The Research Funding Guidebook

Structural Geology and Personal Computers

The Trade Secrets Handbook

Antitrust Law Sourcebook

This book applies social theory to curriculum design and sets out a program for language curriculum renewal for the 21st century. It includes many examples of text-based curricula and describes a plan for curriculum renewal based on texts as the unit of analysis for planning, for teaching and for assessment. Underpinned by Halliday's semiotic theory of language, the book combines the theory of language as a resource for meaning-making with learning language as learning to mean. The curriculum design constructs curriculum around social practices and their texts rather than presenting language as grammatical and lexical objects. This work will provide teachers, teacher educators and curriculum planners with a curriculum model for teaching children and adults in different contexts from preschool to adult education as well as serving as a practical guide for students.

Health Care Industry Developments

Presents a host of original material as well as articles taken from the pages of the best-selling Writer's Digest, providing coverage of such topics as finding the right magazine to submit one's work, composing a professional and eye-catching query letter, and maximizing one's chances for repeat assignments. Original.

Paralegal Career For Dummies

This book will help structural geologists keep abreast of rapid changes in work practices resulting from the personal computer revolution. It is organized into six parts: I Computer-Aided Learning; II Microstructural Analysis; III Analysis of Orientation Data; IV Strain and Kinematic Analysis; V Mathematical and Physical Modeling; VI Structural Mapping and GIS. The 45 contributing authors explain how to: set up computer-aided teaching and learning facilities on a low budget; illustrate tectonic strain concepts with a drawing program; integrate multimedia presentations into structural coursework; analyze microstructures with computer-aided microscopy; produce sophisticated stereonets with custom software for both the Mac and IBM PC; evaluate orientation data using a spreadsheet program; model the development of macrostructures and microstructures numerically; integrate structural and geophysical data; and apply PC technology to the production of structural maps, cross sections, and block diagrams. The editor's own contributions reveal

the inner workings of his renowned structural research applications which are used in hundreds of universities worldwide. Commercial and non-commercial applications of particular interest to structural geologists are reviewed. This volume will prove an invaluable resource for professors, instructors, and research students, as well as research scientists in the public services and exploration industries. If you are such a person, have you lectured with the aid of a gyroscopic mouse? Or used Bézier curves to model heterogeneous deformation? Or analyzed a fold structure using a digital terrain model? If not, you'll need to rush out and buy this book before the next wave of new technology hits!

Annual Register of Grant Support 2007

This hands-on guide begins at the point many grant seekers can identify with - rejection. Part One emphasizes how to resubmit unfunded applications to make them more competitive. The material contained in this section is invaluable, especially since funding sources are now limiting the number of times the same application can be resubmitted. Part Two highlights the practical issues of a project after funding has been obtained. The authors provide a map of the people and places that must become part of a researcher's daily and weekly routine, a checklist to aid the newly funded researcher's progress, and guidance on the essential but often overlooked feature of research funding, time management. Subjects of other sections of this volume incl

Getting Published in the Life Sciences

The goal of this book is to make it easier for scientists, especially those new to scientific writing, to write about their results and to get their manuscripts accepted in peer-reviewed journals. The book covers each step throughout the submission process, from organizing and outlining the manuscript, presenting statistical data and results, to what happens during the in-house manuscript review process and what to do if an article is initially rejected. In addition to providing practical exercises on these topics, the book focuses on helping writers distil their research into concise take-home messages for readers, in order to convey information as clearly as possible to the target audience.
