For the most current information on energy conservation code requirements, refer to the 2015 INTERNATIONAL ENERGY CONSERVATION CODE. This highly beneficial resource fosters energy conservation through efficiency in envelope design, mechanical systems, lighting systems, and through the use of new materials and techniques. In the residential provisions, the inclusion of the Energy Rating Index Compliance Alternative as another compliance path adds more flexibility to the 2015 IECC. With this comprehensive and cutting edge coverage, it is a critical component of a user's code books.

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractor of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance

tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.

K9 Search and Rescue

Make sure your K9 investigation work holds up in court. Based on Resi and Ruud's previous book, *K9 Fraud*, with updated content and a new chapter. Learn how to: Avoid the most common mistakes handlers make. Become a better trainer and handler with a scientific understanding of scent and tracking work. Train your dog for scent-identification lineups using the scientifically proven Dutch standard. Faulty K9 investigations often have serious consequences: the guilty might walk free, and the innocent might suffer. Internationally recognized dog handlers and trainers Dr. Resi Gerritsen and Ruud Haak use real-life case studies—historical and recent—to highlight K9 errors that can derail entire investigations. Each of these mistakes, such as influencing your dog's results or relying on contaminated scents, damages your reputation and the value of your work. But with the right knowledge

and training protocols, you can minimize investigation errors. K9 errors have hampered investigations from the earliest uses of dogs for police work in Europe to twenty-first century cases such as the 2001 anthrax attacks in the United States.
