YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . **GRANDMOTHER OF EIGHT MAKES HOLE IN ONE** * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . **MINERS REFUSE TO WORK AFTER DEATH** * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . **DRUNK GETS NINE MONTHS IN VIOLIN CASE** * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! **REMEMBER:** To err may be human, but to laugh out loud is divine.

An understanding of the developments in classical analysis during the nineteenth century is vital to a full appreciation of the history of twentieth-century mathematical thought. It was during the nineteenth century that the diverse mathematical formulae of the eighteenth century were systematized and the properties of functions of real and complex variables clearly distinguished; and it was then that the calculus matured into the rigorous discipline of today, becoming in the process a dominant influence on mathematics and mathematical physics. This Source Book, a sequel to D. J. Struik's *Source Book in Mathematics, 1200-1800*, draws together more than eighty selections from the writings of the most influential mathematicians of the period. Thirteen chapters, each with an introduction by the editor, highlight the major developments in mathematical thinking over the century. All material is in English, and great care has been taken to maintain a high standard of accuracy both in translation and in transcription. Of particular value to historians and philosophers of science, the Source Book should serve as a vital reference to anyone seeking to understand the roots of twentieth-century mathematical thought.

Jeff Garmire was living the fast paced life of a successful young professional when he gave it all up to embark on the adventure of a lifetime. He set out to become only the fifth person to thru-hike the Pacific Crest Trail, Appalachian Trail and Continental Divide Trail in a single calendar year. Finishing the 8,000 mile Calendar Year Triple Crown would be an adventure of a lifetime. The journey was riddled with inclement weather, shady characters, wildlife attacks, and injuries. Along the way Jeff swam frozen rivers, encountered wildfires and battled his own mind. He offers a captivating story of strength and courage. Hiking through some of the most remote areas in America, Jeff is continually overwhelmed by the kindness and generosity of strangers. Free Outside is the fascinating story of Jeff Garmire's journey along the national historic trails that define wild America. Finishing would take everything he had, and he was willing to give it all.

A broad range of bulk thermoplastic materials were studied by monitoring real processing situations (both moulding and extrusion). Materials studied included PVC nylon 6, ABS, HIPS, LDPE and HDPE. Emissions collected during standard processing and purging operations were analysed by thermal desorption gas chromatography-mass spectrometry.

The Obree Way

Britain thinks of itself as a welcoming country, but the reality has always been different. Migration is viewed benevolently when hypothetical, but heaven forbid anyone should actually try to migrate here. Nicholas Winton famously had to forge papers to smuggle Jewish children into Britain before the Second World War, and hostility to post-war Commonwealth immigration quickly led to limits being imposed. New arrivals were not well treated, and race equality legislation had to be imposed on a grudging populace. As if to prove little has changed, modern immigration policy since 2010 has meant Britain has become a 'hostile environment' for migrants, particularly following the exposure of the Windrush scandal in 2018 and successive Tory governments' strategies to make staying in the country as difficult as possible for people, in the hope that they will just leave. In this innovative and alarming book, blogger and campaigner Colin Yeo exposes the iniquities of an ugly, unfair and failing approach and offers a manifesto for a new immigration system that would roll back the hostile environment laws, consolidate immigration legislation and introduce a statutory time limit on immigration detention.

"The year is 1095. The most prominent leaders of the Christian world have assembled in a meadow in France near Clermont. Pope Urban appeals for the liberation of Jerusalem and cries out Deus Lo Volt! God Wills It! The cry is taken up, echoes forth and is carried on. Wave upon wave of Christian pilgrims rush to assault the growing power of Muslims in the Holy Land and will do so for the next two hundred years. Most able men become soldiers of the Cross, and when a man is prevented by old age or ill health, he sends his son. Women, too, go to fight alongside the men. It is a time of great adventure, of great exploration and cultural change. Uniting Christian Europe in a common cause, the crusades defined forever the spirit of the West.

The Triple Agent

This title includes a number of Open Access chapters. The twenty-first century world faces several enormous challenges: how to mitigate climate change, meet a growing energy demand without relying on fossil fuels, and manage the escalating quantities of solid waste generated by cities around the world. This compendium volume offers a viable solution to all three: using solid waste as a renewable resource. Intended for a wide audience ranging from engineers and academics to decision-makers in both the public and private sectors, this volume has gathered together research into a range of technologies and methodologies. The editors, two well-published researchers at the top of their field, have selected articles that lay the foundation for this discussion. They have then included chapters for the following waste management scenarios: anaerobic digestion, composting, pyrolysis and chemical upgrading, incineration and carbonization, and gasification. Research has been included from around the world, representing potential international solutions to what are global challenges, as well as crucial implications for ongoing research in this important field of study.

Interpersonal psychotherapy (IPT), an empirically validated treatment for depression and other disorders, is becoming more frequently used to treat a range of psychiatric diagnoses. Based on evidence that interpersonal problems contribute to the onset of psychiatric disorders, IPT helps patients to change interpersonal behavior in order to improve psychosocial functioning and relieve symptoms. IPT both relieves psychiatric symptoms and helps to build social skills. Bringing together experts who have treated patients with and conducted clinical research on IPT, the Casebook of Interpersonal Psychotherapy responds to the growing need for a foundational text to supplement the available manuals on IPT. The Casebook provides a wealth of real life treatment material, and illustrates the use of IPT in the hands of expert psychotherapists treating patients with a range of conditions and complications in different IPT treatment formats. The detailed cases give a sense of how IPT proceeds and how it works. Chapter authors describe specific adaptations of IPT for patients with particular disorders, including mood disorders, anxiety disorders, eating disorders, and personality disorders. The book also covers different contexts in which IPT may be practiced, including group therapy, inpatient settings, and telephone therapy. The Casebook of Interpersonal Psychotherapy is an invaluable resource for psychiatrists, psychologists, social workers, psychiatric nurses, and other mental health professionals interested in psychotherapy.
