In July 2010, the National Research Council (NRC) appointed the Committee to Review the 21st Century Truck Partnership, Phase 2, to conduct an independent review of the 21st Century Truck Partnership (21CTP). The 21CTP is a cooperative research and development (R&D) partnership including four federal agencies-the U.S. Department of Energy (DOE), U.S. Department of Transportation (DOT), U.S. Department of Defense (DOD), and the

U.S. Environmental Protection Agency (EPA)-and 15 industrial partners. The purpose of this Partnership is to reduce fuel consumption and emissions, increase heavy-duty vehicle safety, and support research, development, and demonstration to initiate commercially viable products and systems. This is the NRC's second report on the topic and it includes the committee's review of the Partnership as a whole, its major areas of focus, 21CTP's management and priority setting, efficient operations, and the new SuperTruck program.

### **Multistate Corporate Tax Guide 2009**

#### **Review of the 21st Century Truck Partnership, Second Report**

Presents industry reviews including a section of "trends and forecasts," complete with tables and graphs for industry analysis.

#### **The Sales Tax in the 21st Century**

Features the original Article 2 with its new judicial interpretations and refinements. Includes new cases and problems based on current cases. Explores Article 2 revisions emphasizing substantively revised sections such as the solution to the "battle of forms" or the decision to retain a substantively changed statute of frauds. Analyzes the history of the contract/tort dichotomy underlying product liability law and the effort of the proposed Article 2 revision to

clarify that body of law. Examines warranties and disclaimers, risk of loss, rejection, revocation of acceptance, cure, remedies, and other traditional structures.

The Law Library presents the complete text of the Vehicle Identification Number Requirements (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition). Updated as of May 29, 2018 Based on concerns that the supply of unique available Vehicle Identification Numbers is diminishing, NHTSA is proposing to amend the agency's Vehicle Identification Number (VIN) regulation. The amendment would ensure that there will be a sufficient number of unique manufacturer identifiers and VINs for the current 17-character VIN system to use for at least another 30 years. This NPRM also proposes other changes to the VIN requirements, such as proposing to require that certain vehicle characteristics of low speed vehicles (LSVs) must be reflected in the VIN of LSVs. This rulemaking also responds to a petition for rulemaking from SAE International (SAE). This ebook contains: - The complete text of the Vehicle Identification Number Requirements (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition) - A dynamic table of content linking to each section - A table of contents in introduction presenting a general overview of the structure
