Occupational Projections and Training Data

"Beechmont Riffs" is a story based on facts that occurred in a wealthy middle class Westchester community in 1989. Here, in the lap of secure suburban society -- the American ideal-- a horrifying murder took place. When the bodies were found days after the murder, leads were cold and few. The gripping story of the reaction of the community to the crime, the political effect the crime had on the town's Mayor; and the growing obsession by the police chief sets the stage. Heyward, a post-hippie, baby-boomer self-proclaimed private eye is left to solve the crime and cut the grass.
