Of all the infantry small arms developed during World War II, one that generated the most interest was the German 'assault rifle', the StG 44 Sturmgewehr. This

innovative weapon inspired the Soviet AK-47 in 7.62x39mm calibre. In the West, the NATO countries looked hard at new weapons to upgrade their own infantry arsenals and counter the AK-47, resulting in the design of the Fusil Automatique Léger or FAL. It proved to be a successful battle rifle and was soon adopted by the military and police forces of no fewer than 93 nations. The FAL dominated the militaries of the West to such a degree that its nickname became the Right Arm of the Free World. The FAL fulfilled every role it was asked to perform and remains a viable and well-respected weapon to this day.

## **Gunsmoke and Saddle Leather**

For the faction that controls the Pentagon, the military industry and the oil industry, the Cold War never ended. It went on 'below the radar' creating a global network of bases and conflicts to advance their long-term goal of Full Spectrum Dominance, the total control of the planet: land, sea, air, space, outer space and cyberspace. Their methods included control of propaganda, use of NGOs for regime change, Color Revolutions to advance NATO east, and a vast array of psychological and economic warfare techniques, a Revolution in Military Affairs as they termed it. The events of September 11, 2001 would allow an American President to declare a war on an enemy who was everywhere and nowhere, who justified a Patriot Act that destroyed that very freedom in the name of the new worldwide War on Terror. This book gives a disturbing look at that strategy of Full Spectrum Dominance.

## **Guns Illustrated 2011**

The gun, like the axe and the plow, was an essential tool in the exploration and settlement of the trans-Mississippi West. It provided food for the cooking pot as well as protection against two- or four-legged marauders. As the century progressed, firearms also provided various forms of recreation for both men and women, primarily target and competition shooting. Of course the employment of the gun, whether for good or evil, depended upon the user. The men and women who lived the nineteenth-century western experience sometimes described in detail the role firearms played in their lives. Such accounts included a trapper in the 1830s, a woman crossing the plains by wagon in the 1850s, a drover ("cowboy" in modern terminology) enduring the dangers of a long cattle drive, a professional hunter engaged in the slaughter of the once seemingly endless herds of bison, or a soldier campaigning against American Indians. Each account adds to our knowledge of firearms and our awareness of the struggle faced by those who were a part of the western experience. Gunsmoke and Saddle Leather describes the gun's impact on the lives of those in the West--men and women, whites and American Indians--using their own words to tell that story wherever possible.

## **American Sniper**

This thesis examines the history of the Second Amendment from 18th century scholars through to the present day to search for clues on the legality of banning firearms based on appearances such as the popular AR-15 rifle. It also examines current government statistics as they relate to murder with firearms as well as defining mass shooting incidents. Explanations of various types of firearms are provided as well descriptions of different firearms. It is also suggested that mass shootings are caused by other factors such as mental illness and not the availability of a particular firearm.
