Master the Civil Service Exams

The testing and training available at the Nevada Test and Training Range (NTTR), in southern Nevada, is considered crucial to the survival of U.S. military personnel and to the success of their missions. As a Major Range and Test Facility Base (MRTFB), the NTTR also is a core element of Department of Defense (DoD) Test and Evaluation (T&E) infrastructure. 2.9 million acres of land have been withdrawn from public use for the NTTR, and the authorization for this withdrawal expires in November 2021. To renew the land withdrawal, the Air Force must submit a request to the Bureau of Land Management (BLM). A significant portion of the NTTR overlaps some land within the Desert National Wildlife Refuge that has been designated as proposed wilderness. This document provides background on the proposed wilderness designation; the limits that it places on Air Force training; and potential approaches to mitigating these limits that decision-makers should consider as part of, and even separately from, a strategy related to the renewal of the land-withdrawal authorization. The Air Force has several options for obtaining greater operational flexibility in the NTTR areas that are proposed as wilderness. All of these options would require working with the U.S. Fish and Wildlife Service (USFWS), and within official USFWS processes, to meet Air Force objectives

Into the Wild

The launch of Russia's Sputnik satellite in 1957 began an era where American
citizens were haunted by fears of annihilation. Baby Boomers will remember Bert
the Turtle, who instructed them how to "duck and cover." Survive the Bomb
documents other U.S. government efforts to calm the collective psyche with
nuclear survival handouts. These cheerful and naïve representations
unintentionally inspired countless schoolchildren to question authority at an early
age. This strange era reached its peak in 1962 with the Cuban Missile Crisis, lasting
at least until the fall of the Berlin Wall. The nightmare still lingers today with the
terrorist threat of dirty bombs and efforts by countries like Iran and North Korea to
build their own nuclear arsenals. In addition to Civil Defense brochures and
pamphlets from the period, Survive the Bomb includes:

- Aftermath descriptions and casualty estimates at various distances from a nuclear blast
- Civil Defense reports and recommendations to the United States Congress and President
- Declassified nuclear wargame scenarios where the Department of Defense imagined the unimaginable
- An introduction and commentaries by Cold War historian Eric G. Swedin

Excerpt from Placer Gold Deposits of Nevada Following the discovery of placers at
Gold Canyon, placer discoveries in Nevada were broadly in three periods: the
1860's to 1880's, when many small deposits throughout the State were discovered
and sporadically worked and several large placers were discovered and extensively
worked; the short period between 1906 and 1910, when very rich placers were dis
covered at Lynn, Battle Mountain, Manhattan, and Round Mountain; the early
1930's, when economic conditions created by the depression caused a renewed
interest in placer mining, and many individuals sought, and a few discovered, new
placer areas throughout the State. The location of the placers described in this
report is shown on plate 1. Very little factual information can be found about the
early periods of placer mining in Nevada. For many placers, the only reports
available are hearsay estimates of production and speculations about the extent of

the placer ground based on remnants of placer pits, shafts, and other workings. Many of the placers said to have had a high production between 1860 and 1890 were worked by Chinese miners who came to Nevada during the building of the railroads and stayed on to work at mining and other activities. The Chinese were reputed to be secretive with their earnings from the placers and did not ship the gold to the mint by Wells Fargo or other shippers. They worked the gravels very thoroughly in areas where American miners did not wish to expend great labor to win the gold. The placers in the Sierra and Spring Valley districts, Pershing County, were worked by Chinese miners; they have a very high estimated production before 1900 and a comparatively low known production since that time. Energy Abstracts for Policy Analysis

In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. His name was Christopher Johnson McCandless. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. Digging deeply, he takes an inherently compelling mystery and unravels the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The

power and luminosity of Jon Krakauer's stoytelling blaze through every page. From the Trade Paperback edition.
