"Reference! Dialogic Earth" is a reference for all six dialogic books in the KlevaKids Earth Theme. These rhyming science picture books are rich in promoting language arts via dialogic prompts that may include vocabulary expansion, letter recognition, word opposites, rhyming patterns, recall, reading comprehension, spelling, counting, and more. The activities at the end of the book include an art project or experiment, movement, and a song. These books are appropriate for preschool and early school age children.

### The U.S. Naval Institute on Naval Tactics

Famous as the "boots on the ground," U.S. Marines have long played a vital role in the air as well. In these pages, readers will find both history and analysis as Naval Institute authors record and assess this lesser-known but significant aspect of "Leatherneck" combat over the last century.

Gabrielle Bernstein has been inspiring spiritual seekers for over a decade, with hundreds of thousands of people across the globe following her work. One of her most important and recurring teachings is that life is always helping and supporting us. Gabrielle believes that through prayer, trust, and love, we can always be sure that life is bringing us exactly what we need. In her bestselling book *The Universe Has Your Back*, Gabrielle taught readers how to relinquish control, relax into a sense of certainty and freedom, find strength when they are down, synchronicity and support when they are lost, safety in the face of uncertainty, and joy in what might otherwise be pain. Now, she has created a stunning journal to help readers implement and practice these teachings in their own lives. With artwork based on the beautiful *The Universe Has Your Back* card

deck, this journal will feature quotes to inspire an introspective journaling experience. A stand-alone product, readers can use this journal and benefit from the soul-shifting experience even if they haven't read Gabrielle's books. This journal will set the reader off on a colorful journey of creativity and spirituality towards their own connection with the supportive forces of life. Ultimately, they will learn to find their trust and faith, and to understand that no matter what challenges or circumstances they are going through, the universe always has their back.

“Wheel books” were once found in the uniform pockets of virtually all junior officers and many senior petty officers. Each small notebook was unique to the Sailor carrying it, but all had in common a collection of data and wisdom that the individual deemed useful in the effective execution of his or her duties. Often used as a substitute for experience among neophytes and as a portable library of reference information for more experienced personnel, those weathered pages contained everything from the time of the next tide, to leadership hints from a respected chief petty officer, to the color coding of the phone-and-distance line used in underway replenishments. In that same tradition, the Naval Institute has created and aptly named the Wheel Book series, portable libraries culled from USNI’s vast array of information that has accumulated for more than a century. Articles from the Institute’s flagship publication Proceedings are combined with selections from USNI’s oral history program and from Naval Institute Press books to create unique guides on a wide array of relevant professional subjects. Just as the “wheel books” of yesterday served the fleet well, the Naval Institute Wheel Books of today provide supplemental information, pragmatic advice, and cogent analysis on topics important to modern naval professionals. The pinnacle of leadership in a military organization is command. Article 0801 of Navy Regulations defines both the authority and the responsibility of command as “absolute.” This Naval Institute Wheel Book provides practical guidance and food for thought that actual and would-be commanders can use to carry out that absolute authority while being absolutely responsible. Included in this specially-selected collection is the sage advice of those who have commanded as well as the expectations of those who are commanded. Aspirants as well as practitioners will do well to exploit this selected survey of what Fleet Admiral Chester Nimitz described as the “one purpose” for entering the Navy.

## **The Calamities of Jane**

YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! \* The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE \* The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH \* The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE \* The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe

with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

This book is a comprehensive primer to both traditional and emerging E-Commerce technologies. Students with no prior technical knowledge will be able to grasp complex topics such as networking, Internet security, Web languages and other important subjects in a way that illustrates their use through case studies and practice by completing Web projects.

## **Knuckleheads in the News**

Just as Thomas Cutler's *The Bluejacket's Manual* serves as the standard introduction and continuing reference guide for American sailors, this new handbook provides a basic reference guide for civilians working for the U.S. Navy. It will acquaint them with the Navy's world of acronyms, n-codes, uniforms, and customs. The author explains that a big step toward fitting in has always been learning how to talk the talk and walk the walk, and this guide provides new employees and veteran workers alike with the words and steps needed to succeed in the Navy.

A revolutionary process based on the four chambers of the heart and rooted in Toltec wisdom that brings emotional clarity, healing, and freedom *The Warrior Heart Practice* is a powerful new method to reconnect with our sense of authenticity and inner-knowing and realign with our true nature. Author of the bestselling book *Warrior Goddess Training*, HeatherAsh Amara has trained extensively in the Toltec tradition under the tutelage of don Miguel Ruiz, author of *The Four Agreements*. *The Warrior Heart Practice* is a revolutionary system based on the four chambered structure of the human heart. Walking through each of the four chambers—Feeling, Story, Truth, and Intent—readers learn to take stock of their current emotional and mental state and reframe their situation in a new healing light. The process begins in the Feeling chamber as readers accept the emotions they are currently experiencing without fighting or judging them. It then continues into the next chamber as readers witness the Story that they are telling themselves. In the Truth chamber, they learn to thoughtfully and objectively evaluate the reality of the situation. In the final chamber, they learn to define and focus their Intent. The last phase of the practice is the most profound—taking the

knowledge they have gathered from the four chambers, readers then walk backwards through each of the four chambers, refocusing their Intent, Truth, Story, and Feelings based on what they've learned during the process. The Warrior Heart Practice leads to deep insights as readers learn to step outside of their preconceptions to realign with their true purposes and goals.

## **The Warrior Heart Practice**

The men of the U.S. Navy's brown-water force played a vital but often overlooked role in the Vietnam War. Known for their black berets and limitless courage, they maneuvered their aging, makeshift craft along shallow coastal waters and twisting inland waterways to search out the enemy. In this moving tribute to their contributions and sacrifices, Tom Cutler records their dramatic story as only a participant could. His own Vietnam experience enables him to add a striking human dimension to the account. The terror of firefights along the jungle-lined rivers, the rigors of camp life, and the sudden perils of guerrilla warfare are conveyed with authenticity. At the same time, the author's training as a historian allows him to objectively describe the scope of the navy's operations and evaluate their effectiveness. Winner of the Navy League's Alfred Thayer Mahan Award for Literary Achievement in 1988 when the book was first published, Cutler is credited with having written the definitive history of the brown-water sailors, an effort that has helped readers better understand the nature of U.S. involvement in the war.

This volume continues the stories of the Israelite patriarchs and prophets who figured in Volume II, as well as of the semi-mythical rulers of ancient Iran. In addition to biblical, Qur'anic, and legendary accounts about Moses, Aaron, and the exodus of the Children of Israel from Egypt; of the Judges, Samuel and Ezekiel; and of Saul, David, and Solomon, it includes a version of Iranian prehistory that emphasizes the role of Manuchihr (Manushihr in Arabic) in creating the Iranian nation and state. Woven into these accounts are stories about figures belonging to the very earliest literatures of the Middle East: the mysterious al-Khidwith echoes from the epic of the Sumero-Akkadian hero Gilgamesh; the legendary exploits of Dhu l-Qarnayn, mirroring the ancient romance of Alexander; and incorporating elements about the encounter of King Solomon and Bilqis, the Queen of Sheba, of Jewish midrash and South Arabian lore. The Islamic empire was at its political and economic height during the tenth and eleventh centuries, and a new civilization was forged at the caliphal court and in society at large. One of the literary triumphs

of that civilization was this rich and colorful tapestry belonging to the Islamic genre of "tales of the prophets." The tales in this volume show how threads from all the ancient civilizations of the Middle East were incorporated, absorbed, and Islamized in the brilliant fabric of that new civilization.

This book explores shifting forms of continental colonialism in Asia, Africa, Europe, and the Americas, from the early modern period to the present. It offers an interdisciplinary approach bringing together historians, anthropologists, and sociologists to contribute to a critical historical anthropology of colonialism. Though focused on the modern era, the volume illustrates that the colonial paradigm is a framework of theories and concepts that can be applied globally and deeply into the past. The chapters engage with a wide range of topics and disciplinary approaches from the theoretical to the empirical, deepening our understanding of under-researched areas of colonial studies and providing a cutting edge contribution to the study of continental and internal colonialism for all those interested in the global impact of colonialism on continents.

The toxic costs of anger are well understood: sabotaged careers, alienated family and friends, and even physical damage to a point where illness or an early death can result. Unlike previous models of anger control that began by combating anger-provoking trigger thoughts at a relatively low level of anger, The Anger Control Workbook introduces you to a streamlined new approach that allows you to exercise control at a higher level of anger so that fewer steps are involved in managing all of your problem anger expressions. Throughout, the book offers techniques in a clear, step-by-step format, arranged to make it easy to tailor a program to your own personal obstacles and triggering events

## **Shifting Forms of Continental Colonialism**

In Defence Against Weapons of Mass Destruction Terrorism the editors examined the class of Weapons of Mass Destruction (WMD) for terrorist use, and have found that their effects range from serious nuisance value up to catastrophic destruction of a large urban area. There are some differences in the effects depending on whether they are used against military or civilian targets, whether they are used from inside the target area or outside, and between those weapons for which MOPP (Mission Oriented Protective Posture) gear can provide useful protection (Biological Weapons, Chemical Weapons) and those for which it often cannot (radiation, nuclear explosions). These are useful ways to begin thinking about establishing protocols for protecting our armed forces and the civilian population they are sworn to defend.

Adopted by the U.S. Navy for issue to all new Sailors, *A Sailor's History of the U.S. Navy* brings to life the events that have shaped and inspired the Navy of today while highlighting the roles of all Sailors—from seaman to admiral. Rather than focus entirely upon such naval icons as Stephen Decatur and Chester Nimitz, as most histories do, author Thomas J. Cutler, a retired lieutenant commander and former second class petty officer, brings to the forefront the contributions of enlisted people. You'll read about Quartermaster Peter Williams, who steered the ironclad Monitor into history, and Hospital Corpsman Tayinikia Campbell, who saved lives in USS Cole after she was struck by terrorists in Yemen. Unlike most histories, *A Sailor's History* is arranged thematically rather than chronologically. Chapters are built around the Navy's core values of honor, courage, and commitment, its traditions of "Don't Tread on Me" and "Don't Give Up the Ship," and other significant aspects of the Navy. As Cutler states in his preface, the book is not a whitewash. He includes mistakes and defeats along with the achievements and victories as he draws a portrait of a Navy growing stronger and smarter while turning tragedy into triumph. The result is a unique account that captures the Navy's heritage as much as its history and provides inspiration as well as information while emphasizing that most essential element of naval history: the Sailor.

The late Vice Admiral A.K. Cebrowski—well known as a brilliant thinker on the subject of naval warfare—once

described naval tactics as “the sum of the art and science of the actual application of combat power.” Renowned naval tactician Captain Wayne Hughes adds that the study of naval tactics “strives to bring whatever order and understanding is possible out of the chaos of battle.” With those words of wisdom serving as “commander’s intent,” this collection sheds a bright light on this sometimes dark and mysterious but unquestionably essential realm, illuminating the principles and concepts that serve the warrior at the most critical moments in his or her profession.
