The term "zooplankton" describes the community of floating, often microscopic, animals that inhabit aquatic environments. Being near the base of the food chain, they serve as food for larger animals, such as fish. The ICES (International Council for the Exploration of the Sea) Zooplankton Methodology Manual provides comprehensive coverage of modern techniques in zooplankton ecology written by a group of international experts. Chapters include sampling, acoustic and optical methods, estimation of feeding, growth, reproduction and metabolism, and up-to-date treatment of population genetics and modeling. This book will be a key reference work for marine scientists throughout the world. Sampling and experimental design Collecting zooplankton Techniques for assessing biomass and abundance Protozooplankton enumeration and biomass estimation New optical and acoustic techniques for estimating zooplankton biomass and abundance Methods for measuring zooplankton feeding, growth, reproduction and metabolism Population genetic analysis of zooplankton Modelling zooplankton dynamics This unique and comprehensive reference work will be essential reading for marine and freshwater research scientists and graduates entering the field.

New York Times bestselling author and award-winning journalist, Nina Burleigh, explores Donald Trump's attitudes toward women by providing in-depth analysis and background on the women who have had the most profound influence on his life—the mother and grandmother who raised him, the wives who lived with him, and the daughter who is poised to inherit it all. Has any president in the history of the United States had a more fraught relationship with women than Donald Trump? He flagrantly cheated on all three of his wives, brushed off multiple accusations of sexual assault, publicly ogled his eldest daughter, bought the silence of a porn star and a Playmate, and proclaimed his now-infamous seduction technique: “grab ‘em by the pussy.” *Golden Handcuffs* is a comprehensive and provocative account of the women who have been closest to Trump—his German-immigrant grandmother, Elizabeth, the uncredited founder of the Trump Organization; his Scottish-immigrant mother, Mary, who acquired a taste for wealth as a maid in the Andrew Carnegie mansion; his wives—Ivana, Marla, and Melania (the first and third of whom are immigrants); and his eldest daughter, Ivanka, groomed to take over the Trump brand from a young age. Also examined are Trump's two older sisters, one of whom is a prominent federal judge; his often-overlooked younger daughter, Tiffany; his female employees; and those he calls “liars”—the women who have accused him of sexual misconduct. Of these women, Burleigh writes, “where they come from and what they do now and in the future matters because they have or have had the ear of the most powerful man on earth.”

Handbook for Sound Engineers

(Book). This up-to-date book comprehensively covers all aspects of speech and music sound reinforcement. It is roughly

divided into four sections: Section 1 provides the tutorial fundamentals that all audio engineers will need, discussing subjects such as fundamentals of acoustics, psychoacoustics, basic electrical theory and digital processing. Section 2 deals with the fundamental classes of hardware that the modern engineer will use, such as loudspeaker systems and components, microphones, mixers, amplifiers and signal processors. Special attention is given to digital techniques for system control and to audio signal analysis. Section 3 deals with the basics of system design, from concept to final realization. It covers topics such as basic system type and speech intelligibility, site survey, user needs analysis and project management. Section 4 discusses individual design areas, such as sports facilities, large-scale tour sound systems, high-level music playback, systems for the theater, religious facilities, and other meeting spaces. The book is written in an accessible style, but does not lack for ample amounts of technical information. It is truly a book for the 21st century! The Senior Director of Product Development and Application for JBL Professional, John Eargle is the author of The Handbook of Recording Engineering, The Microphone Book, Handbook of Sound System Design, Electroacoustical Reference Data, Music, Sound and Technology and The Loudspeaker Handbook .
