Course Overview The purpose of this course is to provide guidance for Emergency Managers and implementers of children's programs about meeting the unique needs that arise among children as a result of a disaster or emergency. The course includes the following lessons: -Lesson 1: Course Overview -Lesson 2: Unique Needs of Children in Disasters -Lesson 3: Critical Components of a Child's World -Lesson 4: Mitigation -Lesson 5: Preparedness -Lesson 6: Response -Lesson 7: Recovery -Resources Toolkit (downloadable PDF file) Much of the information in this course is based upon a document titled "The Unique Needs of Children in Emergencies: A Guide for the Inclusion of Children in Emergency Operations Plans," published by Save the Children. Course Objectives: At the conclusion of this course, you should be able to create, update, or revise an Emergency Operations Plan for your community or organization to effectively address the unique needs of children in disasters. Primary Audience The target audience for this course is local and state emergency managers and planners. Other individuals or groups that may benefit from taking this course include those directly involved with meeting the needs of children, such as the following: -Judges and other members of the State, county, and local governmental legal system -Voluntary Organizations Active in Disasters (VOADs), faith-based organizations, and other non-profits -Child service agencies -Child care providers -Schools

## **Surviving Your Academic Job Hunt**

Don't let your company kill you! Open this book at your own risk. It contains ideas that may lead to a profound self-awakening. An introspective journey for those in the trenches of today's modern organizations, Deep Change is a survival manual for finding our own internal leadership power. By helping us learn new ways of thinking and behaving, it shows how we can transform ourselves from victims to powerful agents of change. And for anyone who yearns to be an internally driven leader, to motivate the people around them, and return to a satisfying work life, Deep Change holds the key.

## **Disaster Nursing**

### **DSCA Handbook**

CERT (Community Emergency Response Team) is a critical program in the effort to engage everyone in America in making their communities safer, more prepared, and more resilient when incidents occur. Community-based preparedness planning allows us all to prepare for and respond to anticipated disruptions and potential hazards following a disaster. As individuals, we can prepare our homes and

families to cope during that critical period. Through pre-event planning, neighborhoods and worksites can also work together to help reduce injuries, loss of lives, and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. Studies of behavior following disasters have shown that groups working together in the disaster period perform more effectively if there has been prior planning and training for disaster response. These studies also show that organized grassroots efforts may be more successful if they are woven into the social and political fabric of the community-- neighborhood associations, schools, workplaces, places of worship, and other existing organizations. Effective response therefore requires comprehensive planning and coordination of all who will be involved--government, volunteer groups, private businesses, schools, and community organizations. With training and information, individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in the immediate post-disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response. Audience: Effective response therefore requires comprehensive planning and coordination of all who will be involved--government, volunteer groups, private businesses, schools, and community organizations. With training and information, individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in

the immediate post-disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response. ### **Deep Change**

"This course is for emergency managers and related professionals working with all types of volunteers and coordinating with voluntary agencies. [It] provides procedures and tools for building and working with voluntary organizations."--Page 4 of cover.

### **Multicultural Law Enforcement**

Course OverviewThe Community Emergency Response Team (CERT) Program educates individuals about disaster preparedness and trains and organizes teams of volunteers that can support their communities during disasters. The CERT Program offers training in basic disaster response skills, such as fire safety, light

search and rescue, and disaster medical operations. With proper CERT training, you can help protect your family, neighbors, and co-workers if a disaster occurs."Introduction to Community Emergency Response Teams (CERT)," IS-317, is an independent study course that serves as an introduction to CERT for those interested in completing the basic CERT training or as a refresher for current team members. The course includes six modules: CERT Basics, Fire Safety, Hazardous Material and Terrorist Incidents, Disaster Medical Operations, and Search and Rescue, and Course Summary. While IS-317 is useful as a primer or refresher for CERT training, it is not equivalent to, and cannot be used in place of, the classroom delivery of the CERT Basic Training. To become a CERT volunteer, one must complete the classroom training offered by a local government agency such as the emergency management agency, fire or police department. Contact your local emergency manager to learn about the local education and training opportunities available to you. Let this person know about your interest in taking CERT training.

**Course Objectives:** After completing this course, CERT Independent Study (IS)-317, you should be able to:

- \*Identify key concepts that form the foundation for CERT operations
- \*Identify principles and guidelines for CERT activities

This lesson provides an overview of the CERT role in disaster preparedness and response. It also covers what you will learn in other lessons about CERT organization and activities

### **Is-800. B National Response Framework**

This book provides environmental technology students with an enjoyable way to quickly master the basics of industrial hygiene. Like all the books in the critically acclaimed Preserving the Legacy series, it follows a rapid-learning modular format featuring learning objectives, summaries, chapter-end reviews, practice questions, and skill-building classroom activities. Throughout the text, sidebars highlight critical concepts, and more than 90 high-quality line-drawings, photographs, and diagrams help to clarify concepts covered. Author Debra Nims begins with a fascinating historical overview of the art and science of industrial hygiene, followed by a concise review of key concepts and terms from biology and toxicology. She then offers in-depth practical coverage of: \* Identifying hazards or potential hazards \* Sampling and workplace evaluations \* Hazard control \* Toxicology, occupational health, and occupational health standards \* Airborne hazards \* Dermatoses and contact hazards \* Fire and explosion hazards \* Occupational noise \* Radiation \* Temperature extremes \* Repetitive use traumas With its comprehensive coverage and quick-reference format, Basics of Industrial Hygiene is also a handy refresher and working reference for practicing environmental technicians and managers.

Course Overview On February 28, 2003, President Bush issued Homeland Security Presidential Directive-5. HSPD-5 directed the Secretary of Homeland Security to develop and administer a National Incident Management System (NIMS). NIMS provides a consistent nationwide template to enable all government, private-sector, and nongovernmental organizations to work together during domestic incidents. You can also find information about NIMS at <http://www.fema.gov/nims/> This course introduces NIMS and takes approximately three hours to complete. It explains the purpose, principles, key components and benefits of NIMS. The course also contains "Planning Activity" screens giving you an opportunity to complete some planning tasks during this course. The planning activity screens are printable so that you can use them after you complete the course. What will I be able to do when I finish this course? \* Describe the key concepts and principles underlying NIMS. \* Identify the benefits of using ICS as the national incident management model. \* Describe when it is appropriate to institute an Area Command. \* Describe when it is appropriate to institute a Multiagency Coordination System. \* Describe the benefits of using a Joint Information System (JIS) for public information. \* Identify the ways in which NIMS affects preparedness. \* Describe how NIMS affects how resources are managed. \* Describe the advantages of common communication and information management systems. \* Explain how NIMS influences technology and technology systems. \* Describe the purpose of the NIMS Integration Center CEUs: 0.3

Trust the best-selling Official Cert Guide series from Cisco Press to help you learn, prepare, and practice for exam success. They are built with the objective of providing assessment, review, and practice to help ensure you are fully prepared for your certification exam. · Master Cisco CCNA ICND2 200-105 exam topics · Assess your knowledge with chapter-opening quizzes · Review key concepts with exam-preparation tasks This is the eBook edition of CCNA Routing and Switching ICND2 200-105 Official Cert Guide. This eBook does not include the companion CD-ROM with practice exam that comes with the print edition. CCNA Routing and Switching ICND2 200-105 Official Cert Guide presents you with an organized test-

preparation routine through the use of proven series elements and techniques. "Do I Know This Already?" quizzes open each chapter and enable you to decide how much time you need to spend on each section. Exam topic lists make referencing easy. Chapter-ending Exam Preparation Tasks help you drill on key concepts you must know thoroughly. CCNA Routing and Switching ICND2 200-105 Official Cert Guide from Cisco Press enables you to succeed on the exam the first time and is the only self-study resource approved by Cisco. Best-selling author and expert instructor Wendell Odom shares preparation hints and test-taking tips, helping you identify areas of weakness and improve both your conceptual knowledge and hands-on skills. This complete study package includes

- A test-preparation routine proven to help you pass the exams
- "Do I Know This Already?" quizzes, which enable you to decide how much time you need to spend on each section
- Chapter-ending and part-ending exercises, which help you drill on key concepts you must know thoroughly
- Troubleshooting sections, which help you master the complex scenarios you will face on the exam
- A final preparation chapter, which guides you through tools and resources to help you craft your review and test-taking strategies
- Study plan suggestions and templates to help you organize and optimize your study time

Well regarded for its level of detail, study plans, assessment features, challenging review questions and exercises, video instruction, and hands-on labs, this official study guide helps you master the concepts and techniques that ensure your exam success. This official study guide helps you master all the topics on the CCNA ICND2 exam, including

- Ethernet LANs

· IPv4 routing protocols · Wide area networks · IPv4 services: ACLs and QoS · IPv4 routing and troubleshooting · IPv6 · Network management, SDN, and cloud computing

### **Developing and Managing Volunteers**

This book follows all NIMS ICS (National Incident Management System--Incident Command System) processes and principles. Beyond Initial Response was written to fill a significant gap in ICS training. Critical ICS position-specific training is difficult to get, yet responders have the responsibility to effectively operate in an ICS organization. This book removes the gap, instills confidence, knowledge and assurance that is required to be successful in an ICS command. Major focus areas: 1) the ICS Planning Process discussed in extensive detail, 2) ICS positions (13 critical positions thoroughly covered in depth), and 3) Unified Command: what it takes to be successful. This book is an invaluable reference tool that contains numerous job aids, checklists, illustrations and sample documents enabling the user to seamlessly work within the Incident Command System. In addition, it is an excellent support source for ICS training, contingency planning and response operations. Beyond Initial Response should be within arms length whether you are training or deploying.

### **Facing Hazards and Disasters**

Course Overview This course is designed to foster an overall culture of risk management throughout the DHS workforce. While providing awareness of the fundamental concepts of risk management, the course will prepare employees to manage risk at home, in the workplace, and the community and provide them with a foundation for further development in the area of risk management. Course Objectives: Upon completion of this course, you should be able to: -Recognize the value of risk management. -Explain how the fundamental concepts and principles of risk management apply at home, in the workplace, and in the community. -Explain how the DHS Risk Management Cycle utilizes logical reasoning and critical thinking to address risk management problems. -Describe how risk management alternatives are developed and evaluated in order to support better decisions to effectively manage risk. -Explain how and why the management of risk is one of the fundamental strategies adopted by DHS in meeting mission performance expectations. -Describe the characteristics of effective risk communication.

### **Fire Department Incident Safety Officer**

Course Overview ICS 200 is designed to enable personnel to operate efficiently during an incident or event within the Incident Command System (ICS). ICS-200

provides training on and resources for personnel who are likely to assume a supervisory position within the ICS. The Emergency Management Institute developed ICS its ICS courses collaboratively with: National Wildfire Coordinating Group (NWCG) U.S. Department of Agriculture United State Fire Administration's National Fire Programs Branch Primary Audience Persons involved with emergency planning, response or recovery efforts. NIMS Compliance This course is NIMS compliant and meets the NIMS Baseline Training requirements for I-200. Prerequisites IS-100.a CEUs 0.3

### **Cert Basic Training Participant Manual**

Course Overview This course is designed to help prepare participants for deployment to a domestic incident. Responding to incidents requires that we must be ready, willing, and able to deploy at a moment's notice. This course provides personnel with practical tips and advice for incident deployment. Course Objectives: By the end of this course, participants will be able to: -Prepare for deployment, including detailing what information to gather, what steps to take, and what things to pack. -Check in when arriving at the assigned location. -Acclimate to the working and living conditions at the assigned incident facility. -Take care of themselves during deployment. -Maintain standards for accountability. -Complete the check-out process. Primary Audience This course is designed for FEMA employees who deploy to domestic incidents. It is suggested

that personnel who have not completed the IS-700 and IS-800b courses do so before completing this course.

#### **Guide for All-Hazard Emergency Operations Planning**

This Independent Study course is intended to provide a general introduction to hazardous materials that can serve as a foundation for more specific studies in the future. The course has five Units which are outlined below. No prior knowledge of the subject is required or assumed. At the end of the course, the participant should be able to: \* Explain the roles of Federal, State, Tribal and local governments in reducing hazardous materials risks through Health and Environmental Regulations;\* Discuss the two major hazardous materials identification systems

used within the United States;\* Identify possible terrorist's targets of opportunities in the use of toxic industrial chemicals (TIC) as Weapons of Mass Destruction (WMD);\* Identify locations where hazardous materials are commonly found and how to determine their potential health effects;\* Describe basic terms that pertain to exposures to hazardous materials;\* Read and interpret a materials safety data sheet (MSDS);\* Explain how hazardous materials enter the body and contaminate the environment; \* Describe what communities can do to increase their emergency preparedness to respond to hazardous materials incidents; and\* Identify steps individuals and communities can take to protect themselves during a hazardous materials release.

### **IS-100.C**

Social science research conducted since the late 1970s has contributed greatly to society's ability to mitigate and adapt to natural, technological, and willful disasters. However, as evidenced by Hurricane Katrina, the Indian Ocean tsunami, the September 11, 2001 terrorist attacks on the United States, and other recent events, hazards and disaster research and its application could be improved greatly. In particular, more studies should be pursued that compare how the characteristics of different types of events-including predictability, forewarning, magnitude, and duration of impact-affect societal vulnerability and response. This book includes more than thirty recommendations for the hazards and disaster

community.

### **Michigan Compiled Laws Annotated**

In order for a community to be truly prepared to respond to any type of emergency, it must develop effective emergency planning. Emergency Planning guides readers through the steps of developing these plans, offering a number of strategies that will help ensure success. It delves into the patterns of human disaster behavior, social psychology, and communication as well as the basics of generic protective actions, planning concepts, implementation, and action.

### **CPO Focus on Physical Science**

Comprehensive Preparedness Guide (CPG) 101 provides Federal Emergency Management Agency (FEMA) guidance on the fundamentals of planning and developing emergency operations plans (EOP). CPG 101 shows that EOPs are connected to planning efforts in the areas of prevention, protection, response, recovery, and mitigation. Version 2.0 of this Guide expands on these fundamentals and encourages emergency and homeland security managers to engage the whole community in addressing all risks that might impact their jurisdictions. While CPG 101 maintains its link to previous guidance, it also reflects the reality of the current

operational planning environment. This Guide integrates key concepts from national preparedness policies and doctrines, as well as lessons learned from disasters, major incidents, national assessments, and grant programs. CPG 101 provides methods for planners to: Conduct community-based planning that engages the whole community by using a planning process that represents the actual population in the community and involves community leaders and the private sector in the planning process; Ensure plans are developed through an analysis of risk; Identify operational assumptions and resource demands; Prioritize plans and planning efforts to support their seamless transition from development to execution for any threat or hazard; Integrate and synchronize efforts across all levels of government. CPG 101 incorporates the following concepts from operational planning research and day-to-day experience: The process of planning is just as important as the resulting document; Plans are not scripts followed to the letter, but are flexible and adaptable to the actual situation; Effective plans convey the goals and objectives of the intended operation and the actions needed to achieve them. Successful operations occur when organizations know their roles, understand how they fit into the overall plan, and are able to execute the plan. Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all

phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain. Planners achieve unity of purpose through coordination and integration of plans across all levels of government, nongovernmental organizations, the private sector, and individuals and families. This supports the fundamental principle that, in many situations, emergency management and homeland security operations start at the local level and expand to include Federal, state, territorial, tribal, regional, and private sector assets as the affected jurisdiction requires additional resources and capabilities. A shared planning community increases the likelihood of integration and synchronization, makes planning cycles more efficient and effective, and makes plan maintenance easier.

### **Is-454**

ICS 100, Introduction to the Incident Command System, introduces the Incident

Command System (ICS) and provides the foundation for higher level ICS training. This course describes the history, features and principles, and organizational structure of the Incident Command System.

For courses in Multicultural Law Enforcement and Special Topics in Policing. From a diverse team of writers whose expertise spans law enforcement and cross-cultural relations, comes a text with comprehensive coverage of sensitive topics and issues related to diversity and multiculturalism facing police in the 21st century. It contains insightful as well as practical information and guidelines on how law enforcement professionals can work effectively with diverse cultural groups, both inside their organizations as well as in the community.

## **IS-700 National Incident Management System (NIMS), an Introduction**

### **Is-101.C**

Course Overview The course introduces participants to the concepts and principles of the National Response Framework. Course Objectives At the end of this course, you will be able to describe: The purpose of the National Response Framework. The response doctrine established by the National Response Framework. The roles and responsibilities of entities as specified in the National Response Framework. The

actions that support national response. The response organizations used for multiagency coordination. How planning relates to national preparedness. Primary Audience This course is intended for government executives, private-sector and nongovernmental organization (NGO) leaders, and emergency management practitioners. This includes senior elected and appointed leaders, such as Federal department or agency heads, State Governors, mayors, tribal leaders, and city or county officials - those who have a responsibility to provide for effective response. Prerequisite: None CEUs: 0.3

### **Fire and Water Engineering**

This book provides an overview of all aspects of search and rescue procedures and equipment, It teaches the absolutely essential techniques employed by nearly all search and rescue personnel. This book offers an in-depth and practical approach to search and rescue and is recommended for all emergency responders. For both paid and unpaid professionals, this resource combines dynamic features with the latest comprehensive content.

### **Developing and Maintaining Emergency Operations Plans: Comprehensive Preparedness Guide (CPG) 101, Version 2. 0**

PRECISION MACHINING TECHNOLOGY has been carefully written to align with the National Institute of Metalworking Skills (NIMS) Machining Level I Standard and to support achievement of NIMS credentials. This new text carries NIMS exclusive endorsement and recommendation for use in NIMS-accredited Machining Level I Programs. It's the ideal way to introduce students to the excitement of today's machine tool industry and provide a solid understanding of fundamental and intermediate machining skills needed for successful 21st Century careers. With an emphasis on safety throughout, PRECISION MACHINING TECHNOLOGY offers a fresh view of the role of modern machining in today's economic environment. The text covers such topics as the basics of hand tools, job planning, benchwork, layout operations, drill press, milling and grinding processes, and CNC. The companion Workbook/Shop Manual contains helpful review material to ensure that readers have mastered key concepts and provides guided practice operations and projects on a wide range of machine tools that will enhance their NIMS credentialing success. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

### **The Publishers Weekly**

A girl. An iguana. An island. And e-mail. Meet Nim—a modern-day Robinson Crusoe! She can chop down bananas with a machete, climb tall palm trees, and start a fire with a piece of glass. So she's not afraid when her scientist dad sails off to study

plankton for three days, leaving her alone on their island. Besides, it's not as if no one's looking after her—she's got a sea lion to mother her and an iguana for comic relief. She also has an interesting new e-mail pal. But when her father's cell-phone calls stop coming and disaster seems near, Nim has to be stronger and braver than she's ever been before. And she'll need all her friends to help her. From the Trade Paperback edition.

### **IS-0366. a - Planning for the Needs of Children in Disasters**

Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

### **Voice Radio Communications Guide for the Fire Service**

'If you stay in the house you will surely be crushed and killed, all of you.' Time is running out for Mrs Frisby. She must move her family of mice before the farmer destroys their home. But her youngest son, Timothy, is too ill to survive the move. Help comes in the unexpected form of a group of mysterious, super-intelligent rats. But the rats are in danger too, and little by little, Mrs Frisby learns the secrets of their extraordinary past.

Developed in partnership with the Fire Department Safety Officer's Association and based on the 2015 Edition of NFPA 1521, Standard for Fire Department Safety Officer Professional Qualifications, this authoritative resource focuses uniquely on the roles, responsibilities, and duties for fire service officers assigned to the incident command staff position of safety officer. From smoke reading to alternative energy sources to green

construction buildings, Fire Department Incident Safety Officer, Third Edition is loaded with up-to-date information needed to keep fire department members safe, including: A new chapter dedicated to the Incident Safety Officer at Training Drills and Special Events Entire chapters devoted to important topics like reading smoke, reading buildings,

### **Master the EMT-Basic Certification Exam**

This guide has been developed in partnership with NIMS to aid you in achieving high levels of success on the National Institute for Metalworking Skills (NIMS) Level I certification exams. After receiving technical training, practicing, and demonstrating the competencies, this study guide will help you determine your level of readiness for the actual NIMS certification exam. The registration process, performance exams, and requirements for the online theory exams are explained. Test-taking strategies are also included. Practice tests, answer keys, and explanations provide you with insight into the knowledge and skill area being assessed and serve as an extension of the classroom, lab, and on-the-job training previously received. A glossary of terms is also included. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## **Wiley Pathways Emergency Planning**

This candid book dispenses essential advice for academic job hunters and gives them the skills and knowledge to land a job in the humanities. Fully revised and updated, this book offers a comprehensive look at the do's and don'ts of the application and interview process and provides indispensable tips and a variety of practical tools.

## **Nim's Island**

Social media is a new technology that not only allows for another channel of broadcasting messages to the public, but also allows for two way communication between emergency managers and major stakeholder groups. Increasingly the public is turning to social media technologies to obtain up to date information during emergencies and to share data about the disaster in the form of geo data, text, pictures, video, or a combination of these media. Social media also can allow for greater situational awareness for emergency responders. While social media allows for many opportunities to engage in an effective conversation with stakeholders, it also holds many challenges for emergency managers. The purpose of this course is to provide the participants with best practices including tools, techniques and a basic roadmap to build capabilities in the use of social media

technologies in their own emergency management organizations (State, local, Tribal) in order to further their emergency response missions. By the end of this course, participants will be able to: Explain why social media is important for emergency management Describe the major functions and features of common social media sites currently used in emergency management Describe the opportunities and challenges of using social media applications during the 5 phases of emergency management Describe better practices for using social media applications during the 5 phases of emergency management Describe the process for building the capabilities and to sustain the use of social media in an emergency management organization (State, local, tribal, territorial)"
