Queen of France

Women in Hellenistic Egypt

Anna Goldsworthy was nine years old when she met Eleanora Sivan, the charismatic Russian émigré and world-class pianist who became her piano teacher. Piano Lessons is the story of what Mrs. Sivan brought to Anna's lessons: a love of music, a respect for life, a generous spirit, and the courage to embrace a musical life. Beautifully written and strikingly honest, Piano Lessons takes the reader on a journey into the heart and meaning of music. As Anna discovers passion and ambition, confronts doubt and disappointment, and learns about much more than tone and technique, Mrs. Sivan's wisdom guides her: "We are not teaching piano playing. We are teaching philosophy and life and music digested." "What is intuition? Knowledge that has come inside." "My darling, we must sit and work." Piano Lessons reminds us all how an extraordinary teacher can change a life completely. A work that will appeal to all music lovers and anyone who has ever taken a music lesson, Piano Lessons will also touch the heart of anyone who has ever loved a teacher.

This is the biography of one of the most tragic women in History. It is the story of a frivolous young girl who threw wild parties and spent a lot of her husband's money and for that reason, and that reason alone, she had her head chopped off in public. The back cover photo here shows Marie Antoinette being given her last rights by a clergyman as she was waiting before the guillotine for the executioners to cut off

her head, and while a crowd of thousands watched. Her last words were one of apology to one of her executioners, when she accidentally stepped on his foot. All of the events of the Life of Marie Antoinette are brilliantly explained in this biography by Andre Castelot. The most haunting and harrowing pages of the biography are Castelot's darkly etched picture of the Queen in the culminating moments of her life. Perhaps it is not in the least a paradox that one of the most arrantly self-indulgent women should, in her adversity, provide one of the most memorable images of mother love."

Study Guide & Solutions Manual

This innovative book from acclaimed educator Paula Bruice is organized in a way that discourages rote memorization. The author's writing has been praised for anticipating readers' questions, and appeals to their need to learn visually and by solving problems. Emphasizing that learners should reason their way to solutions rather than memorize facts, Bruice encourages them to think about what they have learned previously and apply that knowledge in a new setting. KEY TOPICS The book balances coverage of traditional topics with bioorganic chemistry, highlights mechanistic similarities, and ties synthesis and reactivity together teaching the reactivity of a functional group and the synthesis of compounds obtained as a result of that reactivity. For the study of organic chemistry.

FPGAs (Field-Programmable Gate Arrays) can be found in applications such as smart phones, mp3 players, medical imaging devices, and for aerospace and defense technology. FPGAs consist of logic blocks and programmable interconnects. This allows an engineer to start with a blank slate and program the FPGA for a specific task, for instance, digital signal processing, or a specific device,

for example, a software-defined radio. Due to the short time to market and ability to reprogram to fix bugs without having to respin FPGAs are in increasingly high demand. This book is for the engineer that has not yet had any experience with this electrifying and growing field. The complex issue of FPGA design is broken down into four distinct phases - Design / Synthesis / Simulation / Place & Route. Numerous step-by-step examples along with source code accompany the discussion. A brief primer of one of the popular FPGA and hardware languages, VHDL, is incorporated for a simple yet comprehensive learning tool. While a general technology background is assumed, no direct hardware development understanding is needed. Also, included are details on tool-set up, verification techniques, and test benches. Reference material consists of a quick reference guide, reserved words, and common VHDL/FPGA terms. Learn how to design and develop FPGAs -- no prior experience necessary! Breaks down the complex design and development of FPGAs into easy-to-learn building blocks Contains examples, helpful tips, and step-by-step tutorials for synthesis, implementation, simulation, and programming phases

Forcing Chess Moves

WINNER of the ChessCafe 2008 Book of the Year Award SHORTLISTED for The Guardian 2008 Chess Book of the Year Award Why is it that the human brain so often refuses to consider winning chess tactics? Every chess fan marvels at the wonderful combinations with which famous masters win their games. How do they find those fantastic moves? Do they have special vision? And why do computers outwit us tactically? Forcing Chess Moves proposes a revolutionary method for finding winning moves. Charles Hertan has made an astonishing discovery: the failure to consider key moves is often due to human bias. Your brain tends to disregard many winning moves because they are counter-intuitive or look unnatural. It's a fact of life: computers outdo us humans when it comes to tactical vision and brute force calculation. So why not learn from them? Charles Hertan's radically different approach is: use COMPUTER EYES and always look for the most forcing move first. By studying forcing sequences according to Hertan's method you will: Develop analytical precision Improve your tactical vision Overcome human bias and staleness Enjoy the calculation of difficult positions Win more games by recognizing moves that matter. This New and Extended Fourth Edition of Hertan's award-winning modern classic includes 50 extra pages with new and instructive combinations. There is a foreword by three-time US chess champion Joel Benjamin, and a special foreword to this new edition by Swedish Grandmaster Pontus Carlsson.

Using evidence from a wide array of sources, Sarah Pomeroy discusses women ranging from queens such as Arsinoë II and Cleopatra VII to Jewish slaves working on a Greek estate.
