Is your boat ready to go cruising? Just about every sailboat—used and new—can make a good cruiser, but only if the hull-deck structure, rig, and systems meet certain standards. Spurr's Guide to Upgrading Your Cruising Sailboat tells you what those standards are, and gives you all the help you need to refurbish and upgrade every structure, surface, fitting, and system on your boat—stem to stern, project by project. This all-in-one guide leads you step by step to a seaworthy, crew-friendly boat with top-notch cruising performance. Not only will you learn what to look for when you buy a new or used boat, you'll also learn how to reinforce your boat's hull and structural components, redesign and replace rigging, upgrade electrical systems, and much more. Special features include: A detailed survey of 70 used and new fiberglass sailboats best suited to offshore sailing Gear and equipment recommendations by brand name Construction details and other essential features of a strong, safe cruising boat How to make critical repairs to the deck, hull, bulkheads, blisters, and portlights

Homogeneous charge compression ignition (HCCI)/controlled auto-ignition (CAI) has emerged as one of the most promising engine technologies with the potential to combine fuel efficiency and improved emissions performance, offering reduced nitrous oxides and particulate matter alongside efficiency comparable with modern diesel engines. Despite the considerable advantages, its operational range is rather limited and controlling the combustion (timing of ignition and rate of energy release) is still an area of on-going research. Commercial applications are, however, close to reality. HCCI and CAI engines for the automotive industry presents the state-of-the-art in research and development on an international basis, as a one-stop reference work. The background to the development of HCCI / CAI engine technology is described. Basic principles, the technologies and their potential applications, strengths and weaknesses, as well as likely future trends and sources of further information are reviewed in the areas of gasoline HCCI / CAI engines; diesel HCCI engines; HCCI / CAI engines with alternative fuels; and advanced modelling and experimental techniques. The book provides an invaluable source of information for scientific researchers, R&D engineers and managers in the automotive engineering industry worldwide. Presents the state-of-the-art in research and development on an international basis An invaluable source of information for scientific researchers, R&D engineers and managers in the automotive engineering industry worldwide Looks at one of the most promising engine technologies around

The fascinating biography of David Scott-Moncrieff, alias 'Bunty' – a colourful larger-than-life personality, enthusiastic car expert, charming entertainer, and passionate vintage car addict. Bunty's favourite marque was Rolls-Royce, and, for some time, he claimed to be the Number 1 in the Rolls-Royce second-hand car trade worldwide. Bunty also owned world-famous race cars, heaps of worn-out hearses (to be rebuilt), supercharged Mercedes classics, and even an antique Steamer. Here, you will meet them all, along with some of his many admirers who had the courage and pleasure to enter the passenger seat. Halwart Schrader travelled to England to meet Bunty on many occasions, knew him well. and has written this long-awaited biography in full co-operation with Bunty's son, Humphrey Scott-Moncrieff.

The greatest small engines in the world are manufactured by Briggs & Stratton. From the informal partnership Stephen F. Briggs and Harold M. Stratton formed in 1908, Briggs & Stratton has evolved into an industry leader whose name is synonymous with the lawn mower engines it pioneered. The Legend of Briggs & Stratton, 208 pages, is filled with 125 color and 145 black & white images chronicling Briggs & Stratton's fascinating history.
