With its cranked wing and vulture-like looks the Junkers Ju 87 Stuka dive-bomber

came to symbolise the terror of the German Blitzkrieg. In the early years of the Second World War the Ju 87 lived up to its fearsome reputation, but it eventually met its match when pitted against more modern adversaries. Supported by a comprehensive selection of photographs and technical drawings, Jonathan Falconer's Junkers JU 87 Stuka Manual describes the design, construction and operation of the feared Stuka, which saw frontline action wherever the German Army went – from Norway, western Europe and Russia, to North Africa.

Auto Repair For Dummies

From Willys and Overland Jeeps of World War II, to the CJ models of '70s and early '80s, to the slightly more civilized Wrangler, the Jeep has become an American icon. Jeep has maintained its popularity by updating and modernizing the traditional two-door, removable-top Jeep without watering down its off-road capability. Jeep owners love to personalize their vehicles and modify them for better performance on and off road. In High-Performance Jeep Wrangler TJ Builder's Guide, author Christian Lee explains how to upgrade your Wrangler's suspension, axles, differentials, engine, transfer case, wheels and tires, skid plates, and more, using aftermarket and salvage-yard upgrades. This book includes over 300 full-color images and drawings to show beginners and experienced Jeepers how to do things right. Lee even has special sections for basic driving and recovery technique, and a few built-up Jeeps to give you ideas for your own Wrangler.

Star Trek: U.S.S. Enterprise Haynes Manual

The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

John Haynes

On July 20, 1969, US astronaut Neil Armstrong became the first man to walk on the moon. The Apollo 11 mission that carried him and his two fellow astronauts on their epic journey marked the successful culmination of a quest that, ironically, had begun in Nazi Germany thirty years before. This is the story of the Apollo 11 mission and the 'space hardware' that made it all possible. Author Chris Riley looks at the evolution and design of the mighty Saturn V rocket, the Command and Service Modules, and the Lunar Module. He also describes the space suits worn by the crew, with their special life support systems. Launch procedures are described, 'flying' the Saturn V, navigation, course correction 'burns', orbital rendezvous techniques, flying the LEM, moon landing, moon walk, take-off from the moon, and earth re-entry procedure. Includes performance data, fuels, biographies of Armstrong, Aldrin and Collins, Gene Kranz and Werner von Braun. Detailed appendices cover all of the Apollo missions, with full details of crews, spacecraft names and logos, mission priorities, moon landing sites, and the Lunar Rover.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

British Books in Print

First trialled in Europe in the spring of 1945, but formally introduced into British Army service in December 1946, not only is the Centurion one of the most important tanks in the history of the British armoured fighting vehicle (AFV), but it is also one of the most significant post-war Western tanks. Between 1946 and 1962, 4,423 Centurions were built in 13 basic marks and numerous variants, with the chassis also adapted for several other AFV roles. A small number of the Beach Armoured Recovery Version (BARV) served with the British forces during the Iraq War of 2003, some 58 years after the Centurion first entered service! The Centurion has seen extensive combat in the Korean War (Britain), Vietnam (Australia), the Middle East (Israel) in the 1967 Six Day War, 1973 Yom Kippur War, and during the 1978 and 1982 invasions of Lebanon, and in the Indo-Pakistan War (India) in 1965 where it fought against US-supplied M47 and M48 Patton tanks.
