This thoughtful volume assesses the likely impact of reformed trade policies on the poorest of the poor—those on the bottom economic rungs in developing nations. The focus on a spectrum of poor nations across different regions provides some helpful and hopeful guidelines regarding the likely impacts of a global trade reform, agreed upon under the auspices of the World Trade Organization, as well as the impact of such reforms on economic development. In order to facilitate lesson-drawing across different regions, each country study utilizes a similar methodology. They combine information on trade policy at the product level with income and

consumption data at the household level, thus capturing effects both on the macro level and in individual households where development policies ideally should improve day-to-day life. This uniformity of research approach across the country studies allows for a deeper and more robust comparison of results.

comprehensive book for those who aspire to excel in SSC Paper 1 and Paper 2 for Jr. Engineer – Electrical post. The book has been updated with the SSC Junior Engineer 2017 (2 Sets), 2016, 2015 & 2014 Solved Papers. The book has been divided into three sections namely Electrical Engineering, General Intelligence & Reasoning and General Awareness, each sub-divided into ample number of solved problems designed on the lines of questions asked in the exam. All the chapters contain detailed theory along with solved examples. Exhaustive question bank at the end of each chapter is provided in the form of Exercise. Solutions to the Exercise have been provided at the end of each chapter. Another unique feature of the book is the division of its General Awareness section into separate chapters on History, Geography, Polity, Economy, General Science, Miscellaneous topics and Current Affairs.

This is a selection of my “Letters to the Editor” that were published in two local dailies, The Star and New Straits Times (NST), over the period from Dec 2007 to August 2013. These letters relate my experiences in leading and managing schools and embody my thoughts and propositions for school improvement, enrichment as well as innovation. The letters are not presented in chronological order following their dates of publication. Instead, they are grouped according to specific sections of interest. Nevertheless, I am mindful of the fact that school matters often overlap and school issues cannot be tackled in discrete units. An integrated and holistic approach should be applied. And, thinking out of the box so as to bring about innovation and even “transformation” is very much advocated all through my letters. Schools are where national education policies are being piloted, modified and if appropriate, then implemented in full.

Stake holders for the wellbeing, upgrading and progress of a school must of necessity include more than merely its students, parents, teachers and administrators. ix The Education Ministry, state and district education offices, other related ministries, the community, private sectors and certainly some non-government organizations (NGOs), all have important roles to play in ensuring the smooth and efficient running of our schools. I have looked within and outside of schools for causes and effects that have bearing on school matters. The letters included in the "Values" section in particular, bear out the familial and societal influence and impact on school life. It is hoped that this compilation can be a useful reference and resource materials for all planners, executors, learners and evaluators of our school improvement initiatives and programmes. August 2013 --- LIONG KAM CHONG

Volume Eight of the project documenting Thomas Jefferson's last years presents 591 documents dated from 1 October 1814 to 31 August 1815. Jefferson is overjoyed by American victories late in the War of 1812 and highly interested in the treaty negotiations that ultimately end the conflict. Following Congress's decision to purchase his library, he oversees the counting, packing, and transportation of his books to Washington. Jefferson uses most of the funds from the

sale to pay old debts but spends some of the proceeds on new titles. He resigns from the presidency of the American Philosophical Society, revises draft chapters of Louis H. Girardin's history of Virginia, and advises William Wirt on revolutionary-era Stamp Act resolutions. Jefferson criticizes those who discuss politics from the pulpit, and he drafts a bill to transform the Albemarle Academy into Central College. Monticello visitors Francis W. Gilmer, Francis C. Gray, and George Ticknor describe the mountaintop and its inhabitants, and Gray's visit leads to an exchange with Jefferson about how many generations of white interbreeding it takes to clear Negro blood. Finally, although death takes his nephew Peter Carr and brother Randolph Jefferson, the marriage of his grandson Thomas Jefferson Randolph is a continuing source of great happiness. Some images inside the book are unavailable due to digital copyright restrictions.

The Retirement Series documents Jefferson's written legacy between his return to private life on 4 March 1809 and his death on 4 July 1826. During this period Jefferson founded the University of Virginia and sold his extraordinary library to the nation, but his greatest legacy from these years is the astonishing depth and breadth of his correspondence with statesmen, inventors, scientists, philosophers, and ordinary citizens on topics spanning virtually every field of human endeavor.--From publisher description.

James Joseph Sylvester (1814-97) was an English mathematician who made key contributions to numerous areas of his field and was also of primary importance in the development of American mathematics, both as inaugural Professor of Mathematics at Johns Hopkins University and founder of the American Journal of Mathematics. Originally published in 1912, this book forms the fourth in four volumes of Sylvester's mathematical papers, covering the period from 1882 to 1897. Together these volumes provide a comprehensive resource that will be of value to anyone with an interest in Sylvester's theories and the history of mathematics.
