This handbook explores the issues-centered curriculum for social studies teaching and how student performance reflects an intellectual capacity to address public issues. The book is divided into 11 parts with essays to address specific aspects of the approach. The foreword, written by Shirley Engle, establishes a context for issues-based curriculum. Essays include: "Defining Issues-Centered Education" (Ronald W. Evans; Fred M. Newmann; David Warren Saxe); "Building a Rationale for Issues-Centered Education" (Anna S. Ochoa-Becker); "The Engle-Ochoa Decision Making Model for Citizenship Education" (Rodney F. Allen); "Using Issues in the Teaching of American History" (David Warren Saxe); "World History and Issues-Centered Instruction" (Richard E.

The editors focus on the role technology could play in development and advancement of literacy speech and reasoning. Topics include: *speech directed at infants; *speech perception; *cognitive development and spelling; *early reading instruction; *reading and comprehension; and *influences of modern technology and multi-media. Representing a history of study in the field, this book appeals to anyone

The Armadillo from Amarillo

In the first edition of this book published in 1988, Shirley Engle and I offered a broader and more democratic curriculum as an alternative to the persistent backtothebasics rhetoric of the '70s and '80s. This curriculum urged attention to democratic practices and curricula in the school if we wanted to improve the quality of citizen participation and strengthen this democracy. School practices during that period reflected a much lower priority for social studies. Fewer social studies offerings, fewer credits required for graduation and in many cases, the job descriptions of social studies curriculum coordinators were transformed by changing their roles to general curriculum consultants. The mentality that prevailed in the nation's schools was "back to the basics" and the basics never included or even considered the importance of heightening the education of citizens. We certainly agree that citizens must be able to read, write and calculate but these abilities are not sufficient for effective citizenship in a democracy. This version of the original work appears at a time when young citizens, teachers and schools find themselves deluged by a proliferation of curriculum standards and concomitant mandatory testing. In the '90s, virtually all subject areas including United States history, geography, economic and civics developed curriculum standards, many funded by the federal

government. Subsequently, the National Council for the Social Studies issued the Social Studies Curriculum Standards that received no federal support. Accountability, captured in the No Child Left Behind Act passed by Congress, has become a powerful, political imperative that has a substantial and disturbing influence on the curriculum, teaching and learning in the first decade of the 21st century.

Social Studies for Secondary Schools: Teaching to Learn, Learning to Teach, Second Edition integrates discussions of educational goals and the nature of history and social studies with practical ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme woven throughout the text is that what we choose to teach and the way we teach reflect our broader understanding of society, history, and the purposes of social studies education. Each chapter opens with a

broad question about social studies education; provides many examples of lessons, including lesson ideas developed by new and experienced middle school and high school social studies teachers; features a rich variety of teaching, learning, and classroom activities designed to provoke discussion and illustrate different approaches to teaching social studies; and concludes with essays about related social studies topics. Part I focuses on philosophical issues, social studies goals and standards, and the design of social studies curricula. Part II examines and offers examples of strategies for planning units and lessons. Part III explores topics, such as thematic and interdisciplinary teaching, a project approach to social studies, as well as assesses student learning and one's own performance as a teacher, and provides a guide to social studies resource materials and organizations. New in the Second Edition: *Every chapter has been updated and includes a number of new lesson ideas. *The lesson ideas are designed especially to help beginning teachers address learning standards; work in inclusive settings; and promote literacy and the use of technology in social studies classrooms. *Sample activities developed with members of the Hofstra New Teachers Network reflect the current focus on document-based instruction and assessment, and can serve as tools for assessing student learning. *Increased attention is given to project-based social studies instruction and to multicultural education. Intended as a text for undergraduate and graduate preservice social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced
