This book offers a wealth of information, new topics and ideas with a particular appeal to first-time home buyers who are vacillating about their ability to purchase their “dream house”. Sonia encourages her readers to begin by beginning by purchasing a property with the intention of selling or renting the property and moving on up within a few years. Real Estate Economics

Ever wonder what a realtor does to deserve a disproportionately expensive 4%-6% commission on the sale of your home? They claim to offer unlimited exposure and transaction expertise and to act as an irreplaceable mediator in the negotiation process. In reality, what they provide is little more than a concierge tour service to show your home, and is that really worth \$20,000 on the sale of a \$400,000 home? In *Death of the Real Estate Salesman*, Jarred Kessler describes how advances in technology have rendered the traditional role of the real estate agent meaningless. He describes how emerging Internet-based tools will enable homeowners and prospective buyers to find each other with zero commitment, zero uncertainty, and zero realtor involvement. Buyers will be able to find their dream home more readily with less distrust in the process, and sellers will reap the financial rewards of not losing tens of thousands of dollars to a realtor with a competing agenda. By learning his process, you will open your eyes to the new world of real estate, which is just around the corner in a desirable neighborhood near you.
