For thirty years, Peter Singer's Practical Ethics has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not

have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

## **Pet mesterclass**

Creating young thinkers with great futures. Show and Tell taps into children's natural curiosity, asking a question such as "who makes you happy?" or "what do our senses tell us?" as the focus for each unit. Activities encourage children to explore the question while learning the language they need to think and talk about it. End-of-unit class projects consolidate learning and encourage children to work collaboratively. Opportunities to "Show and Tell" allow them to present their projects in class or at home, and to talk about what they have learned - in English! Stories, hand-eye coordination practice and letter formation activities lead to reading and writing simple sentences. Problem-solving activities encourage children to think critically and creatively. Values lessons teach children how to behave both inside and outside the classroom.

## **Show and Tell, Level 3**

Gerald Durrell's *My Family and Other Animals* is a charming and comic autobiographical novel. Fleeing the gloomy British climate, the Durrell clan move to Corfu carrying the bare essentials of life- acne cures for Margo; revolvers for Leslie; books for Larry and a jam jar full of caterpillars for Gerry. Recounted with warmth and humour, it is a heart-warming portrait of an eccentric family surrounded by a wonderful cast of friends and fauna.

## **Oxford Phonics World: 4: Workbook**

While at an Oxford cocktail party, tearoom owner Gemma Rose overhears a sinister conversation minutes before a University student is fatally poisoned. Could there be a connection? And could her best friend Cassie's new boyfriend have anything to do with the murder? Gemma decides to start her own investigation, helped by the nosy ladies from her Oxfordshire village and her old college flame, CID detective Devlin O'Connor. But her mother is causing havoc at Gemma's quaint English tearoom and her best friend is furious at her snooping and this mystery is turning out to have more twists than a chocolate pretzel! Too late, Gemma realises that she's could be the next item on the killer's menu. Or will her little tabby cat, Muesli, save the day? (\*\* Velvet Cheesecake recipe included!)

Anyone can master the fundamentals of game design - no technological expertise is necessary. The Art of Game Design: A Book of Lenses shows that the same basic principles of psychology that work for board games, card games and athletic games also are the keys to making top-quality videogames. Good game design happens when you view your game from many different perspectives, or lenses. While touring through the unusual territory that is game design, this book gives the reader one hundred of these lenses - one hundred sets of insightful questions to ask yourself that will help make your game better. These lenses are gathered from fields as diverse as psychology, architecture, music, visual design, film, software engineering, theme park design, mathematics, writing, puzzle design, and anthropology. Anyone who reads this book will be inspired to become a better game designer - and will understand how to do it.
