Stuttering is caused by at least five factors: genetics, two neurological

abnormalities, responses to stress, and speech-related fears and anxieties. But most stuttering therapy programs address only one issue, such as breathing a certain way, or not hiding your stuttering. Each might help you in some situations, but you still stutter in other situations. "No Miracle Cures" instead guides you through treatments for all five factors that contribute to stuttering. You'll find the best treatments for children, teenagers, adults who stutter mildly, and adults who stutter severely. Stuttering may seem like one big problem to you. "No Miracle Cures" breaks down stuttering into many small problems and shows you how to solve each one.

The Simple Guide to Home Electronics helps the average person navigate the bewildering array of choices in the ever-changing world of home electronics that impact our day to day lives. A wide variety of topics from lightbulbs to the Internet, TV, Telephone, Cameras, and the Internet of Things (IoT) are explained without all the tech savvy jargon. Each chapter begins with a general overview and practical advice followed by more in-depth information that will give you an understanding of the type of products available and how they work. If you have ever considered disconnecting your cable TV, a smart thermostat or turning on the lights with a voice activated product, then this book is for you. The author's light conversational style along with his own engaging stories, humor and points of view make these complex topics easy to understand. The information is presented in free-standing independent chapters that can be referenced over and over again as you replace and update the technology in your home.

Want to dictate up to 5000 WORDS an hour? Want to do it with 99% ACCURACY from the day you start? NEW EDITION: UPDATED to cover the latest Dragon Professional Individual v15 for PC & v6 for Mac FREE video training included! As writers, we all know what an incredible tool dictation software can be. It enables us to write faster and avoid the dangers of RSI and a sedentary lifestyle. But many of

us give up on dictating when we find we can't get the accuracy we need to be truly productive. This book changes all of that. With almost two decades of using Dragon software under his belt and a wealth of insider knowledge from within the dictation industry, Scott Baker will reveal how to supercharge your writing and achieve sky-high recognition accuracy from the moment you start using the software. You will learn: - Hidden tricks to use when installing Dragon NaturallySpeaking on a Windows PC or Dragon Dictate for Mac; - How to choose the right microphone and set it up perfectly for speech recognition; - The little-known techniques that will ensure around 99% accuracy from your first install – and how to make this even better over time; - Setting up fail-safe dictation profiles with multiple microphones and voice recorders, without impacting your accuracy; - How to train the software to adapt to both your voice AND writing style and avoid your accuracy declining; - Strategies for achieving your entire daily word count in just one or two hours; - Many more tips and tricks you won't find anywhere else. At the end of the book, you'll also find an exclusive list of resources and links to FREE video training to take your knowledge even further. It's time to write at the speed of speech – and transform your writing workflow forever! Subject keywords: Dragon Dictate Naturally Speaking for PC Mac, dictating your book or novel, dictation for writers authors beginners advanced, creative writing guides, self publishing

Talking to Siri

Headphones are a very popular accessory in this day and age. Just about everyone owns a pair. The quality differs and not all of them meet the needs of their users. The purpose of this guide is to compare the different levels of quality for headphones and the different features of headsets in order to help you make

sound judgment when deciding to purchase either one.

Bedford's Tech Edge

Our lives are getting faster and faster. We are engulfed in constant distraction from email, social media and our 'always on' work culture. We are too busy, too overloaded with information and too focused on analytical left-brain thinking processes to be creative. *Too Fast to Think* exposes how our current work practices, media culture and education systems are detrimental to innovation. The speed and noise of modern life is undermining the clarity and quiet that is essential to power individual thought. Our best ideas are often generated when we are free to think diffusely, in an uninterrupted environment, which is why moments of inspiration so often occur in places completely separate to our offices. To reclaim creativity, *Too Fast to Think* teaches you how to retrain your brain into allowing creative ideas to emerge, before they are shut down by interruption, distraction or the self-doubt of your over-rational brain. This is essential reading for anyone who wants to maximize their creative potential, as well as that of their team. Supported by cutting-edge research from the University of the Arts London and insightful interviews with business leaders, academics, artists, politicians and psychologists, Chris Lewis takes a holistic approach to explain the 8 crucial traits that are inherently linked to creation and innovation.

Criminology

“If you read only one book about attention deficit disorder, it should be *Delivered from Distraction*.”—Michael Thompson, Ph.D., New York Times bestselling co-author of *Raising Cain* In 1994, *Driven to Distraction* sparked a revolution in our understanding of attention deficit disorder. Widely recognized as the classic in the field, the book has sold more than a million copies. Now a second revolution is under way in the approach to ADD, and the news is great. Drug therapies, our understanding of the role of diet and exercise, even the way we define the disorder—all are changing radically. And doctors are realizing that millions of adults

suffer from this condition, though the vast majority of them remain undiagnosed and untreated. In this new book, Drs. Edward M. Hallowell and John J. Ratey build on the breakthroughs of *Driven to Distraction* to offer a comprehensive and entirely up-to-date guide to living a successful life with ADD. As Hallowell and Ratey point out, “attention deficit disorder” is a highly misleading description of an intriguing kind of mind. Original, charismatic, energetic, often brilliant, people with ADD have extraordinary talents and gifts embedded in their highly charged but easily distracted minds. Tailored expressly to ADD learning styles and attention spans, *Delivered from Distraction* provides accessible, engaging discussions of every aspect of the condition, from diagnosis to finding the proper treatment regime. Inside you’ll discover

- whether ADD runs in families
- new diagnostic procedures, tests, and evaluations
- the links between ADD and other conditions
- how people with ADD can free up their inner talents and strengths
- the new drugs and how they work, and why they’re not for everyone
- exciting advances in nonpharmaceutical therapies, including changes in diet, exercise, and lifestyle
- how to adapt the classic twelve-step program to treat ADD
- sexual problems associated with ADD and how to resolve them
- strategies for dealing with procrastination, clutter, and chronic forgetfulness

ADD is a trait, a way of living in the world. It only becomes a disorder when it impairs your life. Featuring gripping profiles of patients with ADD who have triumphed, *Delivered from Distraction* is a wise, loving guide to releasing the positive energy that all people with ADD hold inside. If you have ADD or care about someone who does, this is the book you must

read. Praise for *Delivered from Distraction* “The definitive source of information on attention deficit disorder.”—Harold S. Koplewicz, M.D., director, Child Study Center, New York University School of Medicine “A deeply wise and truly helpful book, written with frankness, humor, and tremendous empathy.”—Perri Klass, M.D., co-author of *Quirky Kids*
