The Economist

Autobiographical accounts by Nobel laureates reflect

the richness and diversity of contemporary economic thought and offer insights into the creative process; with six new laureates. *Lives of the Laureates* offers readers an informal history of modern economic thought as told through autobiographical essays by thirty-two Nobel Prize laureates in economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. The accounts are accessible and engaging, achieving clarity without sacrificing inherently difficult content. This seventh edition adds six Nobelists to its pages: Roger B. Myerson (co-recipient in 2007) describes his evolution as a game theorist and his application of game theory to issues that ranged from electoral systems to perverse incentives; Thomas J. Sargent (co-recipient in 2011), recounts the development of the rational expectations model, which fundamentally changed the policy implications for macroeconomic models; Amartya Sen (recipient in 1998) reflects on his use of a bicycle (later donated to the Nobel Museum) to collect data early in his career; A. Michael Spence (co-recipient in 2001) describes, among other things, his whiplash-inducing first foray into teaching an undergraduate class; Christopher A. Sims (co-recipient in 2011) discusses his “non-Nobel” research; and Alvin E. Roth (co-recipient in 2012) chronicles the “three insurrections” he has witnessed in mainstream economics. *Lives of the Laureates* grows out of a continuing lecture series at Trinity University in San Antonio, which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms. The Laureates W. Arthur Lewis, Lawrence R. Klein, Kenneth J. Arrow,

Paul A. Samuelson, Milton Friedman, George J. Stigler, James Tobin, Franco Modigliani, James M. Buchanan, Robert M. Solow, William F. Sharpe, Ronald H. Coase, Douglass C. North, John C. Harsanyi, Myron S. Scholes, Gary S. Becker, Robert E. Lucas, Jr., Vernon L. Smith, Clive W. J. Granger, Edward C. Prescott, Thomas C. Schelling, Edmund S. Phelps, Eric S. Maskin, Joseph E. Stiglitz, Paul Krugman, Peter A. Diamond, Roger B. Myerson, Thomas J. Sargent, Amartya Sen, A. Michael Spence, Christopher A. Sims, Alvin E. Roth

Universities tend to be judged by the test scores of their incoming students and not on what students actually learn once they attend these institutions. While shared tests and surveys have been developed, most schools refuse to publish the results. Instead, they allow such publications as U.S. News & World Report to define educational quality. In order to raise their status in these rankings, institutions pour money into new facilities and extracurricular activities while

underfunding their educational programs. In *Why Public Higher Education Should Be Free*, Robert Samuels argues that many institutions of higher education squander funds and mislead the public about such things as average class size, faculty-to-student ratios, number of faculty with PhDs, and other indicators of educational quality. Parents and students seem to have little knowledge of how colleges and universities have been restructured over the past thirty years. Samuels shows how research universities have begun to function as giant investment banks or hedge funds that spend money on athletics and administration while increasing tuition costs and actually lowering the quality of undergraduate education. In order to fight higher costs and lower quality, Samuels suggests, universities must reallocate these misused funds and concentrate on their core mission of instruction and related research. Throughout the book, Samuels argues that the future of our economy and democracy rests on our ability to train students to be thoughtful participants in the production and analysis of knowledge. If leading universities serve only to grant credentials and prestige, our society will suffer irrevocable harm. Presenting the problem of how universities make and spend money, Samuels provides solutions to make these important institutions less expensive and more vital. By using current resources in a more effective manner, we could even, he contends, make all public higher education free.

Collected here are both of Frederick Douglass' magazine articles: "My Escape from Slavery" and "Reconstruction," as well as his address "The Hypocrisy of American Slavery." These pieces show Douglass at his rhetorical best. Important reading for anyone wanting more after reading his Autobiographies.

Why Public Higher Education Should Be Free

"It is a measure of Professor Samuelson's preeminence that the sheer scale of his work should be so much taken for granted," observes a reviewer in the *Economist* who goes on to note that "a cynic might add that it would have been better for Professor Samuelson to write less merely to give others a chance to write at all." In fact, Samuelson's output, his "extraordinary mastery of methods, both mathematical and linguistic" (review of Volume 4 of *The Collected Scientific Papers*), have not diminished. Volume 5 collects 108 articles written since 1976, bringing the total to nearly 400 important contributions to economics. As in earlier volumes, the papers are arranged by subject. They cover Economic Theory: Marx, Keynes, and Schumpeter; International Economics; Stochastic Theory; Classical Economics; Mathematical Biology; Biographical and Autobiographical Writings; and Current Economics and Policy. Volumes 1 through 4 encompass more than 280 articles. The first two contain virtually all of Samuelson's contributions to economic theory

through mid-1964; Volume 3 contains all the scientific papers written from mid-1964 through 1970, and the last volume brings his work up to through 1976. Paul Samuelson received the Nobel Prize in Economics in 1970 and is Institute Professor of Economics Emeritus at MIT. Kate Crowley edited volume 4 of The Collected Scientific Papers with Hiroaki Nagatani.
