Having the Soldier's Baby

Sometimes a city can be like a bird. Just as the magpie is an inveterate collector, hoarding beautiful

eclectic bits to line its nest, so Prague retains fragments from bygone regimes and centuries past to create a city of juxtaposition that is alternately exquisite and bizarre. Prague's personality is expressed as much by its obvious beauty as by its overlooked details. This unforgettable place is brought to life by acclaimed author Myla Goldberg, a former Prague expat, whose first novel, *Bee Season*, captivated so many with its unique voice and exhilarating prose. Myla Goldberg lived in Prague in 1993, just as the process of Westernization was getting under way, the city straddling a past it wished to shed and a future it was eager to embrace. In 2003, she returned to see what the pursuit of capitalism had wrought and to observe the integral ways in which Prague's character had endured. In *Time's Magpie*, Goldberg explores a city where centuries-old buildings have become receptacles for Western values and a generation defined by the Communist regime coexists with a generation for whom Communism is a rapidly fading memory. Wander through the narrow alleyways and cobblestone streets to places most tourists never see—to a neighborhood eerily transformed by the devastating flood of 2002; to an anachronistic amusement park that is home to a discomfiting array of Technicolor confections; and to the cabinets of curiosity in the Strahov Monastery, where hidden among deceptively modest displays of butterfly specimens and ladies' fans are creatures that defy the laws of taxidermy. This imaginative, individualistic journey will show you the odd and unique corners of a city often seeking to erase what its very stones will not allow it to forget. From the Hardcover edition.

A Manual of Ethics

This volume offers a concise and accessible introduction to 1 Peter, especially aimed at undergraduate-level students. It provides information on the likely historical and social setting of this letter, on its literary form and theological content, and on issues involved in its interpretation. In particular, this volume suggests that 1 Peter is an important text not least for the ways in which it both reflects and constructs early Christian identity, in its relationships with Judaism and the Roman Empire. Although 1 Peter remains neglected compared with the canonical gospels and the major Pauline letters, Horrell argues that the letter deserves much more attention for the pivotal contribution it makes to the development of early Christianity and for the ways in which it reveals this development in progress.

The papers contained in the first part of the book are particularly valuable as a primer for researchers interested in economic discrimination. On this basis alone this book is recommended for researchers seeking an overview of current techniques for assessing economic discrimination. . . The final section nicely highlights both the importance in understanding the interaction of policy and economic discrimination, and the difficulties in isolating policy effects. Education Economics Editor Rodgers has compiled a very useful book that summarizes the current state of the literature on economic discrimination. . . This reviewer learned something new and interesting in every chapter and particularly appreciated the clear survey of the age discrimination literature. . . This book will be of value to academics and to those in the legal arena. Highly recommended. J.P. Jacobsen, Choice Discrimination s dynamic nature means that no single theory, method, data or study should be relied upon to assess its magnitude, causes, or remedies. Despite some gains in our

understanding, these remain active areas of debate among researchers, practitioners and policymakers. The specially commissioned papers in this volume, all by distinguished contributors, present the full range of issues related to this complex and challenging problem. Part 1 explores innovations in methods and data collection that help to provide richer descriptions of inequality. Part 2 reviews empirical evidence on discrimination that people with disabilities, older workers and gay, lesbian and bisexual individuals face. Although discrimination among these groups is not new, this Handbook shows that economists are beginning to more fully document their experiences. Part 3 presents a balanced discussion of anti-discrimination policies and the impact of affirmative action. The methods and data chapters are particularly designed to encourage researchers to utilize the new approaches and develop new data sources. Accessible and comprehensive, the Handbook is the seminal reference on the economics of discrimination for academic and professional economists, graduate students, advanced undergraduates, practitioners, policymakers, and funders of social science research.

Social Care presents an accessible overview of manual handling legislation, legal case law, national guidance, policy and practice. Applicable primarily to England, Scotland and Wales, it covers both employee safety under the Manual Handling Operations Regulations and wider health and safety at work legislation, and also patient and client entitlement under community care, NHS and human rights legislation. A stand-alone overview of manual handling law and practice is followed by more in-depth material, in A-Z format and fully cross-referenced, which allows the reader to look up issues for quick access to further information. In particular, it contains an extensive collection of case law relevant to health and social care and digested in summary form. Topics include rehabilitation, risk assessment, care plans, equipment provision, documentation of decisions and cumulative strain injury. Addressing the tensions sometimes existing between the health and safety of employees, the needs and wishes of service users and limited resources, this book provides professionals, managers, front-line staff and legal advisers with an understanding of law as a useful and practical tool to assist in solutions to manual handling problems.
