Quartet for the End of Time: A Novel

Offers ancient solutions to today's problems and provides new perspectives on timeless troubles. For people seeking to bring spiritual values to work or seeking to discover new beliefs and values through their work. Coauthored by Buddhist scholar Franz Metcalf and workplace expert BJ Gallagher. Buddhism has for thousands of years provided a spiritual foundation for the daily lives of millions of people around the world. But does Buddhism have anything to offer us - Buddhists and non-Buddhists alike - in today's world of work? Metcalf and Gallagher think it does. Spiritual wisdom, Western or Eastern, inspires and instructs us in living a good life. And that's just as true at work as at home. Buddha mind - a source of calm, compassion, and insight - exists within each of us, not just the historical Buddha. Being Buddha at Work shows how to embody that mind in the stress and clamor of the workplace - how to tap into the Buddha consciousness so we can relieve daily tensions and greet challenges with awareness, equanimity, and good humor. The book is divided into three sections. The first, "Becoming a Mindful Worker," covers Buddha's wisdom for our own work; the second, "Cultivating Mindful Work Relationships," focuses on how to work with other people; the third, "Creating a Mindful Workplace," deals

with broader organizational topics. There is wisdom here for everyone - from frontline workers and team members, to supervisors and managers, to top executives and organizational leaders.

PRIVILEGED GRACE

Appropriate for any course introducing management information systems from a business perspective. This casebook will serve as an ideal complement to most MIS/CIS textbooks. Designed to demonstrate how software can support managerial decision-making activities, this casebook features 24 cases (more than another casebook currently on the market) covering a wide range of functional areas throughout the business, including finance/accounting, HR, production, and information systems. The cases are spread across three difficulty levels basic, intermediate, and advanced. They present common managerial issues and problems, and encourage students to actually use their models to make decisions for the cases characters. They require students to apply spreadsheet, database, Web-page development, and/or presentation graphics software, often in an integrated manner. Many of the cases require students to prepare both written and oral presentations

on their solutions. Among the topics covered in MIS Cases: Decision Making with Application Software Second Edition: forecasting, inventory decisions, what-if analyses, pricing strategies, billing decisions, and much more.

Snowbound Mystery

There Are Some Summers You'll Always Remember Sometimes I wake up shivering in the early hours of the morning, drowning in dreams of being out there in the ocean that summer, of looking up at the moon and feeling as invisible and free as a fish. But I'm jumping ahead, and to tell the story right I have to go back to the beginning. To a place called Indigo Beach. To a boy with pale skin that glowed against the dark waves. To the start of something neither of us could have predicted, and which would mark us forever, making everything that came after and before seem like it belonged to another life. My name is Mia Gordon: I was sixteen years old, and I remember everything.

In 1987, seasoned journalist Jerry Capeci was hired by the New York Daily News to cover the crime beat. His reporting on the Mafia proved so popular that he was given a weekly column, which was tagged "Jerry Capeci's Gangland." "Gangland" was an immediate hit with New Yorkers and continued for almost seven years. Capeci wrote on the everyday trials and tribulations of La Cosa Nostra, putting the mob under a microscope and laying bare the inner workings and day-to-day operations of both mob bosses and low-level street soldiers alike. He reported on such major mob events as John Gotti's murder conviction and Sammy "the Bull" Gravano's testimony that put Gotti behind bars.

ABOUT THE BOOK The recent 60 Minutes interview with President Barack Obama impressed upon me the importance of looking at politics from all angles. In this current election year, many tend to think it's necessary to choose a side and despise everything that comes from the other side. Even members of Congress take this attitude. In reality, however, both sides in the political arena have the capability of creating legislation that makes sense. Taking the best of both worlds is the best approach. The most important action we can take to improve the current economic situation is to listen and be objective. In his interview, President Obama said, "It is my vision for this country to put forth an economic package that will benefit the majority of Americans." Whether or not you agree with his approach, his ideas deserve consideration and respect. MEET THE AUTHOR The Hyperink Team works hard to bring you high-quality, engaging, fun content. EXCERPT FROM THE BOOK Kroft interview with Obama is called "President Obama: The economy, the congress, the future," an apt title for this important pre-election discussion. Kroft begins by asking the President what he thinks of new polls that state that 75 percent of Americans think he is not doing a good job. Obama replies by saying he would be surprised if Americans felt satisfied, since there is a lot more work to be done. He explains that he is working toward an economy that benefits everyone, not just a few. This initial back and forth sets the tone for the interview, which takes place in Osawatomie, Kansas. Next, Kroft switches to the subject of Congress and getting work done. In spite of it being an election year, the President contends he is still working. He wants to work with both parties in Congress, but will not wait when there is an opportunity to exercise his executive authority to get things done. Speaking on his vision for the future, President Obama says he wants to create policies that benefits the majority of Americans. He is even willing to go against some of the ideology his own party has promoted in the past to accomplish this. Kroft concludes the interview by asking the President why he should be re-elected. Obama gives a convincing argument that includes his accomplishments on health care reform, saving the auto industry, ending Don't Ask Don't Tell, decimating Al Qaeda, and getting the economy on the road to recovery. Let's take a closer look at Obama's in-depth discussion of the choices that have gotten him this far and his plans for a second term. Buy a copy to continue reading!

Flight of the Fugitives

This unique work examines the role played by sexuality in the historical encounter between China and the West. Distinguished historian D. E. Mungello focuses especially on Western homosexuals who saw China as a place of escape from the homophobia of Europe and North America. His groundbreaking study traces the lives of two dozen men, many previously unknown to have same-sex desire, who fled to China and in the process influenced perceptions of Chinese culture to this day. This escapism engendered casual sexual encounters, serious friendships, and substantive intellectual relationships, all of which had a profound impact on shaping the modern Western conception of China.

I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

Rekindled (Fountain Creek Chronicles Book #1)

A “cinematic . . . page-turner and a compassionate analysis of faith, memory, responsibility, and consequence.”—Molly Antopol, Fiction Writers Review Inspired by and structured around the chamber piece of the same title by the French composer Olivier Messiaen, *Quartet for the End of Time* is a mesmerizing story of four lives irrevocably linked in a single act of betrayal. The novel takes us on an unforgettable journey beginning during the 1930s Bonus Army riots, when World War I veteran Arthur Sinclair is falsely accused of conspiracy and then disappears. His absence will haunt his son, Douglas, as well as Alden and Sutton Kelly, the children of a powerful U.S. congressman, as they experience—each in different ways—the dynamic political social changes that took place leading up to and during World War II. From the New Deal projects through which Douglas, newly fatherless, makes his living to Sutton’s work as a journalist, to Alden’s life as a code breaker and a spy, each character is haunted by the past and is searching for love, hope, and redemption in a world torn apart by chaos and war. Through the lives of these characters, as well as those of their lovers, friends, and enemies, the novel transports us from the Siberian Expedition of World War I to the underground world of a Soviet spy in the 1920s and 1930s, to the occultist circle of P. D. Ouspensky and London during the Blitz, to the German prison camp where Messiaen originally composed and performed his famous *Quartet for the End of Time*. At every turn, this rich and ambitious novel tells some of the less well-known stories of twentieth-century history with epic scope and astonishing power, revealing at every turn the ways in which history and memory tend to follow us, and in which absence has a palpable presence.

In This Mountain

Three novellas by the author of *Legends of the Fall*. "A brilliant tour de force . . . Jim Harrison at his peak: comic, erotic, and insightful" (San Francisco Chronicle). Across the odd contours of the American landscape, people are searching for the things that aren't irretrievably lost, for the incandescent beneath the ordinary. An ex-Bible student with raucously asocial tendencies rescues the preserved body of an Indian chief from the frigid depths of Lake Superior in a caper that nets a wildly unexpected bounty. A band of sixties radicals, now approaching middle age, reunite to free an old comrade from a Mexican jail. A fifty-year-old suburban housewife flees quietly from her abusive businessman husband at a highway rest stop, climbs a fence, and explores the bittersweet pageant of the preceding years within the sanctuary of an Iowa cornfield. *The Woman Lit by Fireflies* is the work of a classic writer at the very top of his form—a hard-living, hard-writing hero of American letters whose novellas comprise a sweeping tribute to the nation's heartland and the colorful, courageous characters who inhabit it. "Funny, wild, sexy, and bizarre . . . Along with Richard Ford . . . Harrison has cornered the market in the tough-but-tender style that characterized Hemingway's early work." —Nick Hornby

Quicklet on 60 Minutes: President Obama, Part 1

My main message is if we fight our own demons, learn to forgive and love ourselves, do and attract the good, then we can reach our inner peace, where all other blessings stem from. When we reach this point, we do not have the need to fight or hurt one another, thus, tolerance, compassion, acceptance, and hopefully, earthly peace. In my book *Privileged Grace*, previously published as *Walking with the Vain Cattle* in 2009, I shared through the best truth I knew, my deepest thoughts, emotions, pains, challenges, dreams, gradual healing, evolution, insights, and triumphs which led me to my light. Of course, each of us will have different quests and battles to reach happiness and peace. Mine were mainly dealing with the conformity, banality, mendacity, and evil of our world, such as war, corruption, slander, manipulation, abuse, etc., and to top it, my own ego. This might explain the choice of the previous book's title. Simply, this was the diary of my spiritual journey, and I know that this odyssey is still at its beginning. But as any other book, movie, or a piece of theatre, it either brings you laughter and tears, guidance, awareness, realizations, smiles, messages, inspiration, etc., or it doesn't. It is up to you to see it from any point of view you please or simply view its points, and then you can still distort it, if you wish! Thank you for reading me, and hope this book brings you insights and answers, which might help you define and reach your inner light and peace. God bless.
