comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

Fairies are real, and they're all around us! Award-winning author-illustrator Phoebe Wahl offers a fanciful and beautifully illustrated peek into the hidden world of fairies, sprites, and other magical creatures. A girl searches for fairies in her backyard and the woods beyond, following little clues and traces of magic. Fairies and other magical creatures can be found on every page, hidden among the flowers, trees and pebbles. But although readers can see them, the girl keeps searching, just one step behind. In the end, it is clear (both to the girl and readers) that there is magic all around, even when it's hidden in plain sight. Phoebe Wahl takes us deep into the world of fairies, and her vibrant, multi-textured woodland scenes are every bit as enchanting as the

Inquiry: The Key to Exemplary Science

Jerry D Young was born at home, in Senath, Missouri July 3, 1953. At age 5 the family rented a small farm house on an active farm 40 miles southwest of St. Louis. While the family weren't farmers, they lived something of a homestead type life, raising a milk cow, sometimes two, and calves, a pig or two, chickens, and the occasional goat. Along with the stock, a large garden helped to feed Jerry's three brothers and two sisters for several years. Fishing and hunting contributed to the pantry, as did foraging the wild edibles on the property. At the age of 14, the family, minus a brother and two sisters that were now adults and on their own, moved back to Senath. Having been encouraged from an early age to read, Jerry was a regular patron of the Senath Branch Library. A love of a good story was born within him, and shortly before graduating high school, for a lack of stories that he liked at the library, he began to write short vignettes, and started taking notes for

stories that he wanted to tell. Well, a full life interceded, and the writing didn't resume for several years. But while working a job with a much free time, and the then newfangled home computer, Jerry began to write in earnest. With the occasional gap in the process, Jerry continued to research and write, never believing he could ever be published. But when he turned 50, he wanted a change in his life, left the job he was doing and began focusing on his writing. When he became ill, the writing stopped, but not the inspiration. When he started writing again, in 2004, after getting the medical problems under control, he began to read some on-line stories dealing with emergency preparedness, one of his other loves. The die was cast. Now with over a hundred of the vignettes and short stories about how to survive disasters written, along with his other novels, Jerry decided to go for broke, adding one of his previous works every few days to his list of stories now available, Jerry continues to write, both the Prep/PAW stories, as well as action adventure with a little romance type stories that first got him started.

Marie Curie, renowned for her work on radioactivity, was the first woman to win a Nobel Prize, the first person to win in two fields (chemistry and physics), and the first woman to hold a chair position at the Sorbonne. Marie Curie for Kids details Curie's remarkable life, from her childhood under a repressive czar in Poland to her tireless work supporting herself through college to meeting her ideal match in scientist Pierre Curie to her revolutionary research. Kids learn how Curie quietly flouted societal norms, working in full partnership with her husband while also teaching and raising two daughters. Scientific concepts are presented in a clear, accessible way, and a range of activities—from making Polish pierogies to exploring magnetism to using electrolysis to split water—allow for exploration of Curie's life, times, and work.

etc.) is powerful and engaging and, when well implemented, can offer a level of interaction and engagement. It's not about what they are but about how we use them and what they can offer me in an educational setting. Whether you're a teacher, student, parent, school governor, or on the PTA, you ought to know about QR Codes – what they are, how they work, and how you can leverage them to increase student participation in and around the classroom. They offer the ability to share digital content from teacher to student, from student to student, and even from student to teacher. Go on, try it! This eBook will explain everything and put QR Codes in context. Using computers and technology in educational environments can be exciting and challenging. Implementing QR Codes within your student's learning is just that: exciting to see how students of all ages use and interact with them, and a challenge to make them usable, informative, applicable, and appropriate. This book draws on established examples from the commercial and corporate world as well as from established users of QR Codes at all levels of education; from primary schools up to Universities. Not only will you find examples of how QR Codes have been used but you will find out how you can design, create, and implement your own QR Code treasure hunt, library resource, student group work, orientation activity, conference or event feedback, etc. David Hopkins has developed a respected reputation among educational technology networks for his use and research into the uses of QR Codes. He has been active with QR Codes at Bournemouth University and more recently at the University of Leicester since 2008. This book draws on
