletin "A reading of this book will leave you much better defended against cheap atlases, shoddy journalism, unscrupulous advertisers, predatory special-interest groups, and others who may use or abuse maps at your expense."—John Van Pelt, Christian Science Monitor "Monmonier meets his goal admirably. . . . [His] book should be put on every map user's 'must read' list. It is informative and readable . . . a big step forward in helping us to understand how maps can mislead their readers."—Jeffrey S. Murray, Canadian Geographic

Astrology is finally getting personal! From the best-selling author of *The Secret Language of Birthdays* comes a revolution in charting your horoscope based on both the date and time of your birth that makes all other horoscope books irrelevant. With his "Personology" system, Gary Goldschneider has created a unique method which divides each of the twelve signs into five sub-types—such as Aquarius-Pisces Cusp, Pisces I, Pisces II, Pisces III, and Pisces-Aries Cusp—thereby sub-dividing the astrological year into 48 personology periods. The precision this allows is far beyond anything available in any other astrology book and provides a ground-breaking new way for readers to look not only at their own lives, but

their interactions with those around them. The book comes packed with easy-to-follow charts covering the sun, eight different planets, and, unique to this book, the rapid fluctuations of the moon for every year from 1900 through 2025. The result is an unprecedented level of precision, as well as a beautifully illustrated volume destined to become the one and only book horoscope readers will treasure for the next twenty years.

Just in time for the 20th anniversary of Spy's creation comes the definitive anthology, inside story, and scrapbook. Spy: The Funny Years will remind the magazine's million readers why they loved and depended on Spy and bring to a new generation the jewels of its reporting and writing, photography, illustration, design, and world-class mischief-making. It will demonstrate Spy's singular niche in American magazine and cultural history. But it is also intended to be enjoyed on its own: one beautiful volume containing Spy's funniest and most creative work, along with the ultimate insiders account of how it all came to be. All the best is here: Separated at Birth; Naked City; The Fine Print; Logrolling in Our Time; the Blurb-o-Mat; those hysterical (and now ubiquitous)

charts; the inside stories on the New York Times and Hollywood by J.J. Hunsecker and Celia Brady; the covers; investigative features; and the hilarious stories on pretty much everyone who was anyone during the late 80s and early 90s. Not to mention the often grisly but always entertaining regular cast of characters from Spy's pages -- the churlish dwarf billionaires; beaver-faced moguls; bull-whip-wielding uber-agents; knobby-kneed socialites; and, of course, short-fingered vulgarians. During its heyday, from 1986 through 1993, Spy broke important ground in journalism and design, defining smartness for its generation. It was a once-in-a-lifetime creation that shaped the zeitgeist and succeeded (for a while) against all odds. Spy: The Funny Years will be the fun, stylish, hilarious holiday gift of the year.

## **Nightmares and Daydreams**

With modern global communications and transportation and the international nature of politics and commerce, almost every organization requires executives and managers who can deal with people of all cultural backgrounds. This is also true within countries due to the steady flow of people across national borders and the domestic growth of multicultural workforces. Understanding other cultures and developing skills for more effective cross-cultural communication is increasingly more important in the culturally interdependent world of today and tomorrow.

### **Taking Sides**

In *Rhumb Lines and Map Wars*, Mark Monmonier offers an insightful, richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator's legacy. He takes us back to 1569, when Mercator announced a clever method of portraying the earth on a flat surface, creating the first projection to take into account the earth's roundness. As Monmonier shows, mariners benefited most from Mercator's projection, which allowed for easy navigation of the high seas with rhumb lines—clear-cut routes with a constant compass bearing—for true direction. But the projection's popularity among nineteenth-century sailors led to its overuse—often in inappropriate, non-navigational ways—for wall maps, world atlases, and geopolitical propaganda. Because it distorts the proportionate size of countries, the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism. In 1974, German historian Arno Peters proffered his own map, on which countries were

ostensibly drawn in true proportion to one another. In the ensuing "map wars" of the 1970s and 1980s, these dueling projections vied for public support—with varying degrees of success. Widely acclaimed for his accessible, intelligent books on maps and mapping, Monmonier here examines the uses and limitations of one of cartography's most significant innovations. With informed skepticism, he offers insightful interpretations of why well-intentioned clerics and development advocates rallied around the Peters projection, which flagrantly distorted the shape of Third World nations; why journalists covering the controversy ignored alternative world maps and other key issues; and how a few postmodern writers defended the Peters worldview with a self-serving overstatement of the power of maps. *Rhumb Lines and Map Wars* is vintage Monmonier: historically rich, beautifully written, and fully engaged with the issues of our time.

Revelation is often considered one of the most confusing books of the Bible, and consequently it's regularly overlooked or ignored. But no longer. In *Between the Cross and the Throne*, Matthew Emerson walks us through the book of Revelation, unpacking its complex imagery and pointing out major themes. In conversational tone, he reminds us that Christ died, but he has risen. The Lord reigns, but evil persists. We live between Christ's ascension and his final conquest—and that should give us hope.

Police Administration provides a thorough overview of what police supervisors and administrators need to know. The text examines police administration from four distinct perspectives: a systems perspective (the interrelatedness among units and organizations); a traditional, structural perspective (administrative principles, management functions, and the importance of written guidelines); a human behavioral

perspective (the human element in organizations); and a strategic management perspective (communications and information systems, performance evaluation, strategies and tactics, and promising approaches to increasing police agency effectiveness). In addition to detailed coverage of management functions and organizational principles, the book emphasizes diversity principles and developing police agencies as learning organizations. A concluding chapter covers contemporary issues, including community engagement, collaboration, globalization, racial profiling, mass media and social media, cyber-crime, terrorism, and homeland security. The eighth edition includes analysis of timely matters such as technology, the police intelligence function, information sharing, interagency cooperation, and more. Each chapter is enhanced with learning objectives, discussion questions, and feature boxes. Six case studies with discussion questions provide opportunities for the reader to review real-world situations.

### **Googie Redux**

The M113 is the most widely used and versatile armoured vehicle in the world. Fielded in 1960 as a simple 'battlefield taxi', over 80,000 M113s would see service with 50 nations around the world and 55 years later, many thousands are still in use. In addition to its original role of transporting troops across the battlefield, specialized versions perform a multitude of other functions including command and control, fire support, anti-tank and anti-aircraft defence, and

casualty evacuation. This new fully illustrated study examines the service record of the M113 from its initial fielding through to the end of the Vietnam War. It will also describe the many US, South Vietnamese, and Australian variants of the M113 used in the Vietnam War as well as information on tactics, unit tables of organization and equipment, and a selection of engagements in which the M113 played a decisive role.

### **Personology**

Joan Johnson-Freese argues that the race for space weapons and the U.S. quest for exclusive or at least dominant ownership of strategic space assets have alienated the very allies that the United States needs in order to maintain its leading role in space exploration. Taking a balanced look at the issues that have contributed to the decline of America's manned space program, such as lack of political support and funding, Johnson-Freese offers not only a critique but also a plan for enhancing U.S. space security through cooperation rather than competition. She begins with a brief overview of the history of international space development through four eras: before Sputnik, the space race, after Apollo, and globalization. Then she focuses on how policy changes of the mid-1990s have changed the nation, examining why the United States has grown obsessed with the development of space technology not just as a tool for globalization but as a route toward expanding an already dominant arsenal of weapons. Johnson-Freese claims that these policy choices have greatly affected the attitudes and actions of other countries, and in the fight to achieve

security, the United States has instead put itself at greater peril. Johnson-Freese explains complex technical issues in clear, accessible terms and suggests a way forward that is comprehensive rather than partisan. America is not the only country with space ambitions, but it is unique in viewing space as a battlefield and the technological advancements of other nations as a dire threat. Urgent and persuasive, *Space as a Strategic Asset* underscores the danger of allowing our space program to languish and the crucial role of cooperation in protecting the security of our country and the world.

Blackletter, known also as Gothic miniscule, originated in Europe near the end of the 12th century. Transported from Europe to the New World, blackletter was subtly reshaped by indigenous influences. No better is this illustrated than in Mexico. The blackletter that adorns countless small stores, shops and service providers throughout the country has a wholly Mexican twist, catering to the everyday needs of ordinary people, from cobblers to doctors. More than simply a form of signage, Mexican blackletter is a valuable gloss on contemporary Mexican culture. Inspired by her time living and working in Mexico City, Cristina Paoli has investigated how this distinctive letterform exists in Mexico today. Through numerous colorful photographs of signage, tattoos, posters, and car detailing, along with insightful text, *Mexican Blackletter* establishes why

blackletter is so popular in Mexico, and why this popularity reveals a cultural essence. Mexican Blackletter presents the opportunity to engage in this dialogue with the vast and varied hand-letterers working in and around Mexico City. Read their work, study the differences, appreciate the craftsmanship, and come to understand a very real facet of Mexico and Mexicans that transcends typography.
