Hearings on H.R. 4367 and H.R. 6688

From time to time, your friends, relatives, and business associates will need you to write character references, letters of recommendation, introduction to business colleagues, reference letters to college admission boards and committees, and nominations for awards. Writing that letter or email puts your friend, family member, or colleague in the limelight-and banks a favor for your own future. So don't let that task of phrasing a great letter keep you from helping someone in these situations. Get to the point immediately. Introduce or recommend the person in the first sentence or paragraph. Overview the person's association with you: In what capacity did you know this individual? How have you become aware of his or her skills, talent, character traits, contributions, or success? Avoid making exaggerated claims that will sound insincere and may set both parties up for disappointment. Close by expressing confidence that any future association between the reader and your friend, family member, or colleague will be mutually rewarding. With writing reference letters or letters of recommendation, you'll have a unique chance to do a favor for two people-with only a few strokes on your keyboard and a few minutes' time. Scientific Teaching

A Best Book of the Year: NPR and Boston Globe Finally a novel that puts the "pissed" back into "epistolary." Jason Fitger is a beleaguered professor of creative writing and literature at Payne University, a small and not very distinguished liberal arts college in the midwest. His department is facing draconian cuts and squalid quarters, while one floor above them the Economics Department is getting lavishly remodeled offices. His once-promising writing career is in the doldrums, as is his romantic life, in part as the result of his unwise use of his private affairs for his novels. His star (he thinks) student can't catch a break with his brilliant (he thinks) work Accountant in a Bordello, based on Melville's Bartleby. In short, his life is a tale of woe, and the vehicle this droll and inventive novel uses to tell that tale is a series of hilarious letters of recommendation that Fitger is endlessly called upon by his students and colleagues to produce, each one of which is a small masterpiece of high dudgeon, low spirits, and passive-aggressive strategies. HHMI Professor Jo Handelsman and her colleagues at the Wisconsin Program for Scientific Teaching (WPST) have distilled key findings from education, learning, and cognitive psychology and translated them into six chapters of digestible research points and practical classroom examples. The recommendations have been tried and tested in the National Academies Summer Institute on Undergraduate Education in Biology and through the WPST. Scientific Teaching is not a prescription for better teaching. Rather, it encourages the reader to approach teaching in a way that captures the spirit and rigor of scientific research and to contribute to transforming how students learn science.
