Moody's Industry Review

Although direct mail is the fastest growing marketing medium in the world, it is still largely organized on a national basis and remains confined by borders. To support and inform marketing professionals in the development of direct marketing into an international activity, the fourth edition of this title offers a comprehensive 'one-stop' guide to the direct mail potential of every major export market in the world. It provides authoritative, independent advice on how to

formulate and execute effective campaigns, along with detailed information on markets, costs and data relevant to businesses based in any country.

The provision of IP-based multimedia services is one of the most exiting and challenging aspects of next generation wireless networks. A significant evolution has been underway for enabling such multimedia services and for ultimately migrating the Internet to the wireless world. This book examines this evolution, looking at an array of the most up-to-date wireless multimedia technologies and services. The first part focuses on enabling technologies for wireless multimedia, while the second is dedicated to the new wireless multimedia services that are expected to play a key role in the future wireless environment. In addition, the related recent standardization, research and industry activities are addressed. * Covers a complete range of multimedia hot topics, ranging from audio/video coding techniques to multimedia

protocols and applications * Discusses QoS issues in WLANs, 3G and hybrid 3G/WLAN networks * Provides in-depth discussion of the most modern multimedia services, such as Push-to-Talk, Instant Messaging, Presence, mobile payments, MMS, WAP, and location-based multimedia services * Addresses the emerging Multimedia Broadcast/Multicast Service (MBMS) and the key aspects of IP Multimedia Subsystem (IMS) in 3G networks * Numerous on-line references will assist readers in their quest for the most up-to-date information This comprehensive resource will have instant appeal to students in electrical and computer engineering or IT disciplines. It is also essential reading for engineering managers, engineers in wireless systems and multimedia, and wireless multimedia researchers.

IBM DS8870 Multiple Target Peer-to-Peer Remote Copy

This publication is one of a series of country reviews aimed at improving the environment for private investment in key infrastructure sectors. It gives an objective assessment of the condition of Rwandas core economic infrastructure and associated institutional and policy frameworks, as well as examining reform opportunities to encourage private sector involvement. Chapters review the following sectors: transport, energy, water and sanitation,

electricity and telecommunications, as well as considering a number of cross-cutting issues including institutional capacity, regulation, the legal system, taxation and environmental issues.

Multiple Target Peer-to-Peer Remote Copy (MT-PPRC) was introduced with IBM® System Storage® DS8870 Version 7 Release 4 (License Machine Code 7.7.40.xx.xx). MT-PPRC provides the capability to have two PPRC relationships on a single primary volume. With this enhancement, there can be another target available to provide additional data protection to act as a backup if a disaster occurs. This IBM RedpaperTM publication provides practical information about the characteristics and functions of the IBM DS8000® Multiple Target Peer-to-Peer Remote Copy (MT-PPRC). The paper includes scenarios that illustrate the implementation and use of different topologies, as well as enhanced migration scenarios.
