On Faith, Rationality, and the Other in the Late Middle Ages is an investigation of Nicholas of Cusa that seeks a deeper understanding of this important medieval intellectual and his importance for us today. One of Gergely Bakos's primary aims in this study is to understand Nicholas of Cusa's important and underexamined dimensions of his approach to dialogue with Islam. The framework and the methodology that informs this investigation was inspired by the late Professor Jos Decorte (1954-2001), a Flemish philosopher and mediaevalist at the Catholic

University of Leuven in Belgium. Bakos carefully exposit his method of approaching medieval thought (Part One) and then applies and tests this method in practice (Part Two). The most extensive part of this study offers a sketch of the historical background of Nicholas's dialogue with Islam and investigates what possibilities this approach offers. All of this is placed in dialogue with two other mediaeval approaches to Islam (Thomas Aquinas and Ramon Lull). The final chapters discuss Nicholas of Cusa's project from a perspective offered by his mystical theology. The book culminates in an exploration of the possibilities of Nicholas of Cusa's approach by testing the framework of the study. Finally, the author evaluates the application of his own approach (Part Three). The study ultimately has two purposes: to contribute to a better understanding of Nicholas of Cusa's thought, on the one hand, and, on the other, to test a particular methodology and interpretative framework for the understanding of mediaeval culture.

Aaron Gurevich has long been considered one of the world's leading medievalists and a pioneer in the field of historical anthropology. This book brings together eleven of his most important essays—many difficult to find and some never before available in English. Gurevich's writing, while informed by the history of mentalities as practiced by the French school of Le Goff and Duby, reflects a broader view of European culture outside France. He rejects reductionist concepts and operates with a total view of culture, using a wide range of sources—legal as well as ecclesiastical, popular as well as learned, oral and visual as well as literary. This collection amply demonstrates this breadth of Gurevich's work and highlights his ability to synthesize historical, anthropological, and semiotic approaches to culture. Especially valuable are pieces such as Gurevich's essay *Wealth and Gift-Bestowal Among the Ancient Scandinavians*, about the importance of gift exchange in the medieval world. One of the first studies for this practice, this classic essay has for years been unavailable. Other pieces range from the deities and heroes of Germanic poetry to the image of the *Beyond* in the Middle Ages.

All societies are constructed, based on specific rules, norms, and laws. Hence, all ethics and morality are predicated on perceived right or wrong behavior, and much of human culture proves to be the result of a larger discourse on vices and virtues, transgression and ideals, right and wrong. The topics covered in this volume, addressing fundamental concerns of the premodern world, deal with allegedly criminal, or simply wrong behavior which demanded punishment. Sometimes this

affected whole groups of people, such as the innocently persecuted Jews, sometimes individuals, such as violent and evil princes. The issue at stake here embraces all of society since it can only survive if a general framework is observed that is based in some way on justice and peace. But literature and the visual arts provide many examples of open and public protests against wrongdoings, ill-conceived ideas and concepts, and stark crimes, such as theft, rape, and murder. In fact, poetic statements or paintings could carry significant potentials against those who deliberately transgressed moral and ethical norms, or who even targeted themselves.

In *Imagination, Meditation, and Cognition in the Middle Ages*, Michelle Karnes revises the history of medieval imagination with a detailed analysis of its role in the period's meditations and theories of cognition. Karnes here understands imagination in its technical, philosophical sense, taking her cue from Bonaventure, the thirteenth-century scholastic theologian and philosopher who provided the first sustained account of how the philosophical imagination could be transformed into a devotional one. Karnes examines Bonaventure's meditational works, the *Meditationes vitae Christi*, the *Stimulus amoris*, *Piers Plowman*, and Nicholas Love's *Myrrour*, among others, and argues that the cognitive importance that imagination enjoyed in scholastic philosophy informed its importance in medieval meditations

on the life of Christ. Emphasizing the cognitive significance of both imagination and the meditations that relied on it, she revises a long-standing association of imagination with the Middle Ages. In her account, imagination was not simply an object of suspicion but also a crucial intellectual, spiritual, and literary resource that exercised considerable authority.

The struggle over fundamental issues erupted with great fury in the eleventh and twelfth centuries. In this book preeminent medievalist Heinrich Fichtenau turns his attention to a new attitude that emerged in Western Europe around the year 1000.

This new attitude was exhibited both in the rise of heresy in the general population and in the self-confident rationality of the nascent schools. Archimedes in the Middle Ages: The Arabo-Latin tradition

Guilds and fraternities, voluntary associations of men and women, proliferated in medieval Europe. The Art of Solidarity in the Middle Ages explores the motives and experiences of the many thousands of men and women who joined together in these family-like societies. Rarely confined to a single craft, the diversity of guild membership was of its essence. Setting the English evidence in a European context, this study is not an institutional history, but instead is concerned with the material and non-material aims of the brothers and sisters of the guilds. Gervase Rosser addresses the subject of medieval guilds in the context of contemporary

debates surrounding the identity and fulfilment of the individual, and the problematic question of his or her relationship to a larger society. Unlike previous studies, *The Art of Solidarity in the Middle Ages* does not focus on the guilds as institutions but on the social and moral processes which were catalysed by participation. These bodies founded schools, built bridges, managed almshouses, governed small towns, shaped religious ritual, and commemorated the dead, perceiving that association with a fraternity would be a potential catalyst of personal change. Participants cultivated the formation of new friendships between individuals, predicated on the understanding that human fulfilment depended upon a mutually transformative engagement with others. The peasants, artisans, and professionals who joined the guilds sought to change both their society and themselves. The study sheds light on the conception and construction of society in the Middle Ages, and suggests further that this evidence has implications for how we see ourselves.
