Fractals are characterized by the repetition of similar patterns at ever-diminishing scales. Fractal geometry has emerged as one of the most exciting frontiers on the border between mathematics and information technology and can be seen in many of the swirling patterns produced by computer graphics. It has become a new tool for modeling in biology, geology, and other natural sciences. Anthropologists have observed that the patterns produced in different cultures can be characterized by specific design themes. In Europe and America, we often see cities laid out in a grid pattern of straight streets and right-angle corners. In contrast, traditional African settlements tend to use fractal structures-circles of circles of circular dwellings, rectangular walls enclosing ever-smaller rectangles, and streets in which broad avenues branch down to tiny footpaths with striking geometric repetition. These indigenous fractals are not limited to architecture; their recursive patterns echo throughout many disparate African designs and knowledge systems. Drawing on interviews with African designers, artists, and scientists, Ron Eglash investigates fractals in African architecture, traditional hairstyling, textiles, sculpture, painting, carving, metalwork, religion, games, practical craft, quantitative techniques, and symbolic systems. He also examines the political and social implications of the existence of African fractal geometry. His book makes a unique contribution to the study of mathematics, African culture, anthropology, and computer simulations.

This trading ledger was created by an active stock trader and allows the user to make detailed journal entries of all of their trading activities. Numerous psychological studies have determined that the best way for humans to learn is by writing things down with pen and paper, and then reviewing this information periodically. The author of this ledger holds a degree in psychology and used his knowledge of human learning to develop an intuitive ledger that allows traders to clarify their thoughts on paper and analyze all of their transactions. Even the cover has been designed with vivid colors and a retro pattern to evoke the limbic system of the brain and encourage organization of thought processes. This workbook has been laid out in a manner to make effective use of goals, trading plans, and strategies by allowing the trader to keep a visual record of their progress. Created by best-selling author Ashbee A. Bakht, the trading ledger is printed on high quality paper and is published in a compact format making it easy to carry with you no matter where you choose to trade. The formatting of the workbook has been designed with special attention paid to allow for it to be flexible enough for all trading strategies (i.e. intraday/day/swing/long term, etc.).

This book makes an urgent demand for silence. The ability to think, to reflect, and to create are all highly dependent on regular access to silence. Yet in today's noisy, 24/7 society silence and quiet are under threat. And the business world only makes this worse with cynical marketing strategies abusing the power of noise: ever-diminishing oases of calm are hard to find. Stuart Sim argues that we need more, not less, silence. He explains why silence matters, where it matters--in our environment, in religion, philosophy, the arts, literature and science - and why the human race will suffer if we do not make space for it. The confrontation between the politics of noise and the politics of silence affects all of us profoundly: we cannot stay neutral on this issue.

The multi-million copy bestseller, Kim Edwards' *The Memory Keeper's Daughter* is a moving and poignant novel about grief, family and betrayal. Families have secrets they hide even from themselves. It should have been an ordinary birth, the start of an ordinary happy family. But the night Dr David Henry delivers his wife's twins is a night that will haunt five lives for

ever. For though David's son is a healthy boy, his daughter has Down's syndrome. And, in a shocking act of betrayal whose consequences only time will reveal, he tells his wife their daughter died while secretly entrusting her care to a nurse. As grief quietly tears apart David's family, so a little girl must make her own way in the world as best she can. According to Raybeck, the solitary dictum that best

characterizes fieldwork is Things go awry. In this spirited account of his time spent in Southeast Asia, Raybeck describes several adventures and misadventures involving field research, as well as the understanding, humility and bruises that these experiences leave behind. Since fieldwork is situated, Raybecks treatment also includes rich descriptions of Kelantanese society and culture, addressing such topics as kinship, linguistics, gender relations, economics, and political structures. Through the lively pages of this narrative, readers gain insight into the human dimension of the fieldwork undertaking, a sense of how the anthropologist builds rapport in a research setting, and how reliable information is obtained.

In this report, Cathy Davidson and David Theo Goldberg focus on the potential for shared and interactive learning made possible by the Internet. They argue that the single most important characteristic of the Internet is its capacity for world-wide community and the limitless exchange of ideas. The Internet brings about a way of learning that is not new or revolutionary but is now the norm for today's

graduating high school and college classes. It is for this reason that Davidson and Goldberg call on us to examine potential new models of digital learning and rethink our virtually enabled and enhanced learning institutions. The idea for this book predates not only my trilogy on colonial rebellion but my decision to produce the Reconsidering Chartism series. Its gestation began in 2003 with an off-hand comment by a student during a

session on European influences on Chartism in the 1840s. She asked: 'what impact did Chartism have on the rest of the world?' I have spent the years since trying to find an answer and this has taken me in directions I could not have anticipated when it all began. Although much has been written about Chartism in Britain, though considerably less on Ireland, when I started work on this problem I quickly found that, apart from articles considering European influences on Chartism and on Chartism in Australia and a book on Chartists in the United States, this was not a question that had been the subject of serious consideration. The opening chapters address this issue. The first examines the internationalism of Chartism something that was evident from the beginnings of the movement. Chapter 2 looks at the relationship between Chartism and events in Canada during the 1830s that led to the rebellions in the Canadas in 1837 and 1838 and the ways in which Scottish Chartism, in particular, had an impact on the politics of the Clear Grits of the early 1850s. This is followed by a chapter that explores Chartism and the Australian colonies especially NSW and Victoria during the 1840s and 1850s when, what were previously penal colonies, made the transition from rule by governors to democratic constitutions in which the People's Charter played an influential part. Chapter 4 draws this discussion together by asking just how far Chartism was a 'global force' in the mid-nineteenth century. The remainder of the book brings together issues that have been a frequent feature throughout the series. The ways in which historians have regarded Chartism have, since Gammage first wrote about it, been matters of disagreement and is

considered in Chapters 5 and 6. There was persistent tension in working-class political movements in the first half of the nineteenth century over the relationship between familial and political concerns as ideas of masculinity and femininity shifted. The precise extent of women's participation in movements of protest is difficult to quantify and there is little sign of any formal involvement in politics before radical political reform revived, in London and provincial cities and in the northern textile districts after 1815. Women were not only part of the crowd but from the Queen Caroline affair in 1820 through to the 1850s had a particular role in radical politics, the subject of Chapter 7. Many of those who have commented on Chartism have pointed to leadership, or rather lack of it, as one of the reasons why it ultimately failed. Chapter 8 considers the nature of Chartist leadership and suggests that the traditional view of its ineffectiveness reflects an O'Connor focussed view and fails to consider the importance of local leadership or recognise the different sorts of 'leader' within the movement. Chapter 9 is an extensive revision of a paper on Chartism and the State originally composed in 2003. Chartists had little political muscle and, despite their mass support, were powerless when faced by the coercive power of the local and national states. The final chapter looks at how Chartism has been remembered and memorialised. For radicals, monuments were often less about consensus and more about building permanent symbols of defiance and opposition.
