Now a New York Times bestseller! There is a Threat Lurking Online with the Power to Destroy Your Finances, Steal Your Personal Data, and Endanger Your Life. In *Spam Nation*, investigative journalist and cybersecurity expert Brian Krebs unmasks the criminal masterminds driving some of the biggest spam and hacker operations targeting Americans and their bank accounts. Tracing the rise, fall, and alarming resurrection of the digital mafia behind the two largest spam pharmacies-and countless viruses, phishing, and spyware attacks-he delivers the first definitive narrative of the global spam problem and its threat to consumers everywhere. Blending cutting-edge research, investigative reporting, and firsthand interviews, this terrifying true story reveals how we unwittingly invite these digital thieves into our lives every day. From unassuming computer programmers right next door to digital mobsters like "Cosma"-who unleashed a massive malware attack that has stolen thousands of Americans' logins and passwords-Krebs uncovers the shocking lengths to which these people will go to profit from our data and our wallets. Not only are hundreds of thousands of Americans exposing themselves to fraud and dangerously toxic products from rogue online pharmacies, but even those who never open junk messages are at risk. As

Krebs notes, spammers can-and do-hack into accounts through these emails, harvest personal information like usernames and passwords, and sell them on the digital black market. The fallout from this global epidemic doesn't just cost consumers and companies billions, it costs lives too. Fast-paced and utterly gripping, Spam Nation ultimately proposes concrete solutions for protecting ourselves online and stemming this tidal wave of cybercrime-before it's too late. "Krebs's talent for exposing the weaknesses in online security has earned him respect in the IT business and loathing among cybercriminals His track record of scoopshas helped him become the rare blogger who supports himself on the strength of his reputation for hard-nosed reporting." -Bloomberg Businessweek

United Nations reform : hearing before the Committee on Foreign Relations,

United States Senate, One Hundred Ninth Congress, first session, July 21, 2005.

Now beyond its eleventh printing and translated into twelve languages, Michael Porter's *The Competitive Advantage of Nations* has changed completely our conception of how prosperity is created and sustained in the modern global economy. Porter's groundbreaking study of international competitiveness has shaped national policy in countries around the world. It has also transformed thinking and action in states, cities, companies, and even entire regions such as Central America. Based on research in ten leading trading nations, *The Competitive Advantage of Nations* offers the first theory of competitiveness based on the causes of the productivity with which companies compete. Porter shows how traditional comparative advantages such as natural resources and pools of labor have been superseded as sources of prosperity, and how broad macroeconomic accounts of competitiveness are insufficient. The book introduces Porter's "diamond," a whole new way to understand the competitive position of a nation (or other locations) in global competition that is now an integral part of international business thinking. Porter's concept of "clusters," or groups of interconnected firms, suppliers, related industries, and institutions that arise in particular locations, has become a new way for companies and governments to think about economies, assess the competitive advantage of locations, and set public policy. Even before

publication of the book, Porter's theory had guided national reassessments in New Zealand and elsewhere. His ideas and personal involvement have shaped strategy in countries as diverse as the Netherlands, Portugal, Taiwan, Costa Rica, and India, and regions such as Massachusetts, California, and the Basque country. Hundreds of cluster initiatives have flourished throughout the world. In an era of intensifying global competition, this pathbreaking book on the new wealth of nations has become the standard by which all future work must be measured.

THE MOST INFLUENTIAL BOOK ON MODERN ECONOMICS The Wealth of Nations is an economics book like no other. First published in 1776, Adam Smith's groundbreaking theories provide a recipe for national prosperity that has not been bettered since. It assumes no prior knowledge of its subject, and over 200 years on, still provides valuable lessons on the fundamentals of economics. This keepsake edition is a selected abridgement of all five books, and includes an Introduction by Tom Butler-Bowdon, drawing out lessons for the contemporary reader, a Foreword from Eamonn Butler, Director of the Adam Smith Institute, and a Preface from Dr. Razeen Sally of the London

Annual Review of United Nations Affairs

When the United Nations' Charter was signed in San Francisco in 1945, the number of African member states of the Organisation was only 4. By the end of 1960 it had risen to 22. Today it is 41. How has this come about? The answer is given in this valuable book by Dr. Yassin El-Ayouty. The handful of Asian and African countries who had the privilege of foundation membership made it their business to see to it that their brethren who were still under the colonial yoke attained their freedom and independence as soon as possible and, in the meanwhile, that they were treated with decency and fairness by their colonial masters. It was a tough assignment. The struggle was long, requiring a great deal of patience and endurance. It was at times fierce, requiring much dogged resolution. It also called for the deployment of intellectual agility of the highest order. Fortunately all these qualities were available in the representatives of Asia and Africa who led the great struggle. These distinguished delegates also demonstrated a wonderful degree of solidarity which has, happily, become an Afro-Asian tradition at the United Nations. The battle began even

before the Organisation had itself become a fact. It would have been a more difficult struggle, had there been no provision in the Charter at all in respect of colonies, by whatever name called.

Competitive Advantage of Nations

Annual Review of United Nations Affairs 2009/2010

Here, from a brilliant young writer, is a paradigm-shifting history of both a utopian concept and global movement—the idea of the Third World. The Darker Nations traces the intellectual origins and the political history of the twentieth century attempt to knit together the world's impoverished countries in opposition to the United States and Soviet spheres of influence in the decades following World War II. Spanning every continent of the global South, Vijay Prashad's fascinating narrative takes us from the birth of postcolonial nations after World War II to the downfall and corruption of nationalist regimes. A breakthrough book of cutting-edge scholarship, it includes vivid portraits of Third World giants like India's Nehru, Egypt's Nasser, and Indonesia's Sukarno—as well as scores of extraordinary but now-

forgotten intellectuals, artists, and freedom fighters. The Darker Nations restores to memory the vibrant though flawed idea of the Third World, whose demise, Prashad ultimately argues, has produced a much impoverished international political arena.

a. The set generally Since the publication of its first edition in 1950, the Annual Review of United Nations Affairs has stood as the authoritative resource for scholars, students, and practitioners researching the latest developments of that august body. From the

insightful introduction, prepared each year by a distinguished expert on UN affairs, to the full-text presentation of reports and resolutions and the helpful subject index, ARUNA provides a practical tour of each year's U.N. actions and debates. The expert selection of documents by Joachim Muller and Karl Sauvant and the topic-based organization of those documents make any researcher's task much easier than the vast searching, sorting, and pruning required by the U.N.'s website. The series' topic-based organization of the materials and subject index lend invaluable guidance to all researchers. ARUNA presents comprehensive documentation of the work of the UN on an annual basis, starting in September of each year with the beginning of the regular sessions of the General Assembly. Coverage of the UN's key organs is provided, including the General Assembly, the Security Council, the Economic and Social Council (ECOSOC), the International Court of Justice, and the UN Secretariat. In addition, selected reports of intergovernmental bodies and expert groups are included. Solely official UN documentation is used. ARUNA occupies a special place in the publications on the work of the UN, as it allows readers to obtain an overview of the principal developments in its key organs. This makes it an important reference source for policy-makers and academic researchers.

b. The 2009-2010 volumes This year's edition continues to focus on the world financial crisis and the reaction of the United Nations and the international financial system to that crisis. The Overview to this year's edition, written by Joachim Muller and Karl Sauvant, examines the changing role of the United Nations and explores ways in which the management of the

financial crisis has impacted that role. The Introduction to this year's edition also examines the effects of this crisis; this Introduction is drawn from the "Report of the Commission of Experts of the President of the United Nations General Assembly on Reforms of the International Monetary and Financial System," as well as a slightly edited version of a Preface to that report written by Professor Joseph E. Stiglitz. The Introduction discusses the findings of the Commission and proposes the creation of a new institution, a Global Economic Coordination Council, which would be supported by an International Panel of Experts with a geographically diverse membership that would represent the interests of emerging and developing countries as well as those of developed countries. Dr. Joseph E. Stiglitz, who served as Chairman of the Commission and wrote the Preface to the Commission's Report, holds joint professorships at Columbia University's Economics Department and its Business School. He is also Co-founder and Co-President of the Initiative for Policy Dialogue. From 1997 to 2000 he was the World Bank's Senior Vice President for Development Economics and Chief Economist. From 1995 to 1997 he served as Chairman of the U.S. Council of Economic Advisers and as a member of President Clinton's cabinet. From 1993 to 1995 he was a member of the Council of Economic Advisers. He was previously a professor of economics at Stanford, Princeton, Yale, and All Souls College. Dr. Stiglitz is also a leading scholar of the economics of the public sector and was awarded the Nobel Prize in Economics in 2001 in addition to the American Economic Association's biennial John Bates Clark Award in 1979. His recent publications include

Freefall: America, Free Markets, and the Sinking of the World Economy (2010), Making Globalization Work (2006), Fair Trade for All (2005), and Globalization and its Discontents (2002). The 2009-2010 volumes of ARUNA therefore also devote considerable attention to the financial crisis as well as other international crises. Among the documents in the 2009-2010 volumes are the complete General Assembly resolutions, as well as the Report and Resolutions of the Security Council and the Economic and Social Council (ECOSOC). Annual Reports of note include reports of the United Nations Children's Fund (UNICEF), the UN Development Programme and UN Population Fund, the UN High Commissioner for Human Rights, the UN High Commissioner for Refugees, the UN Relief and Works Agency for Palestine Refugees in the Near East, and the World Food Programme. Mr. Muller and Dr. Sauvant have also selected progress reports on key peacekeeping, peace-building, and political missions, including those for Afghanistan, the Democratic Republic of the Congo, Haiti, Iraq, the Middle East, Sudan, and West Africa.

Sachs is Director of the Earth Institute at Columbia University and Special Advisor to the Secretary-General of the UN on the Millennium Development Goals. Professor Sachs's introduction to ARUNA 2007/2008 was titled "Towards a New Global Protocol on Climate Change," in which he argued that solving the climate change problem will demand four steps: scientific consensus, public awareness, the development of alternative technologies, and a global framework for action. He dealt, in particular, with the science underpinning the negotiations for a new global protocol on climate change, as a successor to the Kyoto Protocol. Professor Sachs argued that climate change crises can only be solved through the goals, leadership, and treaty mechanisms of the UN.
